PREFACE

THIS work is believed to be the first attempt at a comprehensive description of the atlases of Great Britain and Ireland. Richard Gough, in his *British Topography* published in 1780, certainly mentions the maps and atlases known to him, but does not furnish any description of their contents. The study of British cartography was quite neglected until Sir H. G. Fordham (whose valuable works have been of great assistance to me) published, in 1907, his *Hertfordshire Maps, a Descriptive Catalogue of the Maps of the County*, 1579-1900, followed, in 1908, by *Cambridgeshire Maps.*

The need for recording, in convenient form, the mass of information available with regard to county maps was made plain by the interest displayed by students on the publication of these pioneer works. Others were encouraged to extend the scope, so that in addition to the counties mentioned, the maps of Cheshire, Gloucester, Lancashire, Norfolk (not yet published), Somerset, Stafford, Westmorland, Wiltshire and East Yorkshire have now been catalogued. An attempt has been made in the present volume to provide further aid to the student in a more comprehensive form.

Unless otherwise noted copies of all the atlases described are in the British Museum. The titles of the works are given in full with the size of the title page in inches, the measurement being taken from the outside border line. If there is no border, then the size of the paper is given, the first measurement being from left to right.

The arrangement is chronological, the various editions or reprints being placed immediately after the first issue. Any addition to, or change in, the later issues is noted. Cross references to the editions or reprints are given under the date of publication, with a reference to the number they bear. Any collection of county maps illustrating other works, *e.g.* Camden's *Britannia*, or issued in magazines, although not strictly in atlas form, is included and treated as an atlas.

Every effort has been made to render the bibliography complete, but it is to be expected that some works may have escaped notice, for unrecorded atlases, or editions, are often discovered as the various collections in country houses are from time to time dispersed.

I am greatly indebted to Mr. F. P. Sprent for his introductory survey of British Cartography, and his generous assistance during publication; also to Mr. J. W. Skells and Mr. H. Beharrell, my former colleagues in the Map Room, British Museum, for their help readily given in the compilation of the biographical notes. These notes, although by no means exhaustive, have entailed a considerable amount of research, and a large amount of information has been brought to light for the first time. I am also indebted to Mr. George Goode, of the Cambridge University Library, for placing at my disposal the fine collection of atlases under his charge, a collection which has been mainly formed during his long term of service in that institution.

It is hoped that the present work will enable collectors to identify any stray maps that may have been abstracted from the atlases in which they were issued.

My publishers, The Homeland Association, Ltd., have gallantly taken the risk of publication, and I feel that they, in company with the printers, Messrs. Barnicott and Pearce, of The Wessex Press, Taunton, are to be congratulated on the manner in which they have carried through a lengthy and tedious undertaking.

INTRODUCTION

THE fascination of old maps is proverbial. As long as human nature remains unchanged so long will the unknown and the mysterious continue to possess an irresistible attraction for the majority of mankind. The maps of our own day, however much their beauty of colouring and accuracy of information may please us, are almost wholly devoid of any element of mystery or romance ; the blank spaces are rapidly becoming fewer and smaller, and even the most inaccessible regions are beginning to seem less savage and remote. As Mr. John Buchan has reminded us, it will not be long before the " last secrets " are revealed, and soon even south-eastern Arabia and the heart of New Guinea and the remotest corners of Bolivia and Brazil will all be explored and mapped and measured. Thus it comes about that the maps of former days appeal to a certain side of our nature in a way that no modern map can rival.

That a love of maps is no new thing among Englishmen is clearly shown by many great writers of the past ; but in most cases the maps which have aroused their interest or fired their enthusiasm have been those which illustrate famous voyages and depict newly discovered or little known lands. There is, for example, the familiar story of Richard Hakluyt, who was first drawn to the study of geography and of voyages of discovery by seeing as a schoolboy a map of the world in his cousin's chambers in the Middle Temple ; so deep and lasting was the impression made on his mind that, as he grew up, he " waded still farther and farther in the sweet study of cosmographie," to quote his own words, and finally devoted the greater part of his life to the compilation of his " Principal Navigations." Again, to take an instance from more recent times, the maps which cast their spell upon Charles Lamb in the old South Sea House were those of comparatively remote and unfamiliar regions, " dusty maps of Mexico, dim as dreams, and soundings of the Bay of Panama."

It would seem only right and fitting that the maps of a man's own country should be those with the greatest power of attracting him. To many people however the charm of the map seems to consist almost entirely in remoteness or in mystery ; what is near at hand and familiar appears tame and dull in comparison. And yet there is a fascination of the known as well as of the unknown ; to see a familiar district depicted in unfamiliar guise is as intriguing in its way as to see the representation of an imaginary continent or of a land inhabited by basilisks and by men with the faces of dogs. There is much to stir the imagination and to inspire a love of country in the study of the maps of one's native land, and in no case is this more evident than in that of England, with its fine succession of maps and atlases extending from the middle of the sixteenth century to the present day.

The sixteenth century may be regarded as the heroic age of map-making. Apart

from manuscript maps, with which we are not here concerned, and from various editions of Ptolemy's Atlas, the maps of the fifteenth century were few in number and extremely crude in workmanship ; but after 1500 the production was rapidly increased, and maps of great interest and importance followed one another in quick succession. Thus the Contarini world map appeared in 1506, the map of Waldseemüller in 1507 and that of Ruysch in 1508. As the arts of printing and engraving became more widely known and more extensively used, and as the activities of seamen led to the constant discovery of new lands, the general interest in geography was naturally intensified, with the result that by the middle of the century a very large number of maps had been produced, and map-màking had become a flourishing industry, particularly in Italy and in the Low Countries. A cartographer was now wanted with the necessary skill and enterprise to gather together the results of all this wide-spread map-making, and as it were to codify them.

This important task was accomplished by Abraham Ortelius, who in 1570 produced at Antwerp his great work, the " Theatrum Orbis Terrarum," which is rightly regarded as a landmark in the history of cartography. This famous atlas, sometimes described, with a certain amount of justification, as the " first modern atlas," contained 53 maps, a number considerably increased in later editions, and may be taken as a summing-up of the state of geographical knowledge at the time of its publication. In spite of inevitable imperfections the work was a monument of learning and of industry, and had an enormous influence upon map-making for the next half-century, while its popularity may be judged from the fact that some twenty-five editions were issued between 1570 and 1600. Ortelius no doubt owed much to his still greater contemporary Gerard Mercator, whose big map of the world appeared in 1569, but this in no way detracts from the credit due to him for his great work as a pioneer.

If we turn now to the subject with which we are more immediately concerned, the cartography of the counties of Great Britain, we find that down to 1570 very little had been accomplished. The foundations, however, had already been laid, for even before the middle of the century John Leland, " that great preserver of our antiquities " as Gough called him, had made his antiquarian tour through England and had collected the material for his " Itinerary " ; and soon afterwards the London printer Reyner Wolfe began to gather information about the English counties for his projected, but never completed work, to be entitled " Universal History or Cosmography." It is also true that as early as 1540 a map of England and Wales, with parts of Scotland and Ireland, had appeared at Basle in Sebastian Münster's edition of Ptolemy's Atlas, and that in 1546 a much finer map of Great Britain by George Lily, an Englishman, had been produced in Rome, and had been followed by others based on this, while Mercator himself had published a map of the British Isles in 1564 ; also that plans of one or two provincial towns had already been made and in one case (that of Norwich) actually published. But there was no British Atlas, there were no county maps, and the first printed map of England by Humphrey Lluyd of Denbigh, though drawn by 1568, was not produced until 1573, when it appeared in the first supplement (" Additamentum ") to the " Theatrum " of Ortelius. It is well to draw attention to these facts for they serve to emphasize the remarkable burst of activity which was to follow.

There were various reasons, in addition to the spread of printing and the increase in navigation and discovery already mentioned, why England was at that time well prepared for this striking development in cartography. Under the strong rule of the Tudors England was beginning to feel herself as a nation as she had never done before, and was moreover enjoying a period of comparative peace and prosperity after the foreign wars of the fourteenth century and the terrible civil troubles of the fifteenth. But this was not all. The age of Elizabeth was by general consent one of the great periods of our history,—great alike in the deeds of our seamen and in the achievements of our poets. Stimulated not only by the discovery of new lands but also by the recovery of the ancient classics Englishmen were beginning to realise their great destiny, and to acquire a new outlook both on the world and on their own country. They gained a new feeling of knowledge and power and their national pride was fostered both by the voyagers and the writers ; it was the age not only of Drake and Gilbert, of Frobisher and Ralegh, but also of Shakespeare and Spenser, of Sidney and Marlowe. Now in all this national ferment of spirit men's minds were turned to their own country as well as to the world at large ; keen interest was naturally felt in all the freshly-revealed wonders of the New World, but the national temper was such that there was a general desire to know the homeland better also. The soil being in this way prepared it is therefore not surprising to find that the cartographers and geographers and antiquaries were, in their humbler and less spectacular manner, to be as active as the seamen and the poets.

During the half century after 1570 great progress was made in many branches of English topography and cartography, and it is a significant fact that the advance was not due merely to the activities of one or two enterprising individuals, but was the result of a wide-spread movement. This period saw the production of two of the most famous of English atlases, those of Saxton and Speed ; John Norden made maps of a few counties and formed the ambitious scheme, which he could not accomplish, of publishing a complete series of county histories ; Ralph Agas produced his important maps of Oxford, Cambridge and London, and William Harrison, in his " Historical Description of the Islande of Britayne," compiled a work which gives us one of the most complete pictures we possess of the England of Queen Elizabeth's day. William Camden's " Britannia " appeared in 1586, a work which had immense influence on other antiquaries and ran through many editions. Meanwhile other men were devoting themselves to the study of the history and topography of some particular county or town : Stow wrote his Survey of London, Wm. Lambarde in his " Perambulation of Kent " produced the earliest of county histories, Richard Lyne made a plan of Cambridge and John Hooker one of Exeter, Symonsen a map of Kent, while Sampson Erdeswicke collected materials for a " View of Staffordshire," published after his death, and William Smith, the herald, wrote a work on the topography of Cheshire, as well as a " Particular Description of England " with bird's eye views of several towns.

From these interesting and in some cases brilliant beginnings the course of British cartography may be traced right down to the Bartholomew and Ordnance Survey maps of the present day. It was to the task of illustrating one aspect of this development that Mr. Chubb with great courage set himself a good many years ago, and he is much to be congratulated on the fact that he has been able to carry it

through. His object has been to trace bibliographically the growth and development of British atlases during a period of three centuries—no light undertaking. When a bibliographer aims, as in this case, at completeness, he cannot at the same time discriminate, and a brief indication of some of the chief landmarks in the extensive tract of country through which Mr. Chubb takes us may therefore be not unwelcome.

In the long list of compilers of British atlases the first name is also one of the greatest, the name of Christopher Saxton. It is curious that Saxton and his work are so little known to the general public, and the fact is perhaps an indication of the small amount of attention that has been given to the study of English county cartography until within the last few years. However this may be, his fame should certainly be much greater than it is. It would be difficult to over-estimate the extent of his influence on the map-makers who succeeded him, and it may be said without exaggeration that his maps form the basis of the maps in almost all English atlases for nearly a century after the publication of his own atlas in 1579. Encouraged, and perhaps originally inspired, by his patron Thomas Seckford, or Sackford, a Master of Requests, and with special facilities for his safe-conduct from the Privy Council, Saxton spent five years (1574–79) in surveying, and drawing maps of, each county in England and Wales. His labours resulted in the fine atlas, dedicated to Queen Elizabeth, which is now one of the most desirable possessions to which the collector of English maps can aspire. If it be not too fanciful, one may perhaps compare Saxton's Atlas in this respect with the position occupied by the first folio of Shakespeare in the eyes of the English book-collector ; in each case the volume would be the chief jewel and the crowning glory of the collection. Saxton deserves credit not only for his work as a pioneer, but also because his maps are most attractive in themselves. It is of interest to find contemporary references to his work, showing how soon its value was appreciated. Already in 1577 Holinshed, in the dedication to his Chronicle, refers to " the great charges and notable enterprise of that worthie gentleman maister Thomas Sackford, in procuring the charts of the severall provinces of this realme to be set foorth " ; and in 1587 William Harrison, in his " Description of Britayne " (published with Holinshed's Chronicle), after describing the rivers of England says : " for such hath beene my helpe of maister Sackfords cardes, and conference with other men about these, that I dare pronounce them to be perfect and exact." No doubt William Harrison's idea of " exactness " in a map was somewhat different from ours, and would hardly appeal to the Director-General of the Ordnance Survey, but this fact need not lessen our admiration for one of the greatest of English cartographers.

The example of Saxton was soon followed by other map-makers. Norden and Symonsen both produced county maps before 1600 and made an important improvement by the insertion of roads ; the former apparently had the ambitious design of compiling a whole series of county histories to be accompanied in each case by a map ; but this scheme had to be abandoned for lack of funds. The later editions of Camden's " Britannia " (from 1607 onwards) contained county maps, based chiefly on Saxton and Norden, but that great work belongs rather to the domain of archæology and can hardly be considered important as an atlas. The real successor to Saxton was John Speed, whose " Theatre of the Empire of Great Britaine " was

published in 1611—a work which must also be ranked as one of the greater English atlases. Speed's reputation is deservedly high, and yet unfairly so in comparison with that of Saxton ; probably ten men know the name of Speed for every one to whom that of Saxton is familiar. Speed's " Theatre " is certainly a fine and an important work, but the maps are largely based on those of Saxton, though more place-names are given. The work of Speed was to some extent that of a populariser ; his maps contain various new features likely to render them acceptable to a large public. Small inset views or plans of county towns are added, in some cases the earliest we possess, together with coats of arms of famous noblemen ; there are also notes on the maps dealing with battles and with the general history of the country, while pictures are occasionally given of famous buildings or well-known objects of antiquity. Speed's success in making his work popular is shown in the fact that several editions were published in the course of a few years and that the maps continued to be issued in atlas form almost up to the middle of the eighteenth century.

Attention must now be turned to the Netherlands, where the next two important atlases of Great Britain were produced. Just as a century earlier the supremacy in map-making must be conceded to the Italians, so in the mid-seventeenth century it was the Dutch who were the greatest masters of the art. Profiting by the example set by Ortelius and by Mercator, the two great rival firms of Blaeu and Jansson, both of Amsterdam, produced a series of huge atlases of the world, some editions being in as many as ten or eleven volumes. In 1645 the firm of Blaeu published, as vol. IV of their " Atlas Novus," a large volume devoted entirely to the cartography of England and Wales. The maps are beautifully executed, but are derived almost entirely from those of Speed, to whom indeed acknowledgement is made in the preface : " in qua (*i.e.* Anglia) delineanda secuti sumus accuratissimas illius regni tabulas, a Ioanne Speed antehac in lucem editas." Here again, as in the case of Harrison's " exact," the epithet may seem amusing to us, but the standards of one century are not those of another, and the sentence is interesting as showing the wide reputation achieved by Speed's Atlas. A few years later in vol. V of the " Atlas Novus " Blaeu definitely broke new ground. This volume consisted of maps of Scotland and Ireland and is of special interest as forming the earliest atlas of the Scottish provinces, districts or counties. These Scottish maps were chiefly based on the surveys of Timothy Pont, which, after being corrected and completed by Robert Gordon of Straloch, were obtained by Blaeu through the good offices of Sir John Scott of Scotstarvet. Maps of parts of Ireland had already appeared in Speed's Atlas, but of Scotland only a general map had been given, though in the Dutch atlas of Hondius (1633) maps of northern and southern Scotland are included together with one of Lothian by Pont. In 1646, one year after the issue of the English volume by Blaeu, the rival firm of Jansson (successors to Mercator and Hondius) also published maps of Great Britain in the fourth volume of their big atlas, these maps being very similar both in workmanship and in material to those of Blaeu.

Before the end of the seventeenth century is reached two more names must be singled out as specially worthy of mention, those of John Ogilby and of Sir Wm. Petty. Ogilby, whose period of activity as a cartographer lasted only about ten years, beginning after the Great Fire in 1666 and ending with his death in 1676, is of

special importance for our purpose and his work may be said to mark the first big advance in English Cartography since the time of Saxton. He was appointed 'King's Cosmographer' before 1670 and was authorised by royal warrant to carry out a survey of the roads of England and Wales; this big undertaking was accomplished probably between the years 1670 and 1675. The results of his labours appeared in the latter year in the form of an imposing volume entitled "Britannia, volume the first," containing one hundred plates of road maps with two hundred pages of explanatory text. The plates do not show the whole country, but are in the form of strip-maps, showing merely the roads in sections, with the chief features near by on either side. This great work with its later editions and reductions was the source from which the later road-books derived the chief part of their information, and just as Saxton influenced the development of the county map during the seventeenth century so did Ogilby determine the course of the road-book during the greater part of the eighteenth. One feature of special importance remains to be mentioned: the adoption in Ogilby's Survey of the statute mile of 1,760 yards in place of the British mile of 2,428 yards, which had hitherto been in common use. Ogilby compiled various other maps and atlases, including an important large-scale plan of London, but it is with road-maps that his name will always be associated; as Richard Gough expressed it, writing about a century later: "Ogilby, from introducing roads into maps, made maps of little else but roads." While Ogilby was surveying the roads of England and Wales his contemporary Sir William Petty, well known in his day as a writer on political economy, was completing a great survey of Ireland on which he had been working for many years. The maps based on this survey were published as an atlas in 1683, with the title "Hiberniae Delineatio," a work which holds a place of honour in Irish cartography similar to that occupied in the cartography of Scotland by the Blaeu volume, already mentioned, containing the maps of Timothy Pont.

During the period between the Restoration and the end of the seventeenth century the business of map-producing increased rapidly and by 1700 a considerable number of makers and publishers of maps were already at work in London. Among those who come within our province as producers of British atlases there are, apart from Ogilby and Petty, no names of outstanding importance, though this does not imply that no work of any merit was produced. The sea charts of John Seller, whose "English Pilot" appeared in 1671, and of Greenvile Collins, who published his "Great Britain's Coasting Pilot" in 1693, are worthy of mention even in such a rapid survey of the subject as this; the same may be said of the series of county maps prepared by Robert Morden for the 1695 edition of Camden's "Britannia," while the names of Herman Moll, Philip Lea and John Oliver are those of men whose work was esteemed in their own day and is not to be despised in ours.

With the eighteenth century we enter upon a somewhat colourless and uneventful period in which landmarks are few, and which is marked by a certain degree of competence rather than by brilliance of conception or beauty of craftsmanship. The maps of this period, while not yet achieving real accuracy as we understand it, are no longer rich in the pictorial effects which make more primitive maps so attractive. Finely drawn ships and strange monsters emerging from the sea have given place to notes on local history and topography, and map-makers no longer venture

to " place Elephants for want of Towns," as Swift happily expressed it in a well-known line. In the bibliography of our subject, however, the eighteenth century looms large, for the makers of British maps and atlases were many and prolific. Among them may be mentioned John Senex, John Rocque, the Bowens, Thomas Kitchen, Thomas Jefferys, John Ellis, Daniel Paterson, the Armstrongs, and the family of Bowles, who published maps almost throughout the whole century. A typical atlas of the period was the " Large English Atlas," with maps by Emanuel Bowen, Kitchen and others, which was published in several editions between 1750 and 1790. The maps of the counties are clearly printed and are not unpleasing in themselves, but they are burdened with disquisitions sometimes of great length on points of local history, with descriptions of battles, particulars of trade and industry, and even rival theories about the origin of local antiquities. This gives the maps a certain quaintness in our eyes, but from the artistic point of view the effect was certainly not successful. The general standard of atlases at this period was not high ; no doubt they copied each other freely, and too little effort was made to bring their information up to date. Richard Gough, writing in 1780, says : " As to the several sets of county maps professing to be drawn from the latest observations, they are almost invariable copies of those that preceded them," and his complaint was probably justified. Even as late as 1803 it is interesting to find Sir Walter Scott complaining in a letter to his friend George Ellis of the imperfections of maps of Scotland, a country which, he says, is " most inaccurately defined."

But long before Scott wrote this letter developments were taking place which were to cause a great advance in British cartography by the early years of the nineteenth century. One of these was the offer by the newly-established Society of Arts (founded in 1754) of premiums and bounties for large-scale maps. The result was that large maps of most of the English counties on the scale of one or two inches to the mile were produced between 1750 and 1800, *e.g.* the map of Devon (1765) by Benjamin Donn, for which the Society awarded £100, and that of Northumberland (1769) by Andrew Armstrong, who received a bounty of fifty guineas. Although these large-scale maps do not, strictly speaking, belong to our subject, not forming part of any atlas, they are too interesting and important to be passed over without mention, especially as the information embodied in them naturally found its way eventually into the atlases. Mention must also be made of the great military survey of Scotland, planned soon after the battle of Culloden by Major-General David Watson, and carried out by Lieut. (afterwards Major-General) William Roy during the years 1747—1755. This survey led indirectly to another development which was to have its influence on the course of British map-making in the nineteenth century ; this was the inception of the work of the Ordnance Survey, which began its triangulation in 1784 under the superintendence of General Roy and published its first maps in 1801.

Meanwhile another map-maker of great importance in the history of British cartography had made his appearance in the person of John Cary, who was born about 1754, and who after working for some years as an engraver of maps, set up as a publisher on his own account in 1784. Henceforward for some forty years he produced maps, atlases, road-books and globes in great numbers, many of which will be found set out in detail in this volume. In his influence on the cartography

of Great Britain Cary may be ranked with Saxton and with Ogilby, and in one respect he had the advantage of them, for whereas they and almost all the early map-makers relied for their engraving largely on foreign artists (*e.g.* Hogenberg, Hondius, Hollar) Cary was himself an engraver. Among his many publications, including atlases in various sizes both of the world and of Great Britain, probably the two most famous are the " Traveller's Companion " of 1790, an attractive little volume of county maps, and the " New Itinerary " of 1798, a road-book giving elaborate details of the main and cross roads, with particulars of inns, country houses and other points of interest. Cary was appointed Surveyor of the Roads to the General Post Office, and he, like Ogilby, was officially authorised to carry out a survey of the roads throughout the country. It was on the results of this survey that his " New Itinerary " was based. The maps of Cary are usually marked by the excellence of their workmanship as well as by a standard of accuracy far in advance of that attained in England before his time; he probably deserves the high praise bestowed on him by Sir George Fordham, as being the founder of the modern English School of cartography.

There is not very much to add after reaching the nineteenth century and the period of Cary and the Ordnance Survey, for Mr. Chubb's bibliography does not extend beyond 1870, and therefore stops short before those important developments in layer colouring and the marking of contours which are specially associated with the name of Bartholomew. Mention must, however, be made of the Arrowsmiths who produced some good work in the early part of the century, and of the fine county maps of the Greenwoods, which appeared chiefly between 1820 and 1830, being issued both separately and also on a reduced scale in atlas form; the work of the Keith Johnstons in Edinburgh in the middle of the nineteenth century was also of importance. With the higher standard of accuracy there necessarily came an increase in uniformity, so that while the maps of the nineteenth century gained in reliability they lost in variety and in picturesqueness of detail.

It is only within the last few years that any serious attention has been given to the systematic study of English cartography, as distinct from topography and archæology. It is true that Gough in his " British Topography " dealt with maps as well as with other matters, but though the book is a mine of information it is too shapeless and unwieldly to be of much practical use to-day. This comparative neglect of the subject is the more surprising in view of the extent and richness of the material. Within the last few years, however, a real attempt has been made to place the study of the cartography of our country on a scientific basis. The movement may perhaps be dated from the appearance in 1907 of Sir H. George Fordham's " Hertfordshire Maps," an elaborate and scholarly catalogue of the maps of that county, which has been followed by other cartographical works by the same author, to whom all students of the subject are much indebted. In 1911 Mr. Chubb himself produced an excellent catalogue of the maps of Wiltshire, afterwards compiling similar volumes for Gloucestershire, Somerset and Norfolk (though the last-named has not yet been published). British cartography has recently been the subject of several books and of many articles in periodicals, but in every instance the writers have confined themselves to some special aspect of the subject, either to a particular county or district, or to a special period, or to the work of a particular man.

Mr. Chubb, with greater daring, has now ventured to choose a wider field of action, and in the present volume he has produced the first comprehensive survey of British atlases. His very wide knowledge of the subject has been gained during forty years of valuable service in the Map Room of the British Museum, where he had unrivalled opportunities of studying maps of every kind. In addition to full bibliographical details of the contents of atlases he has wisely given where possible biographical information about the map-makers, engravers and publishers concerned. In the compilation of this section of the work he has received most valuable assistance from Mr. J. W. Skells and Mr. H. Beharrell, both also of the Map Room of the British Museum, who have by the most careful and painstaking research brought to light from little-known sources many details of interest and importance. In thus producing what should prove not only a most useful work of reference, but also an incitement to the further study of the maps of our Homeland, Mr. Chubb has conferred a real benefit both upon the scientific student of cartography and upon the lover of old maps.

THE ATLASES OF ENGLAND AND WALES

SECTION I. 1579-1622

1.

SAXTON, CHRISTOPHER.

SAXTON 1579

[An Atlas of England and Wales by Christopher Saxton. London.] 1579. fol. $9\frac{1}{4} \times 14\frac{3}{4}$ inches.

Thirty-five coloured maps, each bearing the arms of Queen Elizabeth and Thomas Seckford, dated 1574 to 1579, drawn by C. Saxton and engraved by Augustine Ryther, Remigius Hogenberg, Cornelius Hogius, Nicolas Reynolds, Leonard Terwoort and Francis Scatter.

The engraved frontispiece is illuminated in colours and gold, the central figure is Queen Elizabeth, holding the sceptre and orb, seated upon a throne under an elaborate canopy surmounted by the Royal Arms and two cherubs holding a wreath of laurels in each hand. On the right and left of the Queen are two figures of men with globes and compasses ; at the bottom, in an elaborate cartouche, is a Latin verse of six lines dated 1579. On the right is an astronomer taking observations and on the left a cartographer using a graver in his left hand. Watermark : crossed arrows.

As shown by the watermarks there were several impressions of the first edition of Saxton's atlas, six of which are recorded here, and others may be in existence. It is impossible, definitely, to determine by this means, the order of issue, as all the marks were in use during the same period.

Mr. Edward Heawood, Librarian of the Royal Geographical Society, an authority on watermarks, is of opinion that the copies bearing the mark of the bunch of grapes in various forms were the earliest, as those are found as early as 1565. The copy with crossed arrows he places at about 1588, that being the date of Ryther's maps showing the engagements of the English and Spanish fleets which have the same mark. The copy bearing the kneeling saint with a cross was probably issued after 1600 ; that mark having been current through most of the seventeenth century. Mr. Heawood says that the paper bearing this mark is of Italian make which also suggests a date early in the seventeenth century.

The variation of watermarks in the copies of the atlas may be accounted for by the fact that the maps were sold separately, and as some counties were in greater demand than others the stocks were sold out more quickly and new impressions produced on new paper. As new sets were required they were made up from the varying impressions in stock.

Plates—

1. A coloured index of the maps arranged alphabetically and also in series, with a list of judges' circuits.
2. Eighty-three coats of arms of the nobility, and one blank shield ; also a catalogue of cities, bishoprics, market towns, castles, parishes, churches, rivers, bridges, chases, forests and parks, in each county of England and Wales.

———— **Another impression.**

The frontispiece, and plates 1 and 2 containing the index and the coat of arms, etc., are wanting.

There is a second copy of the map of England, with the inner border lines plain.

SAXTON 1579

An early impression before the degrees and minutes of latitude and longitude were added. The maps are differently arranged.

Watermark : a bunch of grapes with letter A on left and F on right of stem.

III.

——————— **Another impression.**

With a new index copied from the original but differently set up. The maps have been cut down to the border and mounted on thick paper. There are some MS. additions.

Watermark : bunch of grapes surmounted with the Fleur de lys.

IV.

——————— **Another impression.**

Wanting frontispiece and plates 1 and 2. On the back of each county map is a MS. list of the justices of the peace in the county.

In the map of Somerset the title has been erased, and the word " Sommersetshire " written in its place. Around many of the maps are MS. notes, probably by Lord Burleigh to whom this copy formerly belonged.

Interpolated in this atlas are eighteen MS. maps and plans, H. Lloyd's map of Wales, and a map of Scotland by Jo. Leslæus, Rome, 1578.

Watermark : bunch of grapes with an ornamental appendage, the letter B on left and C on right, some with arrows.

V.

——————— **Another impression.**

Plate 1 follows the county maps. The border of the general map is marked off into degrees of latitude and longitude. The bottom border of plate 21, Lincoln, has been cut off.

At the end of the volume is a map of Scotland, John Speed's map of Ireland, 1662, and the four provinces : Connaught, Leinster, Munster, and Ulster ; and, *Carte de l'Angleterre et d'une partie d'Ecosse gravee par le celebre Hollar . . . conne sous le nom de Quarter Master's Map . . . J. Rocque . . . Londres* 1752.

Watermark : the maps being mounted on paper it is difficult to identify the mark, but it appears to be the bunch of grapes with the fleur-de-lys.

VI.

——————— **Another impression.**

The frontispiece is uncoloured. Watermark : a kneeling saint with a cross.

The Shires of England and Wales described by Christopher Saxton Being the Best and Original Mapps With many Additions and Corrections viz : ye Hund.ds Roads, &c. by Philip Lea. Also the New Surveis of Ogilby, Seller, &c. Sold by Philip Lea at the Atlas and Hercules in Cheapside near Friday street and at his Shop in Westminster Hall near the Court of Common Pleas where you may have all sorts of Globes Mapps &ct. [1690]. fol.

A reprint of the 1645 edition of Saxton's atlas, with numerous additions and corrections. The plans of towns, added to many of the maps, are copied from those on the maps of the counties of England and Wales by John Speed.

The title-page is divided into three parts. The top division contains a view of eight ships, with a small boat full of people in the foreground, sailing on the open sea. In the middle of the view is a figure of "Atlas," bearing on his back a representation of the world, kneeling upon a globe.

The second division contains two figures holding up the drapery which forms the cartouche with the title. Below the title, "A Table of the Shires."

The bottom division consists of a view of the sea with Neptune and a Mermaid in the water and nine figures of naked children sitting upon two buoys, which are supported by the plinth of a panel containing the imprint.

Maps—

1. Anglia. Same as the 1645 edition with the date blotted out. "By Chr. Saxton" added below the title, and at the bottom of the cartouche "P. Lea excudit."

KEER, PETER. KEER 1599

[A Collection of 28 Maps of the Counties of England and Wales, with 5 maps of Scotland, and maps of the four Provinces of Ireland. Engraved by Peter Keer.] 1599. obl. 8°. $7\frac{1}{2} \times 5\frac{5}{8}$ inches.

The British Museum copy, which has no title-page, and wants the maps of Cornwall, Essex, Gloucestershire, Hertfordshire, Westmoreland and Cumberland, and the general map of Yorkshire, contains thirty-seven coloured maps, three of which bear the date 1599. About half of them bear the name "Petrus Kærius," and as they are uniform in size ($4\frac{3}{4} \times 3\frac{3}{8}$ inches) and character it is probable that the whole series was engraved by him. The backs of the maps are plain, but each one is followed by several sheets of MS. text, of which, in all, there are 151.

The maps in this work are uncoloured copies of Peter Keer's maps of 1599, with the addition of a map of Great Britain and Ireland, the maps of the counties of Cornwall, Essex, Gloucester, Hertford, Westmoreland and Cumberland, York, and of the Orkney Islands, which were wanting in the collection of 1599. All the maps, except those of Great Britain and Ireland, and the general map of Yorkshire, have text at the back, and bear the pagination of the book both on the plate and at the back.

Dr. Rawlinson, in his *English Topographer*, says that an edition was published at Amsterdam in 1639, but the maps in that issue are not the same as those in this copy.

The following are the maps missing in the 1599 collection.

England Wales Scotland and Ireland Described and Abridged with ye Historic Relation of things Worthy memory from a farr larger Voulume Done by John Speed. Anno Cum privilegio [1620]. And are to bee sould by Georg Humble at ye Whit horse in popeshead Alley. obl. 12o. 5 × 3$\frac{5}{8}$ inches.

Sixty-three maps, forty of which are reprints of Peter Keer's maps of 1599 issued at Amsterdam in 1617. Sixteen are newly engraved maps of some of the English counties which, in the earlier editions of 1599 and 1617, were grouped together, seven are additional maps. The new maps are of the same size and design as the earlier ones and are, probably, by the same engraver. The titles of the maps have, in every case, been put into English, otherwise the plates of the forty original maps are unaltered.

Except in the case of 8, Dorset; 56, North-West Scotland; 58, Orkney Islands; and 63, Ulster, the original maps may be identified by the scale being in Latin.

The plates are numbered consecutively 1—63, and, except Great Britain and Ireland, and Yorkshire, have English text at the back abridged from that of John Speed's "Theatre of the Empire of Great Britain, London, 1611." fol. The maps are accompanied by additional leaves of text amounting, in all, to 125 sheets.

The last entry in the table at the end of the volume is "Midia 64"; but I have failed to find any edition with that plate. The atlas is, apparently, complete without it. Unfortunately the title-page of the British Museum copy has been cropped, and the date sacrificed, but it is believed to have been 1620.

The title-page is ornamented by two armed figures. On the left, "A Dane," on the right, "A Norman" with a shield between them bearing the title. Sitting on the top of the shield are two cherubs each holding an armorial shield. Following the title-page is: A Catalogue of all the Shires, Cities, Bishoprickes, Market Townes, Castles, Parishes, etc., at the back, the beginning of Chapter I of the Text. The new maps are:

1. THE KINGDOM OF ENGLAND. The scale of miles, 90 [=$\frac{1}{1}\frac{5}{6}$ inch].
3. KENT. The scale of miles, 8 [=$\frac{3}{4}$ inch].

KEER 1627

———— Another edition, 1627.

The plates and maps are the same as in the 1620 issue. The date, 1627, is engraved at the bottom of the title-page. The text has been reset, following closely the original. The number of leaves is the same.

A copy of this edition is in the possession of Mr. J. E. Pritchard of Bristol.

XIII.

KEER 1630

———— Another edition, 1630.

A re-issue of the 1627 edition, the title still bearing that date. The text is reset in a slightly more open order, the length of the lines of type being 4$\frac{15}{16}$ inches, whereas in the former editions they were 4¾ inches.

This may possibly have been issued even later than the date assigned.

XIV.

KEER 1646

———— A reprint, 1646.

Precisely the same as the 1630 issue, wanting the title-page and the map of Yorkshire. Maps 1—27 are coloured. This is bound up with "A Prospect of the Most Famous Parts of the World. London, Printed by M. F. for William Humble, and are to be sold at his shop in Popes-head Palace, 1646." The above title is placed at the beginning of the volume; the general maps of the World, to which this title belongs, are at the end after the maps of the English counties

KEER 1662

———— Another edition, 1662.

The imprint is corrected to: "And are to be sold by Roger Rea the elder and younger, at y^{e} Golden Cross in Cornhill against y^{e} Exchange."

I have not seen this edition. It is mentioned by Sir H. G. Fordham in the Supplement of his *Hertfordshire Maps*, where he states that the only copy he has seen was

" bound up with the ' Prospectus ' (abridgment) of 1646, which has, pasted over the original dated imprint ' London, Printed by M. S. for Roger Rea the Elder & the Younger, and are to be sold at their Shop at the Signe of the Golden Crosse in Cornhill, 1662." KEER 1662

The only other copy of this edition known to me is in the possession of Mr. R. P. L. Booker of Eton College.

——————— **Another edition, 1666.** KEER 1666

The title-page has been reworked and the imprint cut out. The date is altered to 1666. The plates and maps are the same as the 1620 issue. The text has again been reset, but the number of leaves is the same. The map of Hampshire is placed between the text of Surrey with Surrey text printed at the back.

——————— **Another edition, 1676.** KEER 1676

The date, on the title-page, is altered to 1676. The plates and maps are the same as the 1620 issue. The text is again reset on the same number of leaves. The map of Hampshire is placed in its original position with its own text at the back.

There is a second title-page with this edition : " An Epitome of Mr. John Speed's Theatre of the Empire of Great Britain. And of His Prospect of the Most Famous Parts of the World . . . London, Printed for Tho. Basset at the George in Fleet street, and Ric. Chiswel at the Rose and Crown in St. Paul's Church-yard, 1676."

There is also a title-page to part 2, containing the general maps of the World, dated 1675.

CAMDEN 1637

———— Another edition, 1637.

Britain, or a chorographicall description of England . . . translated . . . by P. Holland . . . London. Printed by F. K. R. Y. and I.L. for Andrew Heb, 1637. fol.

The maps are again reprinted. The plates, generally, show signs of considerable wear, and some, notably Bedford, Flint and Northumberland, have been retouched.

The arrangement is the same as in the earlier editions. The maps are distinguishable by plate numbers, except Brecknock, Buckingham, Chester, Denbigh, Flint, Huntingdon, Ireland, Merioneth, Pembroke, Radnor, Shropshire, Scotland, Yorkshire, East and North Riding, which bear no number. England is No. 1, Cornwall No. 2, but has also a 1 in the left-hand bottom corner.

CAMDEN 1637

———— A re-issue of the maps in the 1637 edition of Holland's translation of Camden's Britannia. [By C. Browne, 1752.]

Consists of the engraved frontispiece preceded by a MS. list of the maps, and followed by a leaf containing verses on the recto and the Anglo-Saxon alphabet on the verso.

No. 18 is a copy of Christopher Brown's edition of Speed's map of Hampshire.

No. 47, Brecknock is replaced by a map engraved by Robert Vaughan, which is a close copy of Kip's map.

This collection was probably issued by Christopher Browne in the early part of the eighteenth century.

On the cover is C. Brown's autograph and the date 1752.

SPEED, JOHN.

SPEED 1611

The Theatre of the Empire of Great Britaine: presenting an exact geography of the Kingdomes of England, Scotland, Ireland, and the Isles adioyning: with The Shires, Hundreds, Cities and Shire-townes, within ye Kingdome of England, divided and described by John Speed. Imprinted at London. Anno, cum Privilegio, 1611[—1612]. And are to be solde by John Sudbury & Georg Humble, in Popes-head alley at ye signe of ye White Horse. fol. 9½ × 15 inches.

Sixty-seven maps prepared by John Speed from the surveys of John Norden, and Christopher Saxton, except the Isle of Wight, which is by William White, and the Isle of Man by Thomas Durham.

The maps were engraved, chiefly, by Jodocus Hondius. Richard Gough, in his *British Topography*, London, 1780, in speaking of the engraving of these maps, says: "Others were done by Abraham Goss, though his name is not to them." The plates bear the imprint of John Sudbury and George Humble, except those of Bedford, Bucks, Essex, the Isle of Man, Middlesex, Lancashire, Merioneth, Shropshire, Suffolk and Westmoreland, which have the imprint of G. Humble, only.

The text on the back of the maps is chiefly abridged from *Camden's Britannia*; but that of Norfolk was supplied by Sir William Spelman.

This is the first atlas with the counties divided into hundreds. The work is in four parts, being books 1—4 of Speed's *History of Great Britain*.

The First Book.

A pictorial title-page, the central figure at the top, a Briton; on the left, a Roman; on the right, a Saxon. Below the central figure, the title, on the left, a Dane; on the right, a Norman. The verso of the title-page is blank.

A list, with an ornamental border, of the kingdoms of England, Scotland, Wales, Ireland and Man. On the verso, the Royal Arms, surrounded with shields, bearing the arms of the early British kings, engraved by Jodocus Hondius. Then follow five leaves with the dedication, contents of the various parts, letters and verses in praise of Speed's work, and Speed's preface "To the Well-affected and favourable Reader." The verso of the fifth leaf is blank.

All the maps have descriptive text on the back, both recto and verso, unless otherwise stated.

———— Another edition, 1605–10. SPEED 1605-10

[A collection of Maps of the Counties of England and Wales. By John Speed.]

A series of early impressions of J. Speed's maps of the English counties. In some cases the maps were printed before the imprint, the engraver's name and the dates were added. With the exception of Kent they are all plain at the back.

Mr. Yates-Thompson possesses a set of early proofs of Speed's maps of the English counties, thirty-one of which are identical with those in the British Museum collection. Surrey is an earlier impression without imprint and with two blank cartouches. Huntingdon is a different map; it has the imprint, but part of the Ely inscription is unfinished.

Herefordshire and the Welsh counties do not appear in the set.

Maps—

1. Anglesey . . . 1608. The cartouche for the imprint is bare, Hondius' name is wanting, the shield above the scale is plain, and the sea is not shaded. The border consists of plain lines.
2. Breknoke . . . described . . . 1608. Wanting the imprint. The border has two plain lines.

Maps—

SPEED
1605-10

3. Barkshire described. Wanting the imprint.
4. Bedford Shire. With latitude and longitude, which is erased in the 1611 issue.
5. Buckingham. Wanting the date, and North, East, South and West, in the border.
6. The Countye Palatine of Chester.
7. Cambridgshire.
8. Cumberland. Wanting the imprint, the sea is without shading, and the note on the Picts Wall ends at " Battlements."
9. Caermarden . . . 1610.
10. Cardigan Shyre described with the due forme of the shire town as it was surveyed by J. S. Anno 160–. The date is unfinished, and the engraver's name and imprint are wanting. The sea is unshaded and the border without ornament.
11. Caernarvon . . . described . . . 160–. The cartouche or the imprint is bare, the date unfinished, the sea unshaded, and the border without ornament.
12. Cornwall. Wanting the engraver's name.
13. Darbieshire . . . 1610.
14. Dorsetshyre . . . Anno 1608. Without engraver's name or imprint, and the sea unshaded.
15. Devonshire.
16. The Bishoprick and Citie of Durham.
17. Denbigh Shire. Wanting the engraver's name, date and imprint, the border is unfinished, and the sea unshaded.
18. Essex . . . 1610.
19. Flint-shire. Wanting the engraver's name, the border unfinished, and the sea without shading.
20. Glamorgan Shyre . . . 1607. Wanting engraver's name and imprint, and the sea without shading.
21. Glocestershire. Wanting date and imprint. The names are wanting under the coats of arms.
22. Hereford-shire. Wanting date, and the border is without ornament.
23. Hartford Shire.
24. Huntington. Wanting engraver's name and date.
25. Hantshire. Wanting engraver's name and imprint; and the shield of Bugo, Earl of Southampton, is bare.
26. Kent. This plate has an earlier plan of Canterbury than any other edition known to me, the panel for the references for Canterbury is bare, and the view of a battle, just below Bryghtling, and the compass indicator in the top right-hand corner, are wanting. There is text on the back, but this is not set up as the other editions of Speed's atlas in the British Museum.
27. Leicester. Wanting the engraver's name, date, and imprint.
28. The Countie Pallatine of Lancaster . . . 1608. Wanting the engraver's name and imprint, and the border has plain lines only. The sea is not etched as in the 1611 issue.
29. The Countie . . . of Lyncolne. Wanting the name of the engraver, and the date.
30. Midle-sex. Wanting the date.
31. Merionethshire . . . 1608. The sea is not etched.

Maps—

40. The Countie of Radnor . . . 1608. Wanting the imprint and engraver's name. The border is without ornament.
41. Rutlandshire. The three shields in the bottom left-hand corner are bare. A single line border only.
42. Shropshyre.
43. Sussex.
44. Surrey.
45. Suffolke. Wanting the engraver's name. The shield of "Ranulfe Glanvile, Earle of Suffolk," is bare, and the sea is without shading.
46. Stafford . . . 1608.
47. Somerset Shire. Wanting date.
48. Westmorland. The cartouche on the left-hand side, and the three shields in bottom left-hand corner, are blank.
49. The Counti of Warwick. Wanting the engraver's name.
50. Worcestershire . . . 1610.
51. Wilshire. The inside border lines are marked off into degrees and minutes of latitude and longitude. The top and bottom borders are unfinished, wanting the ornamentation. The orientation is given in Latin.
52. The West Ridinge of Yorkeshyre . . . 1608. The border is without ornamentation.
53. The North and East Ridins of Yorkshire. Wanting the date.

———— Another edition, 1614. SPEED 1614

The date on the title-page is corrected to 1614. Following the title-page is a sheet containing a list of kingdoms and principalities composing "The British Empire." On the verso is: "The Achievement of our Soveraigne King James . . . With the Arms of the several kings that have aunciently raigned within his nowe Dominions. Jodocus Hondius Flander cælavit Anno Domini 1614." Following this is the dedication to King James, on the back of which is the Royal Arms. Then come four leaves with the advice to the reader, etc., ending with verses by Jo. Sanderson, the verso of the last leaf being blank.

Heading the maps is a leaf bearing an Index of the maps in the four books.

SPEED 1614

Between pages 94 and 97 is the title of "The Second Booke contayning . . . Wales," etc., with the imprint: "London Printed by Thomas Snodham, for John Sudburie and George Humble, 1616." On the verso the Royal Arms. Following is "A Catalogue of . . . Princes," etc. On the verso: "The names of the Counties in Wales," etc.

Between pages 126 and 129 is the title of "The Third Booke . . . contayning Scotland," etc. The imprint and date is the same as book 2. On the back of the title is the Royal Arms, followed by a leaf containing a list of "The Diuisions of Scotland." On the verso of which is a blank shield with the motto: "All for the best." Then comes the general map of Scotland.

Between pages 132 and 135 is the title of "The fourth Booke containing . . . Ireland . . . Imprinted at London by Thomas Snodham 1616." Verso plain, followed by a sheet with a list of the counties, on the back of which is the Royal Arms. At the end, after page 146, are five unnumbered sheets containing: "The first Index or Alphabeticall Table contayning the principall matters in the Maps," etc.

Opus, Nuper quidem à Johanne Spédo cive Londinensi, Anglicè conscriptum : Nunc verò, à Philemone Hollando, apud Coventrianos Medicinæ Doctore . . . apud Joann Sudbury et Georg Humble, 1616.

The Latin edition of Speed's atlas of Great Britain and Ireland is extremely rare, it was not until 1918 that the British Museum obtained a copy.

The title-page is the same as the first and second edition, with the Latin title substituted for the English, the date is corrected to 1616.

The verso of the title-page is plain. Then follows a list of the kingdoms, on the back of which are the Royal Arms surrounded by the arms of former kings and princes. In the bottom left-hand corner of the plate is: "Jodocus Hondius Flander cælavit Anno Domini 1614." Five leaves, B—D, follow containing the dedication, preface, and verses in praise of Speed and his work. On the back of the dedication is the Royal Arms, the backs of leaves three and five are plain. Preceding the maps is a leaf containing an alphabetical list of the plates in the four parts.

The maps are precisely the same as the 1614 issue, the pagination is also the same, except page 35 which is misprinted 36.

The signature, on the back, is the same as in the 1614 copy, and so are many of the ornamental head-lines, and tail-pieces, in the text.

The above title is printed upon a slip of paper and pasted, in the space left for the title, on the engraved title-page of vol. 4 of Blaeu's *Theatrum Orbis Terrarum sive Atlas Novus*, 1646. This serves as the title-page of the Bodleian Library copy of P. Holland's Latin translation of John Speed's *Theatre of the Empire of Great Britain*, 1616.

The engraved title-page, including the imprint and date, does not belong to Speed's *Theatre of the Empire, etc.*, which was dedicated to James I, and published in 1616.

———— **Another edition, 1627–31.** SPEED 1627-31

The Theatre of the Empire of Great Britaine . . . by John Speed . . . 1627[–31]. Are to be sold by George Humble at the White horse in Popes-head Alley.

This edition is bound up with " A Prospect of the most famous Parts of the World . . . by John Speed . . . 1631." Facing the title-page of this part is a portrait of John Speed, engraved by S. Savery.

The list of the kingdoms, etc., is reset in different type, and it has a double line border. The dedication, also, has been reset and double border lines added. On the verso of the dedication, the Royal Arms. Two leaves with Speed's address " To the . . . Reader," the verso of the last leaf being blank. Two leaves with verses in honour of the author, the last page is bare. One leaf with " The Contents of the Chorographical Part."

The text at the back of the maps is reset throughout.

The maps in part I (England) are the same as the 1611 issue, with the exception of no. 3. " The Kingdome of England. Described by C. Saxton, augmented by John Speed . . . Abraham Goos Amstelodamensis sculpsit, 1632." This replaces the map of England engraved by Jodocus Hondius.

No. 4, Kent. " Performed by John Speede : and are to be sold by G. Humble in popes head Alley." This imprint has been added in the middle, at the bottom of the plate.

No. 17, Norfolk. " R. Elstrack sculpsit " has been engraved in the right-hand bottom corner and the sea shaded.

The Second Booke : containing, the Principalitie of Wales . . . Performed by John Speed. London, printed by John Dawson, for George Humble, 1631.

The title-page has a double line border with an ornamental band across the top.

SPEED 1627-31

At back of title, the Royal Arms as in the 1611 issue. The maps in Part II are the same as the 1611 edition.

The Third Booke : containing . . . Scotland . . . By John Speed. London, printed by John Dawson, for George Humble, 1631.

The title-page has a double line border, with ornamental band at the top. At back of title, the Royal Arms. On the verso of the sheet with " The divisions of Scotland," coat of arms surmounted by a helmet and crest. This is, perhaps, a printer's device.

The map of Scotland is a reprint of the 1611 copy.

The Fourth Booke : containing . . . Ireland . . . by John Speed. London, printed by John Dawson, for George Humble, 1631.

The maps in part IV are reprints of the 1611 copies. The first Index or alphabetical table, etc., in five leaves.

XXVI.

SPEED 1650-62

———— Another edition, 1650–62.

Theatre of the Empire of Great Britaine . . . by John Speed. Imprinted at London . . . 1650. Are to be sold by Roger Rea the Elder, and younger, at the Golden Crosse in Cornhill agat ye Exchange, 1650–62. fol.

The ornamental band at the top of " The British Empire," etc., and following pages, is new. There is a circular space in the middle of the band instead of a shield. The dedication is wanting.

The text throughout is reset in smaller type. The author's address " To the . . . Reader," and the verses in praise of Speed's work, each occupy one sheet.

" The Invasions of England and Ireland with al their Civill Wars since the Conquest. Corñ. Danckertsz sculpsit," with a sheet of text, is now placed before the map of Great Britain. In the 1627 edition it was placed at the end of the maps of the World.

The maps in part I (England) are the same as the 1627 edition, with the following corrections : the imprint of Roger Rea (as given in the title) is substituted for that of J. Sudbury and G. Humble.

Maps—

England, date corrected to 1646.
Dorsetshire, date corrected to 1662.
Cornwall, 1662 added below the imprint.

On the verso of the title the Royal Arms are replaced by " A Catalogue of . . . Princes," etc. " The names of the counties in Wales," which was on the back of the Catalogue of Princes, in the 1631 edition, is wanting.

The maps in Book II are the same as those of 1631, with the imprint of Roger Rea substituted for that of J. Sudbury and G. Humble. The privileges and dates are erased from the maps of Wales, Carnarvon, Cardigan, Denbigh, Montgomery, Monmouth, and Pembroke. In Anglesey, the privilege is erased; and the engraver's name, date and privilege are erased from Flintshire. 1662 is added to Monmouthshire.

The Third Booke : containing Scotland . . . by John Speed. London, Printed by M. and S. Simmons, and are to be Sold by Roger Rea the Elder and Roger Rea the Younger . . . 1662.

On the verso of the title : " The Divisions of Scotland " takes the place of the Royal Arms.

The map of Scotland is the same as the 1627–31 issue with Roger Rea's imprint substituted for that of J. Sudbury and G. Humble, and the privilege and date (1610) erased.

The Fourth Booke : containing . . . Ireland . . . by John Speed. London, Printed by M. and S. Simmons, and are to be Sold by Roger Rea the Elder and Roger Rea the Younger . . . 1662.

On the verso of the title : " The Particular Counties in the four . . . Provinces of Ireland."

The maps of Ireland are the same as those of 1631, with Roger Rea's imprint substituted for that of J. Sudbury and G. Humble.

Maps—

IRELAND is dated 1662.
MUNSTER, " Anno Domini 1610 " is erased.
LEINSTER, " Cum Privilegio " is erased.
ULSTER, " Cum Privilegio, An. 1610 " is erased.
An Index, in five sheets, follows the maps of Ireland.

SPEED 1676

The engraved title-page is re-engraved by R. White, with considerable modifications. The greater part of the original decoration is left out.

Facing the title-page is a plate, which in the 1627 edition was on the verso of the list of kingdoms, etc., but with the arms of Charles II replacing those of James I.

The verso of each title-page is blank. Following the title-pages are :

1.—The dedication to the Lord Mayor of London, by E. Phillips, on the verso of which is the leave to print, dated 1675, and signed " Roger L'Estrange."

2.—The original dedication to King James, on the verso : " The British Empire . . . described in this our Theatre."

3.—The address to the reader, in two leaves ; the verso of the last is blank.

4.—Two leaves, with verses in praise of Speed's work ; the verso of the last is blank.

5.—" The Contents of the Chorographical Part," on one leaf.

The text throughout is reset. The initials of the text at the back of the maps are newly designed.

The maps in Book I are the same as those in the 1650–62 edition with the following exceptions :

The imprints are corrected to : " Sold by Thomas Bassett in Fleetstreet, and by Richard Chiswell in St. Pauls Church yard."

Great Britain and Ireland : " by I. Speed " added in the title.

Maps—

Sussex. 1610 at the bottom of the map is made 1666. The plate is much worn.

Devonshire. The arms of " Wil. Cavendish E. of Devon " are added just above the scale.

Cornwall. The imprint and date are removed from the cartouche and replaced by the arms of " Hen : eldest Son of King James."

Somerset. " by I. S." added at end of title, and the arms added to the shield of " Phillip Chandew, Earle of Bath." The arms of " John Greenvil, E. of Bath " added above the imprint.

Essex. In left-hand bottom corner is added the arms of " Arthur Capel E."

Berkshire. The arms of " Fran. Norcys, E. of Barks " and " Tho. Howard, E. of Barks " are added.

Suffolk. The arms of " John Holles, E. of Clare," are added.

Norfolk. Re-engraved by I. Goddard.

Cambridge. " Anno 1662 " is imperfectly erased, and above the two figures in the bottom left-hand corner, the arms of " Iames D. Hamilton, E. of Cambridg," and " Cha. Stuart D. Y." are added, and in the bottom right-hand corner, the arms of " Sussex & Sidny Coll. 1596 " are added to the blank shield.

Buckingham. 1666 is added, after Anno, in bottom left-hand corner.

Oxford. On the left of the imprint, the arms of " Wadham Col. 1613 " are added.

Gloucester. One of the two blank shields, in the earlier editions, is filled in with the arms of " Henry Stuart D. of Glocester."

Hereford. Above the scale are added the arms of " Walter D'Eureux, Visc. Hereford."

Warwick. 1662 is erased, and the arms of " Rob. Rich E." added.

Northampton. Immediately above the scale are added the arms of " Wil : Compton E."

Leicester. To the right of the scale are added the arms of " Rob. Sidney E. of Leicester."

Derby. 1610 is made 1666.

SPEED 1676

———— Another edition, 1676.

A collection of sixty-five maps, without title or text, of Great Britain and Ireland published by Thomas Bassett and Richard Chiswell ; together with a map of Scotland by J. Blaeu, Scotland and Ireland by J. Speed, sold by J. Sudbury and G. Humble ; and four maps published by T. Bassett and R. Chiswell : (1) A Map of New England, etc. (2) A Map of Virginia, etc. (3) A Map of the Sommer Islands. (4) A Map of Jamaica [and] Barbadoes.

The sixty-five maps of Great Britain and Ireland are coloured copies of Bassett and Chiswell's edition of J. Speed's atlas, issued in 1676.

The backs of the maps are plain, they were probably printed for separate publication as soon as Bassett and Chiswell had acquired the plates, and before the issue of their atlas of 1676.

A Collection of the County Mapps of the Kingdome of England and Principality of Wales. By John Seller, [London, 1680]. fol.

A miscellaneous collection of fifty-seven maps of Great Britain and Ireland including thirty-nine from John Speed's atlas of England and Wales. The maps are without text.

The following thirty-one maps bear the imprint of Thomas Bassett and Richard Chiswell, and are reprints from their edition of Speed's atlas : Anglesey, Bedford, Brecknock, Cambridge, Caermarthen, Caernarvon, Cardigan, Cornwall, Cumberland, Denbigh, Derby, Devon, Durham, Glamorgan, Gloucester, Hereford, Huntingdon, Kent, Lincoln, Merioneth, Monmouth, Montgomery, Northumberland, Pembroke, Radnor, Rutland, Shropshire, Sussex, Suffolk, Wiltshire, and Yorkshire. Chester, Flint, Norfolk, Somerset, Stafford, Warwick, and Westmorland bear the imprint of Roger Rea.

SPEED 1710

———— Another edition, 1710.

This collection, recently acquired by the British Museum, is without a title ; but at the beginning of the volume is : " A Catalogue of a Set of Maps of the several Counties

of England and Wales with the Islands thereto belonging, each Map is printed on a sheet of good Royal Paper . . . Printed and sold by Henry Overton at the White Horse without Newgate, London. Sold either in compleat sets or singly." [1710]. SPEED 1710

Most of the maps bear the imprint of Bassett and Chiswell: but those of Dorset, Durham, Cumberland, Lancashire, Northumberland and Westmoreland have Overton's imprint instead of or in addition to that of Bassett and Chiswell. Cornwall, Devonshire, Somersetshire and Yorkshire have the imprint of Christopher Browne.

This is probably the first issue of Speed's maps by H. Overton.

The title-page is wanting in the British Museum copy, but the table of contents bears the following title and imprint:

A Sett of the Counties of England and Wales, with their Islands, containing Fifty Eight Maps; each on a Sheet of Royal Paper. By John Speed. Reprinted in the Year, 1743. With additions. Sold either in Compleat Setts, Bound or Single, either Coloured or Plain, by Henry Overton, at the White-Horse, without Newgate, London, etc. fol.

These maps are reprints of Bassett and Chiswell's edition of J. Speed's atlas 1676, corrected as follows:

The main roads are engraved on all the plates. On most of the maps Bassett and Chiswell's imprint is replaced by: "Henry Overton at the White Horse without Newgate, London."

The county maps are coloured in hundreds and are plain at the back.

Maps

SUSSEX. Still retains Bassett and Chiswell's imprint. The date (1666) is imperfectly erased, and H. Overton's imprint is added.

SURREY. The date (1610) is erased.

HAMPSHIRE. Bassett and Chiswell's imprint is replaced by "Corrected and sold by Christopher Brown, at the Globe near the West end of S. Paul's Church, London." Overton's imprint is added below.

WILTSHIRE. The date (1610) is imperfectly erased.

CORNWALL. "Printed and sold by Christopher Brown at the Globe near the west end of S. Paul's Church, London." This imprint which took the place of that of Bassett and Chiswell is now scratched out, and the imprint of H. Overton added below.

HERTFORD. Bassett and Chiswell's imprint is scratched through, and H. Overton's added in the bottom right-hand corner.

OXFORD. The date (1605) is imperfectly erased.

BUCKINGHAM. "Anno 1666" is erased.

BERKSHIRE. Following Bassett and Chiswell's imprint is: "Now Sold by Henry Overton at the White Horse without Newgate, London."

RUTLAND. "Now Sold by Henry Overton," etc., is added.

NORTHAMPTON. The date (1610) is erased, Bassett and Chiswell's imprint is scratched through, and that of Overton added.

HUNTINGDON. Speed's name is erased and Overton's imprint takes its place. Bassett and Chiswell's imprint is erased and the panel remains bare. The date (1662) is made 1738.

BEDFORD. "Anno Domini 1610" is erased.

WARWICK. The date (1610) is erased, and the date (1469) at end of note in bottom right-hand corner, is also rubbed out; but this is probably a mistake. Bassett and Chiswell's imprint remains, and Overton's is added above the scale.

WORCESTER. The date (1610) is imperfectly erased.

LINCOLN. The date (1610) is imperfectly erased.

DERBY. "Now Sold by Henry Overton," etc., is added above the panel bearing the imprint of Bassett and Chiswell.

YORKSHIRE. "Corrected and sold by Christopher Brown at the Globe near the Westend of S. Pauls Church London," takes the place of Bassett and Chiswell's imprint, "And Now Sold by Henry Overton at the White Horse without Newgate London" is added on the right.

NORTH AND EAST RIDING OF YORK. Below Bassett and Chiswell's imprint is added, "And Now Sold by Henry Overton," etc.

WEST RIDING OF YORK. The date (1610) is erased. "And Now Sold by Henry Overton," etc., is added to the right of the panel with Bassett and Chiswell's imprint.

LANCASTER. The date (1610) at the end of the title is erased. "Sold by Henry Overton," etc., is added below the title. Overton's imprint also takes the place of that of Bassett and Chiswell. In the bottom right-hand corner four hills are added to obliterate "Anno Domini 1610."

DURHAM. Overton's imprint is added below the scroll, at the top; it also takes the place of that of Bassett and Chiswell, at the bottom.

WESTMORLAND. Overton's imprint is added in the cartouche below the title. The panel, below the scale, is bare.

NORTHUMBERLAND. Overton's imprint is added in the bottom right-hand corner.

MERIONETH. Bassett and Chiswell's imprint is scratched out, and Overton's added below the cartouche.

MONTGOMERY. The date of the creation of the Earl of Montgomery (1605) is almost obliterated. The erasure of this date is probably an error.

CARDIGAN. The date (1610) is erased.

RADNOR. The date (1608 afterwards corrected to 1610) is erased.

BRECKNOCK. The date (1610) is erased.

The English Atlas, or a Complete Set of Maps of all the Counties in England and Wales. [C. Dicey & Co., in Aldermary Church Yard ; London, 1770.] fol. $11\frac{1}{2} \times 17\frac{1}{4}$ inches.

Contains forty-seven reprints of maps of the counties of England and Wales, from Henry Overton's edition of Speed's *Theatre of the Empire of Great Britaine, etc.*, 1743 ; five maps copied from Jansson's maps, four of which bear the inscription : " Sutton Nicholls sculp " ; one by H. Overton ; one by J. Overton, and two road maps of England.

With the exception of Denbighshire, Herefordshire, Monmouthshire and the Isle of Man the imprint of C. Dicey and Co. takes the place of that of Overton.

Cornwall, Warwickshire and Worcestershire are not included.

The title-page, occupying the top part of a folio page, is in manuscript ; the bottom part being devoted to a " Catalogue " of the maps.

The second map is dated 1770, which is probably the date of the atlas.

The title-page and maps are plain on the back.

Apparently there were two firms bearing the name of Dicey : C. Dicey and Co. in Aldermary Church Yard ; and W. Dicey in Bow Church Yard.

CAMDEN, WILLIAM.

CAMDEN 1626

The abridgment of Camden's Britañia. With The Maps of the seuvrall Shires of England and Wales. Printed by John Bill Printer to the King's most excellent Maiestie, 1626. $5\frac{3}{4} \times 6\frac{7}{8}$ inches.

A map of England and fifty-one maps of the counties of England and Wales. The maps are very similar to those of Peter Keer, 1599. The map of England is placed at the beginning of the general description of the country, and on the back is the end of the note on geography. The county maps have on the backs the description of the county following, except in the case of Oxfordshire which has its own text on the back. The text of Dorsetshire, on the back of the map of Devonshire, is printed upside down. In order that the text may be read properly the map of Devonshire is placed the wrong way up.

The maps are on the recto and the text on the verso of each sheet so that in opening the book the student has both the map and its text before him.

The map of Flintshire has no text at back and is placed, facing its own text, at the end after " Finis."

The title-page is ornamented with two figures: on the left, " Euclide "; on the right, " Ptolemie." Between the figures is the title on a sheet fixed with nails at each corner to a plinth. Standing upon the plinth, a celestial globe with a cherub on each side. Standing at the foot, a terrestial globe, and along the bottom, the imprint. The back is plain.

Dedication to the King, two sheets, the verso of the second is plain.

" To the Reader." One sheet.

" A Delineation of the universall Notions of Geographie." Five sheets with " A Tipe of England." A scale of miles, 60 [$=\frac{5}{8}$ inch].

Four sheets containing: Description of England, A Table of the Spanish Armada, Special Notes, Religious Houses, The Province of Canterbury, and a list of the Counties. The verso of the last leaf is plain.

A second title: " The Maps and Descriptions of the severall shires of England and Wales." On the back, text for Cornwall.

Maps—

1. Cornwall. Scale, 10 miles [$=\frac{7}{8}$ inch].
2. Devon Shire. A scale of miles, 10 [$=\frac{5}{8}$ inch].

A Direction for the English Traviller. By which he Shal be inabled to Coast about all England and Wales. And also to know how farre any Market or noteable Towne in any Shire lyeth one from an other, and Whether the same be East, West, North, or South from ye Shire Towne As also the distance betweene London and any other Shire or great towne : with the scituation thereof East, West, North, or South from London. By the help also of this worke one may know (in What Parish, Village, or Mansion house soeuer he be in) What Shires, he is to passe thorough & which way he is to trauell, till he come to his Journies End. Infælix cuius nulli Sapientia prodest. Are to be Sold by Mathew Simons at the golden Lion in Ducke laine, Aº 1635. Jacob van Langeren sculp. Sm. 4º. $4\frac{1}{4} \times 4\frac{3}{8}$ inches.

A small quarto book consisting of a frontispiece (bound out of place in the British Museum copy), a preface of one leaf " To the gentle Reader," two pages of text, and thirty-nine plates numbered 1 to 40 (including the title-page and text). All are plain on the back. No. 15, Essex, is missing from the British Museum copy. The map of Rutland is combined with Leicestershire. There is no map of Yorkshire, and Wales also is entirely unrepresented.

The frontispiece consists of a circular map of England $3\frac{3}{8}$ inches in diameter. Around the border of which runs the inscription " Angliæ descriptio in Qua comitatuum et Præcipuarum civitatum Locus et Paroeciarum numerus oculis inspiciendus Exhibetur." On the face of the map are the Royal Arms, the scale of 40 miles, and " H. W. Exc. W. Kip scul."

All the county maps are of the size known as " Thumb-nail " maps, being drawn on a scale of 10 miles=$\frac{1}{4}$ inch. They fill a square of about $1\frac{1}{4}$ inches in the bottom right-hand corner of each plate. Rather more than a half of each plate is occupied by names of towns and villages arranged along the top and down the left-hand side, and, in the triangle thus formed, a table of distances. The rivers constitute the chief feature of the maps, which are otherwise of no practical value to the traveller, being mere outlines. The points of the compass are indicated by lines radiating from the borders of the maps.

XLV.

———— Another edition, 1636. SIMONS 1636

The date on the title-page altered to 1636. The preface : " To the gentle Reader ". is wanting. This copy has No. 15, Essex, and a map of Yorkshire.

The maps and tables are the same as in the 1635 edition.

XLVI.

SIMONS 1643

———— Another edition, 1643.

Imprint altered to : " Are to be sold by Thomas Jenner at the South entrance of the Exchange 1643." The map of Worcestershire is wanting and the circular map of England is replaced by a map of England, similar to the county maps, and with a triangular table of distances, bearing the title : " A Card, or platt, of all the shire townes in England, shewinge how farre they are distant one from another, & how scituate frō London," etc.

Plates added in this edition : " A Table shewing the distances of the most of the chiefe Townes in Wales." This map is drawn in the same way as the County maps. It occupies the S.E. angle of the plate the other part being filled in with a table of distances. A table giving " The high Wayes, and Rodes, from any Shire Towne to London."

All the original County maps have been erased, and entirely new maps, drawn on double the scale (10 miles=$\frac{1}{2}$ inch), engraved in their places. Except Essex, where the detail of the new map overlaps the table of figures, an additional line of figures is added to the bases of the triangular tables. The new maps have more detail, and give the towns in the surrounding counties. They occupy the whole of the S.E. angles of the plates.

Bound up with this edition is : " A Brief Director for Those That would send their Letters to any parts of England, Scotland, or Ireland," etc., and also : " A New Map of the Kingdome of England and Principality of Wales, taken out of J. S. Printed and are to be Sold by John Ouerton neere St. Pulchers Church, 1673."

XLVII.

SIMONS 1645

———— Another edition, 1645.

The original imprint is erased and the following substituted : " Printed and are to be sold By John Garrett, at the south Entrance of y^e^ Royall Exchange in Cornhill, where you may have a most exact Mapp of England with the small Townes described in six large Sheets, also other large Mapps of y^e^ World or any part thereof." No date.

Van Langeren's name and the date 1643 are imperfectly erased.

The plates are unaltered impressions of the 1643 edition. With an additional plate : " The high Wayes and Roads, from any Shire Towne to London," etc.

Copies of this issue are in the possession of the Bodleian Library, Sir H. G. Fordham, and Mr. E. Almack.

XLVIII.

SIMONS 1650

———— Another edition, 1650.

Added below the imprint of the 1645 issue is : " Where is also sold a Book of y^e^ names of all Parishes Market Towns, Villages, Hamletts, & smallest Places in England Alphabetically sett down, as they bee in every shire." No date.

The plates are precisely the same as the 1645 edition.

XLIX.

SIMONS 1657

———— Another edition, 1657.

A Book of The Names of All Parishes, Market Towns, Villages, Hamlets, and smallest Places, In England and Wales. Alphabetically set down, as they be in every Shire.

With the Names of the Hundreds in which they are, and how many Towns there are in every Hundred . . . A Work very necessary For Traveilers, Quartermasters, Gatherers of Breefs, Strangers, Carriers, and Messengers with Letters, and all others that know the name of the place, but can neither tell where it is, nor how to goe unto it. If you would find out any Shire, note that the Shires lie Alphabetically, beginning with Barkshire, and so following accordingly. Summa cuique virtus pulcherima merces. London : Printed by M. S. for Tho: Jenner, at the South-entrance of the Royall Exchange, 1657. 8vo. $4\frac{1}{4} \times 6\frac{5}{8}$ inches. SIMONS 1657

A reprint of the 1643 edition with an additional title as given above. The original title-page, dated 1643, has text on the back with the following heading : " The use of all the insuing Tables." The new title-page has a plain double lined border, with two lines enclosing the Latin quotation : it is plain at the back. The two original plates of text are not given.

The plates and maps are the same as the 1643 edition, but the county maps are printed at the top, on paper which is two inches longer than that of the earlier editions. The additional space below the maps is filled with lists of the hundreds, in three columns, which are continued on the back of the maps, and in some instances on additional leaves.

The names of the counties and pagination are added above the plates, except Berkshire where " Bark-Shire " is placed below the plate, and the page not given. On the plates of Staffordshire and Wiltshire the names and pagination are printed within the plate mark, across the list of names.

The pagination runs from 6 to 197 not including the maps of England, Wales and Yorkshire and the Table of Roads. The two title-pages and Berkshire form pages 1 to 5. Numbers 100 and 104 are omitted.

L.

———— Another edition, 1662. SIMONS 1662

The word " pulcherima " on the title-page of the 1657 edition is corrected to " pulcherrima," and the date made 1662. The original title-page of 1643 is not given, the page which it occupied in the 1657 edition being blank. Berkshire is numbered 5, and " Bark-Shire " added above the plate. Except for the above alterations this edition is identical with that of 1657.

Facing the title is a leaf of MS. notes on " The Measures of Differing Nations," etc. At the end of the volume are two leaves, on the first : " England and Wales. The length & breadth of every shire," etc., and " The chiefest commodities every Shire in England and Wales is enriched withall." On the second : A catalogue of " Books Printed and sold by Thomas Jenner, at the South Entrance of the Royal Exchange, London." Following this is a MS. table, in two sheets, with the following inscription : " A Short Description of the severall Counties of England."

LI.

———— Another edition, 1668. SIMONS 1668

The map of Berkshire is a copy of the 1657 edition not having the name and number above the plate. Page 43 is printed " 34." Page 54 is numbered 55 and *vice versa*. Pages 58 and 59 are wrongly numbered 64 and 65, the map of Gloucestershire being numbered 65 whereas it ought to be 59. Number 70 is duplicated there being no 71. Page 104 is omitted. The name " Kent " is printed above the map of Lancashire.

LII.

SIMONS 1677

———— **Another edition, 1677.**

A Book of the Names of all Parishes, Market Towns, Villages, Hamblets, and Smallest Places, in England and Wales . . . Together with a Catalogue of the Market Towns, Castles, Parish Churches, Rivers, Forrests and Parks ; and also the Length, Breadth and Circumference of every particular Shire . . . London, Printed by S. S. for John Garret, at his Shop as you go up the Stairs of the Royal Exchange in Cornhil : where is also sold all sorts of large and small Maps of the World, or any particular part thereof, with variety of Prospect Cities, 1677. 8o.

The title-page is reset with an additional paragraph added and a new imprint as given above. The inner line of the border is removed, and " Pulcherima " is again spelt with one r. The catalogue mentioned in the title is on the recto of a leaf which is plain at the back and placed immediately after the title. The maps and tables are reprints of the 1668 edition and all its errors of pagination are repeated. The maps of England, and Wales, and the table of highways and roads are wanting.

Guil. et Joannis Blaeu. Theatrum Orbis Terrarum sive Atlas Novus. Pars Quarta. Amsterdami, Apud Johannem Blaeu. 1645. fol. $13\frac{1}{2} \times 21$ inches.

A very fine atlas of the English counties compiled, mainly, from the maps of John Speed. It contains a highly decorated title-page, plain at the back, three leaves of

BLAEU
1645

dedication, 460 pages of Latin text, taken from Camden's *Britannia*, and fifty-eight double-page maps of the counties of England and Wales each with two numbered pages of text at the back.

The map of the Isle of Man, on a half sheet, takes the place of page 445, but it is not numbered. On page 145 is a view of Stonehenge, on page 206 is a similar view of a circle of stones in Oxfordshire, and at page 239, a view of two underground Roman baths.

In only a few cases does Blaeu's name appear on the maps, and no imprints are given.

The title-page represents a stone structure of two stories, standing upon which are the Royal Arms with supporters. Placed in recesses are four figures, with arms above. In the upper part, on the left, a Roman; on the right, a Saxon; in the middle, "Britannus." In the lower part, on the left, a Dane; on the right, a Norman, and between them, the title. Below the title in an ornamental cartouche, the imprint.

Following the title-page are three sheets. On the recto of the first is Blaeu's preface, dated September, 1645, on the verso is the beginning of Camden's preface. On the back of sheet three are some verses.

At the end is: "Index Tabularum."

A Spanish edition of *Geographiæ Blavianæ* issued in 1672. Vol. 5 has the original title-page with the Spanish title pasted on it, and still bears the Latin imprint of 1662.

The maps, or most of them, are those of the French edition of 1667, and still have the French text at the back with the Spanish text pasted over it. This is accounted for by the fact that the plates were destroyed in the fire which took place in Blaeu's establishment on February 22nd, 1672, at the time this edition was in preparation. Maps already printed off for the French edition were used to complete this edition, which is exceedingly rare. BLAEU 1672

Following the title-page are four sheets with Camden's preface. There are 447 pages of text, including the maps.

On page 132 is a view of Stonehenge, page 186 a view of a circle of stones in Oxfordshire, page 216 view of two Roman Baths, in Essex.

Page 77 is printed 65, p. 312 is unnumbered and plain, p. 433 is occupied by the map of the Isle of Man. At the end : " Indice de todas las Cartas de Inglaterra."

JANSSONIUS, JOANNES. JANSSONIUS 1646

Joannis Janssonii Novus Atlas, sive Theatrum Orbis Terrarum : In quo Magna Britannia, seu Angliæ & Scotiæ nec non Hiberniæ, Regna exhibentur. Tomus Quartus. Amstelodami. Apud Joannem Janssonium. Anno CIↃIↃCXLVI. (1646.) fol. $9\frac{1}{2} \times 16\frac{1}{4}$ inches.

Vol. 4 of Jansson's atlas of the World in four volumes, the first, second and third of which are dated 1647. It consists of 58 coloured maps, beautifully engraved, and ornamented with cartouches, bearing the titles and scales, supported by symbolical figures. The maps of the Counties of England and Wales are further embellished by the Royal Arms, and arms of the nobility and county families. Most of the maps bear Jansson's imprint.

Part I, England and Wales, contains an illuminated title-page, three sheets of

JANSSONIUS 1646

preface, and 364 pages of text (taken from Camden's *Britannia*), including 48 double-page maps, each of which has two numbered pages of text at the back.

Part II, Scotland and Ireland, contains 50 pages including eight maps.

There are some errors in the pagination. Page 199 is printed 196, 210 is without a number, 236 is 136, and 270 is printed 170.

Part II. Page 3 is printed 5, 29 is printed by hand and very badly done ; it looks like 27, 30 is printed 36.

The title-page, which is profusely decorated, consists of a plinth supported by two columns, giving it the appearance of being in two divisions. On the plinth, in the upper portion of the plate, is the title, and, in a façade, at the top of the plinth, the Royal Arms with supporters. In top left-hand corner, are two cherubs supporting a shield on which is depicted a bird. In top right-hand corner are other cherubs holding a shield bearing a white horse. On the left of the title, a figure of a Roman, and, on the right, a figure of a Saxon.

In the lower portion, between the supporting columns, the figure of " Britannus " holding, in the right-hand, a shield, on which is a lion, and, in the left, a spear. On the left-hand side of the plate a figure of a Dane. On the right, a figure of a Norman. At the bottom, a cartouche, supported by two cherubs, bearing the imprint. The back is plain. Following the title-page are three leaves : the first with Jansson's preface, dated 1646, the second and third with that of William Camden, and on the back of the third, a poem.

Le Nouvel Atlas ou Theatre du Monde Auquel est representé la Grande Bretagne, Contenant les Royaumes d'Angleterre, d'Escosse et d'Irelande. Par Jean Jansson. Tome Quartieme. 1646. fol.

The above edition is mentioned by Sir H. G. Fordham in his *Hertfordshire Maps*.

LXXII.

———— Another edition, 1647. JANSSONIUS 1647

French edition of Jansson's Novus Atlas. Vol. 1 is wanting in the British Museum copy. Vols. 2 and 3 are not dated, vol. 4 is dated 1647, vol. 5, 1657, and vol. 6, 1658.

The title-page of vol. 4 still bears the Latin title and is an uncoloured impression of the Latin edition of 1646 with the date corrected to 1647.

Following the title-page are three sheets containing the preface of Camden and of Jansson, that of Jansson being dated 1646. The maps are uncoloured impressions of the original issue, with French text at the back.

The pagination is somewhat irregular:

Part I. 1—380. Pages 63, 64, 65, and 66, are printed 73, 74, 75, and 76 respectively; 235 and 236 are printed 233 and 234; 270 as 268, 335 is very much blurred, but it appears to be 339; 369—374 are omitted.

Part II. Pages 1—46. There is no index. This is, probably, the same as the above French edition, but wanting the French title.

This is a splendid edition, with the maps, which are precisely the same as the 1646 issue, illuminated in colours and gold, and with German text at the back. The title-

JANSSONIUS 1647

page is also the same with the new German title pasted over the original, and the date corrected. Following the title-page: "Register und Ordnung der Landtaffelm im Fůnfften Theil. Nemlich von Gross=Britannien," etc., and three sheets containing the preface of Camden and of Jansson, that of Jansson being dated 1647. Inserted in part one are two maps by F. de Wit: a map of Great Britain and Ireland placed before page 1, and a map of England at page 105.

The pagination, 1—452, has the following misprints: page 128 is printed 28; 135 is 137; 138 is 134, and 139 is 193.

Part II. Pagination 1—54. Page 45 is printed 54. Inserted at the beginning is a map of Scotland and six maps of parts of Scotland, and at the end, a map of Ireland.

The inserted maps are:

Maps—

Novus Atlas Das ist: Welt-Beschreibung mit schönen neuen Geographischen Figuren. Inhaltende Gross-Britannien und Ireland. Vierter Theil. Amstelodami Apud Joannem Janssonium Anno 1649. fol.

The above German title is pasted upon the engraved title-page issued with vol. 2 (France) of the original edition, dated 1647. The figure 7 in the date is altered into 9. This title-page is composed of a platform upon which are standing two figures: On the left, a warrior; on the right, a crowned woman holding under her left arm a shield bearing three frogs, and in her right-hand a bunch of lilies. Behind the figures are two double columns supporting a cornice upon which are two cherubs holding the arms of Louis XIV, and on the pedestal, the imprint.

The maps are precisely the same as in the original issue.

Pagination: Part I. 1—452. Pages 53, 54, 55, 56, 57, 58, 59 and 60 are missing; 135 is printed 137, and 138 is printed 134. Part II. 1—62, and Index of Maps.

Nouvel Atlas, ou Theatre du Monde, Comprenant Les Tables et Descriptions de toutes les Regions du Monde Universel.

The title bears the Latin imprint, and is dated in tome 1, 1656.

The title-page of vol. 4 is an uncoloured impression of the 1646 issue, still bearing the Latin title, but dated 1652.

Part I, of vol. 4, has 64 uncoloured maps of the British Isles, 48 of which are probably copies of the original issue.

Part II bears the title : Escosse qui est le XII livre de L'Europe. Amstelædami Apud Joannem Blaeu 1662. This second portion is from the French edition of J. Blaeu's atlas published in 1662.

Sir H. G. Fordham, in his *Hertfordshire Maps*, states that some of the maps in part I are also by Blaeu.

This edition, a copy of which is in the University Library, Cambridge, contains no text, the backs of the maps being plain. The British Museum possesses a copy of vol. 5 only.

JANSSONIUS 1683

———— Another edition, 1683.

It is probable that Peter Schenk, having obtained the business of Jan Jansson, re-published his atlas including the maps of the English counties.

Strutt, in his *Biographical Dictionary of Engravers, London*, 1785, vol. 2, p. 373, under the heading Gerard Valk, says: "He worked sometime for David Loggan; and also assisted Peter Schenck in publishing the large Dutch Atlas, in two volumes folio, 1683." I have never seen, or heard of the existence, of a copy of this atlas. There are, however, in the British Museum, separate copies of Jansson's maps of most of the English counties, with the imprint of P. Schenk and G. Valk substituted for that of Jansson. These appear to be earlier impressions than those in *Atlas Anglois*, 1724. They bear evidence of having been folded in an atlas.

Title Page of
John Ogilby's Britannia, 1675.

(11 × 17 *inches*).

of Ireland. London, Printed by the Author at his House in White-Fryers. MDCLXXV. fol. 11 × 17 inches. OGILBY 1675

A very fine copy printed on thick paper.

Gough, in his *Anecdotes of British Topography*, London, 1768, p. 35, says that John Ogilby " Designed a noble description of England, in 3 vols. of which the first only was published, entitled, *Britannia*, &c. Lond. 1674. Fol. . . . the 2d was to have given us the like view of our cities : and the 3d a topographical description of the whole kingdom."

This is the first survey of the roads of England and Wales. It is composed of 102 copper plates and 200 pages of text. The maps are engraved on strips representing bands of ribbon of about 2½ inches in width. On most of the plates six strips are given ; but in some cases there are seven. They show the main roads only, with the cross-roads indicated. The distances are shown in miles along the roads, and the villages and mansions named, and in some cases the names of the residents are given.

Facing the title is an elaborate frontispiece with landscape showing cattle and sheep, and in the distance vessels are seen on the ocean. On the left is a fortified structure from which are emerging armed men led by two horsemen. In the foreground are surveyors with their instruments. At the top are three cherubs holding four scrolls, one bearing the title, another a plan of London, the third showing the road from London to Berwick and the fourth, the roads in the vicinity of York. At the bottom : " Fran : Barlow inv." " W. Hollar fecit 1675." The title-page and frontispiece are plain at the back.

Following the title is the dedication to Charles II on two leaves, the back of the second being plain. Then come thirteen leaves containing the preface, list of Post Roads, history of the City of London and " A Catalogue of the several Roads." At the end, in two leaves : " A Table directing to the Cities, Principal Corporation and Market-Towns, Treated of in this Volume," etc.

MORDEN, ROBERT. MORDEN 1680

A Pocket Book of all the Counties of England and Wales : Wherein are describ'd, the Chief Cities, Market-Towns and others ; With the Rivers and Roads from London. To which is added, a Compass, shewing the Bearing, and a Scale for the Distance of Places. There is also given the Length, Breadth and Circumference of each County : The Latitude of each City or Town, and its Distance from London. Being a necessary and plain Direction for Travelling to any Place or Town in all England or Wales. Sold by Robert Morden at the Atlas in Cornhill, and Joseph Pask Stationer, at the three Ink-bottles in Castle-ally, under the west-end of the Royal Exchange, [London, 1680]. 8°. $2\frac{1}{2} \times 5\frac{7}{8}$ inches.

Fifty-two small outline maps of the counties of England and Wales, measuring $2\frac{1}{4} \times 3\frac{3}{4}$ inches. At the top and bottom of each map are panels formed by double lines. Those at the top contain the titles, and, in some, large Roman numerals, in others portraits of notable people. In those at the bottom are given the length, breadth, and circumference of the counties, and the latitude and distances from London of the county towns. The maps in the British Museum copy have been cropped and in most cases the numerals and portraits cut off. They are mounted two on a page, one above the other, thus forming a tall, narrow book.

SPEED, JOHN, AND BLOME, RICHARD.

Speed's Maps Epitomiz'd: or the Maps of the Counties of England, Alphabetically placed. London, Printed Ann. Dom. 1681. 8°. $5\frac{1}{2} \times 7$ inches. SPEED AND BLOME 1681

Thirty-nine coloured maps of the counties of England by Richard Blome, engraved by Wenceslaus Hollar and Richard Palmer. Some of the maps are variously dated 1667 to 1671. Most of them bear evidence of Blome's name having been erased from the title, and, in many cases, the name can still be seen. Blome's signature appears under the dedication on all the plates.

Sir H. G. Fordham, in his *Hertfordshire Maps*, quotes these maps as having been first issued, collectively, by Thomas Taylor in *England Exactly Described*, 1671.

Following the title is the preface to Sir Tho. Fitch signed by R. Blome.

The backs of all the maps are plain.

The map of Rutland is missing.

CAMDEN, WILLIAM, AND MORDEN, ROBERT. CAMDEN AND MORDEN 1695

Camden's Britannia, Newly Translated into English . . . Publish'd by Edmund Gibson . . . Printed by F. Collins, for A. Swalle, at the Unicorn at the West-end of

CAMDEN AND MORDEN 1695

St. Paul's Church-yard ; and A. & J. Churchil, at the Black Swan in Pater-noster-Row. 1695. fol. 8 × 14 inches.

Fifty maps including the counties of England, maps of North and South Wales, Scotland, Ireland, and "The Smaller Islands in the British Ocean." Most of the maps bear the name of Robt. Morden. Sutton Nicholls, and John Sturt appear, as the engravers, on a few of them, and as others are similar in execution, it is probable that they were also engraved by them. They are plain at the back.

Gibson, in his preface, says "The Maps are all new engrav'd, either according to Surveys never before publish'd, or according to such as have been made and printed since Saxton and Speed. Where actual Surveys could be had, they were purchas'd at any rate ; and for the rest, one of the best Copies extant was sent to some of the most knowing Gentlemen in each County, with a request to supply the defects, rectifie the positions, and correct the false spellings. And that nothing might be wanting to render them as complete and accurate as might be, this whole business was committed to Mr. Robert Morden, a person of known abilities in these matters, who took care to revise them, to see the slips of the Engraver mended, and the corrections, return'd out of the several Counties, duly inserted. Upon the whole, we need not scruple to affirm, that they are by much the fairest and most correct of any that have yet appear'd," etc.

SELLER, JOHN.

SELLER 1695

Anglia Contracta. or A Description of the Kingdom of England & Principality of Wales in Several new Mapps of all the Countyes therein Contained By John Seller Hydrographer to The King. [1695.] 8° $3\frac{3}{4} \times 5\frac{7}{8}$ inches.

Sixty-six coloured maps of England and Wales, seven of which are maps of the country for particular purposes. These seven maps and the maps of the English Counties are each accompanied by a page of text, showing the various divisions of the country. The maps of the Welsh counties have no text. All the maps are plain at the back.

The map of Leicestershire and the text for Westmoreland are missing.

The frontispiece is composed of crowned medallion portraits of King William and Queen Mary placed side by side ; above are two cherubs holding a crown with legend " Rex et Regina Beati," and, below, two cherubs sitting on a pedestal with the Royal Arms between them.

The title-page is formed by a panel in the middle, bearing the title, supported by a column on either side. On the left, standing in a niche, " A Britain." On the right, " A Saxon."

The County maps were reprinted, with some corrections, in the *Supplement to the Antiquities of England and Wales. By Francis Grose, Esqr, London*, 1787.

Supplement to the Antiquities of England and Wales. By Francis Grose, Esqr., F.A.S. London. Printed for S. Hooper, No. 25 Ludgate-hill, 1777–87. 2 vols. 4o. 9½ × 12½ inches.

Fifty-five reprints of Seller's maps, 1695, of the counties of England and Wales, the Islands of Guernsey, Jersey, Man, and Wight. These plates do not appear to have been used after the issue of the third edition of Seller's *History of England*, 1703, until they were reissued by F. Grose in the above work.

All the plates have new titles which are placed in panels formed by double lines, but Seller's name is not included.

There are some other trifling additions and corrections outside the county boundaries; but the maps themselves do not appear to have been touched. They are printed at the top of a large octavo page with the beginning of the description of the county below and continued on the back. The maps were again re-printed, without alteration, in the new edition of the *Antiquities of England and Wales*, 1783—1787.

SENEX 1757

———— Another edition, 1757.

The Roads through England delineated or, Ogilby's Survey, Revised, Improved, and Reduced to a Size portable for the Pocket. By John Senex F.R.S. Being an Actual Survey of all the Principal Roads of England and Wales, Distinctly laid down on one hundred & one Copper Plates . . . Printed for John Bowles and Son at the Black Horse in Cornhill London. 1757. obl. 8°. 8½ × 7 inches.

A re-issue of the one hundred " strip " maps of the roads of England and Wales published by John Senex in 1719.

Following the title-page, which is plain at the back, are four leaves. On the first is an account of Ogilby's survey and the reduction by Senex. The second and third sheets contain : " An Index of all the Cities, Market-Towns," etc., and on the fourth " A Table of Cross Roads."

The maps are printed on both sides of the paper, there being fifty-one leaves. On the recto of plate 1 is : " A General View of Ogilby's Direct & principal Cross Roads." Plate 42 is a new map, in seven strips, with the Roads from London to Epping, London to Northampton, and London to Nottingham.

In the various blank " strips " of the first edition, notes, etc., have been added and references are also added at the bottom of the plates in a large number of cases. The plate numbers have been removed from the bottom right-hand corners of the plates and added in both corners at the top.

CXLI.

SENEX 1767

———— Another edition of the Maps, 1767.

In Kitchin's Post-Chaise Companion, through England and Wales ; Containing All the Ancient and New Additional Roads, with Every Topographical Detail relating thereto. By Thomas Kitchin, For the Use of Travellers, on One Hundred and Three Copper Plates. London : Printed for John Bowles, at No. , in Cornhill ; Carington Bowles, at No. 69, in St. Paul's Church-Yard ; and Robert Sayer, at No. 53, in Fleet-street. 1767. obl. 8°. 9 × 7½ inches.

A re-issue of the " strip " maps of the Roads of England and Wales published by J. Bowles in 1757, with considerable corrections and additions. The plates, not including the map of England, are numbered 1–103, and are differently arranged from the former editions.

The leaf containing the account of Ogilby's survey, and the two maps of the Roads from Ferrybridge to Boroughbridge, and London to St. Neots were not issued in this edition. Plates 44 and 50 are transposed.

Plates 22–24, London to Holyhead, and plates 25–27, London to Land's End have been re-engraved, and are now complete in three sheets of six strips each.

Plate 63. Continuation of the Road from Bristol to Chester. The panel, con-

taining the title, is erased and the plate re-engraved. The road now ends at the bottom of the last " strip." SENEX 1767

Plate 73. Chester to Cardiff, second plate. A note is added at the top of the last " strip."

Plate 76. St. Davids to Holywell, 2nd plate. A note is added at the top of the last strip.

Plate 101. York to Chester, 2nd plate. The note is erased from the top of the last strip.

The following are new maps: " A General Map of the Direct & Principal Cross Roads, in England and Wales; extended to Edinburgh in Scotland," this supersedes the map of England.

Plate 4. The Road from London to Aylesbury.

Plate 32. The Road from London to Rygate and the New Road from Paddington to . . . Epping Forest.

Plate 37. The Road from London to Bernards Castle.

Engraved title-page, plain at the back, followed by: " Partie Meridionale de la Grande Bretagne Divisée en ses Comtés, ou Shires, a Londres Chez T. Jefferis Géographe de S. A. R. Monseigneur le Prince de Galles et se trouve A Paris Chez le S^{t}. Julien a l'Hotel de Soubise, 1760." Then comes a second title in English and French: *Itineraire de toutes les Routes de l'Angleterre Revués Corrées augmetées & Reduites, Par Senex en* 101 *Cartes . . . Bowles a ajouté en* 1757 *plusieurs nouvelles Routés à cet ouvrage plusieurs renvois et Corrections necessaire. Ouvrage traduct de l'Anglois. A Paris Chez le Sr. Desnos, etc.*

The Roads through England or Ogilby's Survey Revised, Jmproved, and Reduced By Senex Distinctly laid down on one hundred & one Plates with the addition of some Roads newly drawn, and General Corrections of more general use to travellers. Printed at Paris. For Desnos, Geographer, at the Globe St. James Street.

The sheet containing these two titles is plain at the back.

The general map following is: *Carte Général des Routes Directes et principales Routes de traverse D'Ogilby.* It is plain at the back.

SENEX 1767

Plates 1–101. "Strip" maps of the roads with titles in French, printed on one side of the paper only.

At the end of the volume is: *Recueil des Villes, Ports, D'Angleterre Tiré des Grands Plans de Rocque et du Portulana de l'Angleterre du Sr. Belin. A Paris Chez le Sr. Desnos . . .* 1766.

One sheet containing tables, etc., and seventeen plates of plans and views of towns, etc.

There is a copy of the above work in the Bodleian Library.

SENEX 1775

——————— **Another edition, 1775.**

Jefferys's Itinerary; or Travellers Companion, Through England, Wales, and Part of Scotland, Containing All the Direct and Principal Cross Roads; with The Addition of every New Road. Carefully collected from all the actual Surveys hitherto published. Improved with many thousand names of places more than are in any similar publication. To which are added Copious Indexes to all the Roads and Places mentioned in the work, with their exact Distance from London. London, Printed for R. Sayer and J. Bennett, Map and Print Sellers, No. 53, Fleet-Street. 1775.

This is practically a new work, the plates having been re-engraved. The strips no longer appear in the form of a scroll; but are enclosed by straight single lines.

Following the title-page is the preface in which it is stated that: "The plates for the following work were originally intended for an account of these Roads in French; but, falling into the hands of the late Mr. Jefferys and the Editor, it was thought they might be the foundation of a work in English." Apparently the plates had already been used for a French edition by M. Desnos in 1767.

Eight leaves, numbered I–XV, contain "Index to Places." "Index to Towns," and "Index to the Principal Roads."

The General Map bears the title: "A New Post-Map of the Roads of England."

The Road maps are numbered 1–104. The imprint: "Publish'd as the Act directs by R. Sayer & J. Bennett 16 Jan^{y}. 1775" is given either at the top or bottom of every plate.

SENEX 1775

——————— **A reprint, 1775.**

The Roads of England Delineated; or, Ogilby's Survey, Revised, Improved, and Reduced to a Size portable for the Pocket, By John Senex, F.R.S. Being an Actual Survey of All the Principal Roads of England and Wales; Distinctly Laid Down on One Hundred and one Copper-Plates; . . . With the Additions of some Roads newly drawn, which were omitted by Mr. Ogilby, and several necessary Corrections made in Others; together with a great Number of explanatory References, by which this Edition of the Roads is rendered of more general Use to Travellers.

This is precisely the same as the 1775 issue above; but without preface.

OWEN, JOHN, AND BOWEN, EMANUEL. OWEN AND BOWEN 1720

Britannia Depicta or Ogilby Improv'd ; Being a Correct Coppy of Mr. Ogilby's Actual Survey of all y^e^ Direct & Principal Cross Roads in England and Wales : Wherein are exactly Delineated & Engraven, All y^e^ Cities, Towns, Villages, Churches, Seats &c. scituate on or near the Roads, with their respective Distances in Measured and Computed Miles. And to render this—work universally Usefull & agreeable, [beyond any of it's kind] are added in a clear & most Compendious Method.

1, A full & particular Description & Account of all the Cities, Borough-Towns, Towns-Corporate &c. their Arms, Antiquity, Charters, Priviliges, Trade, Rarities, &c. with suitable Remarks on all places of Note drawn from the best Historians and Antiquaries. By Jn^o^ Owen of the Midd: Temple Gent.

2, The Arms of the Peers of this Realm who derive their Titles from places lying on, or near the Roads.

3, The Arms of all y^e^ Bishopricks & Deanaries, their foundation, Extent, Yearly-Value, Number of Parishes &c.

4, The Arms, & a succinct Account of both Universities & their respective Colleges, their foundations Fellowships &c.

Lastly Particular & Correct Maps of all y^e^ Counties of South Britain ; with a Summary description of each County, it's Circumference, Number of Acres, Boro' & Market Towns & Parishes, Air, Soil, Comodities, Manufactures & what each Pays in y^e^ 2^sh^ Aid &c. The Whole for its Compendious Variety & Exactness, preferable to all other Books of Roads hitherto Published or Proposed ; and calculated not only for the direction of the Traveller [as they are] but the general use of the Gentleman and Tradesman. By Eman : Bowen Engraver.

London Printed for & Sold by Tho: Bowles Print & Map Seller near y^e^ Chapter House in St. Pauls Churchyard & Em. Bowen near y^e^ King of Spain in S: Katherines. 1720. 4^o^. $4\frac{5}{8} \times 7\frac{1}{8}$ inches.

The engraved title-page (the verso of which is plain) is within an ornamental border $\frac{3}{8}$ of an inch wide. Following the title-page are two leaves containing : " A Table of all the Roads contain'd in this Book " and, on the back : " A Table of y^e^ Cities Towns &c." Continued on the second leaf, on the verso of which is : " A Table of all the Maps contain'd in this Book," and below the arms of the Archbishops of Canterbury and York, etc.

The plates containing the maps are numbered 1–273, and printed on both sides of the paper. The strip-maps are reduced from John Ogilby's survey of 1675, and prepared in a similar manner with three, and in some cases four, strips on a page.

The title of each road is given across the top of the page in a highly ornamented cartouche, below which is a somewhat sketchy county map, or, an historical note.

This work appears to have been in great demand as there were four editions issued

OWEN AND BOWEN 1720

from 1720 to 1724. The second and third editions are not so named, and still retain the date 1720. The date of issue cannot be given definitely.

The only copies of the first edition known to me are in the possession of Sir H. G. Fordham and Dr. F. B. Penfold of Leatherhead.

Chorographia Britanniæ or A New Set of Maps . . . This collection . . . was first Drawn . . . for the use of his late Majesty King George I. For his intended Tour thro' England & Wales. By Thc^s Badeslade Surveyor, & Engrav'd By W. H. Toms. Published According to Act of Parliament. Sold by J. Clark Bookseller, at y^e Golden Ball, in St. Paul's Church Yard. C. Hitch, Bookseller in Pater-Noster Row, & by W. H. Toms Engraver, in Union Court Holbourn. Price in Sheets 5^s. Bound 6^s. Bound & Coloured 12^s. No date. 8^vo.

The work is now called A New Set of Maps. The note at the foot of the title-page, and the imprint are altered considerably, as shown above. In order to accommodate the longer imprint, the title-page is lengthened by three-eighths of an inch. The plates are precisely the same as the third issue. This may possibly have been issued in 1743 or 44.

BICKHAM, GEORGE, SENIOR.

The British Monarchy : Or, a New Chorographical Description of all the Dominions Subject to the King of Great Britain. Comprehending The British Isles, The American Colonies, The Electoral States, The African & Indian Settlem^ts^. And enlarging more particularly on The respective Counties of England and Wales. To which are added Full and Exact Lists of the Navy, the Army, the Officers of State, the Revenue, and Justice ; with all the Salaries, as fix'd both by the Civil and Military Establishments. The Whole Illustrated with suitable Maps and Tables ; likewise, adorned with Head-Pieces, and other Embellishments ; and Engrav'd by George Bickham. G. B. Fecit. Publish'd according to Act of Parliament, October 1^st^ 1743. and Sold by G. Bickham [in James Street, Bunhill-Fields] & by the Booksellers & Printsellers in Town and Country. fol. 7½ × 12½ inches.

Page 39 is a second title-page :

A Description of the several Counties In South Britain ; Containing, England and Wales. London : Sold by G. Bickham jun^r^. in Mays Buildings Covent Garden, according to Act of Parliament March 29 ^h^ 1750. N.B. Whosoever coppy the Maps shall be Sued as the Law directs, & by reason of y^e^ Work contain'd in each Map, they must go as two Pages.

Volume 2 begins with an ornate dedication and two titles :

(1) **Second Volume Intitled The British Monarchy . . . Engrav'd by George Bickham. Printed, & Sold by him in Numbers 6^d^ each 25 in the Whole of this Volume. Of whom may be had the first Volume Neatly Bound 15^s^.**

(2) **A Short Description of the American Colonies ; belonging to the Crown of Great Britain. Engrav'd By George Bickham, Sen . London : Publish'd . . . and Sold by Geo. Bickham . . . And by John Bickham Engraver, opposite Fetter-Lane, Holborn.**

The title-page is dated 1743, the colophone 1749 and the county views 1750 to 1754, therefore the work, with the views, could not have been issued before 1754.

It contains one hundred and eighty-eight copper plates of historical notes and forty-three plates of idealized bird's-eye views of the counties of England, and North and South Wales, beautifully engraved throughout on one side of the paper only. In addition there are fifty-eight coats of arms of the county towns, six views, and numerous engravings of antiquarian remains found in the various counties.

Included in the pagination are the frontispiece, dated 1747, and the title, which should be plates 1 and 2. The map of the British Isles is plate 9, Ireland 14, Scotland 19, England 25, and the title to the counties in South Britain 39. Page 58, Hampshire, is in duplicate.

Following plate 161 are two leaves containing : " Daily pay of Land Forces," and " Tables of wages . . . in the Royal Navy." BICKHAM 1743-54

There is an edition of The British Monarchy with a title-page dated 1748 and also a copy of the original title-page of 1743 : but without the forty-three bird's-eye views. Although the first title-page is dated 1748 it is undoubtedly the earliest impression of the three editions in the British Museum.

BICKHAM 1749

———— Another edition, 1749.

The imprint on the title-page of this edition reads: "Publish'd according to Act of Parliament Decm^r. 2^d, 1749, by G. Bickham jun^r in May's Buildings, Covent Garden London & by y^e Stationers, Book & Printsellers in Town & Country."

This edition contains the forty-eight maps and bird's-eye views, and is practically the same as the 1743–54 edition with a few corrections:

Plate 8, The British Monarchy is still dated 1743. Following plate 38 is a title-page of an elaborate design bearing the title: "Geographical Maps of the Counties in South Britain. By Geo. Bickham jun^r. Design'd Drawn & Engraved by him according to Act of Parliament.

The title and dedication to the second volume are placed between pages 90 and 91. Following the two sheets with "Table of the Wages . . . in the Royal Navy" and "Daily Pay of the Land Forces &c." is a "Table . . . to the Counties of South Britain," etc.

CLXXXIX.

OSBORNE, T. OSBORNE 1748

Geographia Magnæ Britanniæ. Or, Correct Maps of all the Counties in England, Scotland, and Wales ; with General ones of both Kingdoms, and of the several Adjacent Islands : Each Map expressing the Cities, Boroughs, Market and Presbytery Towns, Villages, Roads and Rivers ; with the N°. of Members sent to Parliament ; together with Tables of the high and cross Roads, market Days &c. S. Wale inv. & fec. Printed for T. Osborne, D. Browne, J. Hodges, A. Miller, J. Robinson, W. Johnston, P. Davey & B. Law. Published according to Act of Parliament October 12th. 1748. 8vo. 4 × 7 inches.

Sixty-three maps of the counties of England and Wales. The second map of England, " Engrav'd for Paterson's Description of the Roads," does not belong to this work ; it was probably published about 1770.

The county maps are numbered 1–60. Both Kent and Lancashire bear the number 19, and plate 50, Denbighshire, is numbered 56.

The title-page, engraved by S. Wale, is formed by a plinth upon which is hung, by three nails, a piece of drapery bearing the title. In the foreground is a female figure exhibiting, to a small boy, the map of Great Britain. On the left is a view of a church tower with spire. It is plain at the back.

Pages 1–39 contain 158 lists of roads with distances. The verso of 39 is plain. " An Index of all The Cities and Market-Towns " follows on nine leaves. On the back of the ninth leaf begins " An Index of the Cross-Roads," etc., and continued on the four following leaves. Then comes : " Correct Tables of all the High and Cross Roads in England and Wales," etc., below which is a list of the counties, and on the verso : " Books printed for S. Birt, D. Browne, etc. Bound at the end is *Geographia Scotiæ* with maps numbered 1–33.

KITCHIN, THOMAS, AND JEFFERYS, THOMAS. KITCHIN AND JEFFERYS 1749

The Small English Atlas being A New and Accurate Sett of Maps of all the Counties in England and Wales. London, Publish'd according to Act of Parliam^t^. by Mess^rs^. Kitchin & Jefferys, 1749, and Sold by M. Payne at the White Hart and M. Cooper at the Globe in Paternoster Row. 4^to^. 5½ × 6⅜ inches.

Forty-nine maps, two of which are of England and Wales and the remainder the English and Welsh counties. At the bottom of each plate, outside the border lines of each county map, are notes showing, Fairs, Market-days, Members returned to Parliament, etc. The shading around the boundary of most of the maps has the effect of giving the county the appearance of an island.

The title-page is engraved and represents a plinth, nailed to which is a piece of drapery bearing the title. Seated upon a globe, in the foreground, is " Britannia " with two female figures, one of which is presenting her with an atlas, the other is carrying a large bird under her left arm. Following the title-page is an engraved preface enclosed by an ornamental border. All the plates are plain at the back.

BOWEN, EMANUEL, AND KITCHIN, THOMAS.

BOWEN AND KITCHIN 1749-55

[The Large English Atlas by E. Bowen and T. Kitchin. Published by J. Hinton and J. Tinney : London, 1755.] fol. 17½ × 23 inches.

This is a splendid collection of maps of the counties of England and Wales by Emanuel Bowen and Thomas Kitchin. Published by John Hinton and John Tinney.

The British Museum copy of this atlas is imperfect, wanting the title and the maps of the counties of Berk, Bucks, Derby, Dorset, Durham, Essex, Gloucester and Monmouth, Leicester and Rutland, Middlesex, Nottingham, Sussex, Westmorland and Cumberland, Worcester, York, East, North and West Ridings of York, and North Wales.

The title-page of the atlas is given in full under the edition of 1760 ; the title-page of the first edition, if the maps were ever published collectively before 1760, probably bore the imprint of John Hinton & John Tinney. But it is quite probable that the maps were first collected together and issued as *The Large English Atlas* by Bowles, Tinney and Sayer *circa* 1760.

The only change noticeable in the maps of the four editions in the British Museum is in the imprint. In the first edition some of the maps bear the imprint of John Hinton, others that of John Tinney. In the second issue Hinton's name disappears and the imprint on each map is that of T. Bowles, John Bowles and Son, J. Tinney and R. Sayer. Except in the case of Hampshire and Middlesex J. Tinney's name and address are erased from the imprint of the third issue leaving, in many cases, a blank space. Although John Bowles had died before the publication of the edition of the atlas issued by R. Wilkinson (his successor), yet his name still appears on the maps.

All the names in the imprint are given in the following list, only the addresses of the various publishers being omitted. As shown in the title of the atlas the maps are very detailed, and the space around the county boundary is filled by historical notes.

The title of each map is given in an elaborate design, around which are symbols of the industry of the county. The dedication is in a small cartouche surmounted by the arms of the family to whom the map is dedicated.

The maps measure 20½ × 27½ inches.

The Small British Atlas : Being a New Set of Maps of all the Counties of England and Wales : To which is added, A General Map, with Tables of Length, Breadth, Area . . . Likewise A Parliamentary Map of England, with Tables of the Produce of the Land-Tax . . . London : Published according to Act of Parliament 1753. By John Rocque, Chorographer to his Royal Highness the Prince of Wales, near Old Round Court in the Strand, and Robert Sayer, Map and Printseller, at the Golden Buck, opposite Fetter-Lane, Fleet-Street.

Le Petit Atlas Britannique : ou recueil des Provinces d'Angleterre et de la Principaute de Galles, etc. obl. 4to. 9¼ × 8 inches.

Fifty-four maps, first issued in *The English Traveller*, 1746, two of which are of England and Wales and the remainder the counties and adjacent islands. These maps are similar to those in the *Small English Atlas*, 1749. As in the former case the shading around the county boundary gives the counties the appearance of islands.

The printed title is given both in English and French, and the two versions are placed side by side on the open page.

The arms of King George III are pasted on the plain verso of the title-page.

The plates are unnumbered.

BOWEN, EMANUEL, AND KITCHIN, THOMAS. BOWEN AND KITCHIN 1762

The Royal English Atlas : being a New and Accurate Set of Maps of all The Counties of South Britain, Drawn from Surveys . . . and exhibiting all The Cities, Towns, Villages, Churches, Chapels, &c. Particularly Distinguishing more Fully and Accurately the Church Livings, Than any other Maps hitherto Published. Adorned with Views of all the Cathedrals ; and A Concise Description of each Diocese : illustrated with Historical Extracts . . . to the whole is prefix'd, A General Map of England and Wales ; Comprehending all the Direct and Principal Cross Roads . . . By Emanuel Bowen, Geographer to His late Majesty, Thomas Kitchin, Geographer, and Others. The whole comprised in forty-four Sheet Maps. London : Printed for Thomas Kitchin, on Holborn-Hill ; Robert Sayer, in Fleet-Street ; Carington Bowles, in St. Paul's Church-Yard ; Henry Overton, without Newgate ; Henry Parker, and John Bowles, in Cornhill ; and John Ryall, in Fleet-Street. [1762]. fol. 12 × 18½ inches.

An elegant atlas, with title printed in red and black, of forty-four finely engraved maps with elaborate cartouches containing the titles. These maps are very similar to those in the *Large English Atlas* containing practically the same historical notes and views of the Cathedrals.

Unless otherwise indicated the titles of all the maps begin : " An Accurate Map of." The names in the imprint are so varied that it is necessary to give all the names on each map ; the only details left out are the various addresses.

The Cambridge University Library possesses a copy with the imprint : " London :

BOWEN AND KITCHIN 1762

Printed for Henry Overton . . . Henry Parker . . . Thomas Kitchin . . . Robert Sayer . . . Carington Bowles . . . John Bowles . . . and John Ryall." The names and addresses are the same as in the British Museum copy, but placed in different order. The maps are precisely the same as in the other copy. The order of names in the imprints varies. Possibly title-pages for the atlas were printed with varying imprints to suit the fancies of the booksellers named therein.

The forty-one County Maps and those of North and South Wales were re-issued in *The English Atlas ; or a Set of Maps of all the Counties in England and Wales . . . London*, Sold by R. Martin, [1794].

Most of the maps bear the imprint : " London. Printed for Rob^{t}. Sayer & John Bennett . . . John Bowles . . . & Carrington Bowles," and are variously dated 1777 and 1778. A few have the imprint of Bowles and Carver, which shows that the atlas could not have been re-issued before 1794, when they succeeded to the business of Carrington Bowles.

———— Another edition, 1778. BOWEN AND KITCHIN 1778

This copy is given in *A List of Geographical Atlases in the Library of Congress by P. Lee Phillips*, 1909. The imprint is given as "London, R. Wilkinson, [1778]." In a note it is stated that the maps are dated 1777—1778, but the imprint on the maps is not given.

In the same work, and under the same date, is mentioned another edition, containing the same maps, with the title corrected to: **The Royal English Atlas: being a new and accurate set of maps of all the counties in England and Wales, drawn from the several surveys which have been hitherto published, with a general Map of England, and Wales, from the latest and best authorities . . . containing all the cities, towns, villages, and churches, whether rectories, vicarages, or chapels . . . C. Bowles, London [1778]. 44 folded maps.**

A note states that the maps are dated 1777—1778 and are the same as in the above edition issued by Wilkinson.

KITCHIN, THOMAS. KITCHIN 1764

England Illustrated, or, A Compendium of the Natural History, Geography, Topography, and Antiquities Ecclesiastical and Civil, of England and Wales. With maps of the several counties, and engravings of many Remains of Antiquity, remarkable buildings, and principal Towns. In two volumes. London : Printed for R. and J. Dodsley, in Pall-mall, MDCCLXIV. 4to. 8½ × 11¼ inches.

Contains fifty-four maps of the counties of England and Wales. Of the Welsh counties Anglesea, Caernarvon, Denbigh, Flint, and Merioneth are wanting in the British Museum copy, and apparently were never included.

In the descriptive text of each county are given views of castles, abbeys and ancient remains drawn by B. Green and B. Ralph and engraved by B. Green, C. Grignion, E. Rooker, J. Ryland and W. Ryland ; and, in addition vol. 1 contains views of Canterbury, Colchester, Derby, Durham, Ely, Exeter, Gloucester, Hereford, Lancaster, Leicester, Lincoln, Liverpool, Reading and Windsor ; and vol. 2, Bath, Birmingham, Bury-St.-Edmunds, Chichester, Guildford, Litchfield, Newcastle-upon-Tyne,

KITCHIN 1764

Northampton, Norwich, Nottingham, Oxford, Salisbury, Shrewsbury, Worcester, and York; these are all drawn and engraved by J. Ryland.

Richard Gough, in his *British Topography*, vol. I, p. 41, says: "In 1764 he [Dodsey] put out a new work in 2 vols, 4to. pretended to be upon a new plan, intitled, 'England illustrated . . . with maps of the several counties, and engravings of many remains . . . and principal towns.' This is nothing more than an abridgement of Camden in a different method, all his errors adopted, and many new ones committed. The views are copied from Messrs. Buck by B. Ralph and J. Ryland, and the maps of little value. No compiler has been owned." With this criticism, as far as the maps are concerned, I do not agree, as they are clearly and distinctly engraved as is usual with Kitchin's maps. It is true they do not give much detail; the scale will not allow of that. The main roads and principal cross roads are shown very prominently.

The titles of all the county maps, which are enclosed in floriated cartouches, begin with: "A New Map of," and end: "By Tho^{s}. Kitchin Geog^{r}. Engraver to H.R.H. the Duke of York."

The map of England is placed before the title in vol 1. Following the title is the preface on two leaves, the verso of the second being plain; list of contents, one page, the verso being plain. Then comes the introduction on pages numbered I–XIII, and following this a description of the counties, in alphabetical order, Bedford—Lincoln, on 426 pages. In volume 2, Kitchin's road map of England is placed before the title. Following the title is a list of "Contents of the Second volume" on one page, then come the maps and descriptions of the counties: Middlesex—Yorkshire and Anglesea —Radnor, with an appendix including the Isle of Man, on 490 pages. The maps were re-issued, without alteration, in: *Kitchin's English Atlas; or, A complete set of maps of all the Counties of England and Wales . . . London: Printed for J. Dodsley*, [1770].

KITCHIN AND BOWEN 1765

KITCHIN, THOMAS, AND BOWEN, EMANUEL.

The English Atlas, or a complete set of maps of all the counties in England and Wales, containing all the cities, towns, parishes, rivers, roads, seats, and in general every other particular that is usually sought for or to be found in maps. The whole engraved in the neatest and most accurate manner, from drawings after actual surveys, and other the best authorities, by Thomas Kitchin ; Emanuel Bowen, geographer to his majesty ; and others. Lond., 1765. 4to. with a general description of the counties, and historical extracts relating to the trade &c. &c.

The above is given by Gough in his *British Topography*, 1780, Vol. I, p. 98. But

KITCHIN AND BOWEN 1765

I do not know of the existence of a copy. "It consists of 47 maps, besides general ones of England, Scotland and Ireland." These maps are possibly the same as those in the Royal English Atlas, 1762.

ELLIS, JOHN. ELLIS 1766

Ellis's English Atlas : or, A Compleat Chorography of England and Wales : in Fifty Maps Containing more Particulars than any other Collection of the Same Kind. The Whole Calculated for the Use of Travellers, Academies, and of all those who desire to Improve in the Knowledge of their Country. From the latest Surveys of the Several Counties ; Engraved by, and under the Direction of, J. Ellis. London : Printed for Robert Sayer, at the Golden Buck, near Serjeants Inn, in Fleet-Street ; and Carington Bowles, next the Chapter-House, in St. Paul's Church-Yard. Price 10s. 6d. in Red Leather for the Pocket. MDCCLXVI. obl. 8vo. 11½ × 9 inches.

A set of clearly engraved maps very similar in design and execution to those by Thomas Kitchin issued in *England Illustrated*, 1764.

On the back of the title-page is a list of maps numbered 1–50. The maps in the British Museum copy, however, agree with the index in the 1768 edition, where numbers three and four are omitted and the county maps numbered 5–52. No. 2 Road Map of England and Wales, and 52, South Wales, are missing in the British Museum copy.

Unless otherwise shown the titles of the maps begin : " A Modern Map of."—and bear the imprint : " Printed for Rob^{t}. Sayer in Fleet Street & Carington Bowles in St. Pauls Church Yard." In some cases Bowles' name comes first.

Cornwall, is engraved by De la Rochette, Bucks. Hereford, Huntingdon, Kent and Warwick by W. Palmer and Worcester by W. Fowler. Devon, Durham, Hampshire, Isle of Man, Isle of Wight, Middlesex, Somerset, Wilts and the West Riding of York are without name of engraver, and the remainder have at the bottom of the title : ' J. Ellis sculp^{t}."

———— A re-issue, 1766. ELLIS 1766

Ellis's English Atlas . . . in Fifty-four maps. Containing more particulars than any other collection of the same kind . . . With the addition of four maps, viz. Of the Rivers of England and Wales; of Twenty-five miles of the country round London; of the Island of Jersey; and of Guernsey, Sark, Alderney and Burhou. Engraved by . . . J. Ellis. London. Printed for Carington Bowles, next the Chapter House, in St. Paul's Church-Yard; and Robert Sayer, at the Golden Buck, near Serjeants Inn, in Fleet Street. Price 15s. in Red Leather for the Pocket. MDCCLXVI.

It is difficult to determine when this was issued. The title-page still bears the original date and is similar in character to the first issue: but it may possibly have been published later. On the back of the title-page is a list of the fifty-four maps. Nos. 3 and 4 are missing from the British Museum copy, and it is doubtful if No. 1, dated 1775, belongs to the work. All the county maps from 6–52 are printed on both sides of the paper.

Maps—

1. The map of England is replaced by: Itineraire Anglois, containing the Great, Direct, and Cross Roads, through England and Wales . . . by Thomas Jefferys . . . British miles, 40 [1⅞ inches]. London Publish'd . . . 31st Jany. 1775. By R. Sayer and J. Bennett, etc.

The following are the additional maps.

2. An Accurate Modern Map of the Rivers of England and Wales; with the Cities, Borough, and Market Towns, situate thereon or adjacent thereto . . . London. Printed for Robt. Sayer . . . and Carington Bowles, etc.
3. [A Post Map of England and Wales. Not in the British Museum copy].
4. [London, and the country twenty-five miles round. Not in British Museum copy].
53. A Modern Map of the Island of Jersey, &c. English miles, 3 [=2 inches]. Printed for Robt. Sayer . . . & Carington Bowles, etc.
54. A Modern Map or Chart of the Islands of Guernsey, Sark, etc. Scale of miles, 4 [=1⅞ inches].
A Modern Map or Chart of Alderney and Burhou. Scale of miles, 4 [=2¾ inches].

———— Another edition, 1768. ELLIS 1768

With A Modern Map of the Post Roads of England and Wales . . . London: Printed for Robt. Sayer . . . and Carington Bowles, etc. This was missing in the previous issues.

ELLIS 1768

The list of maps on the back of the title-page is numbered 1, 2, 5 to 52.

The imprint of the atlas is corrected as follows : " Printed for Robert Sayer, Map and Printseller, No. 53, in Fleet Street ; Thomas Jeffery's, Geographer to his Majesty the corner of St. Martin's Lane, Charing-Cross ; A. Dury in Duke's-Court, St. Martin's-Lane, and at the Map and Print Shop N°. 92, under the Royal Exchange, Cornhill, 1768." obl. 8vo.

KITCHIN, THOMAS. KITCHIN 1769

Kitchin's Pocket Atlas, of the Counties of South Britain or England and Wales, Drawn to one scale. By which the true proportion they severally bear to each other may be easily ascertained with the Measured Distances from London by the nearest Roads annexed, to all the Cities, Boroughs, & Market Towns in the Kingdom. Being the first Set of Counties, ever Published on this Plan, 1769. Printed for the Author T. Kitchin, Engraver, Map and Printseller, N°. 59, Holborn Hill ; and J. Capper, Map & Printseller, N°. 56, New Bond Street. obl. 8°. 12 × 9 inches.

A very rare and, apparently, unknown atlas. A copy was discovered on a Cambridge bookstall by Mr. George Goode of the Cambridge University Library, and is now preserved in that institution.

The maps are very similar to those engraved by Kitchin and issued in *England Illustrated*, 1764 ; but on a slightly smaller scale.

It consists of an engraved title-page within a double line elliptical border. The imprint being between the lines at the bottom. The forty-seven plates of the counties of England and Wales are without title or imprint ; but with the names of the counties printed across the maps in large type. Many of the plates have two maps. Each map has a small compass indicator just the same as those in *England Illustrated*.

GROSE, FRANCIS, AND SELLER, JOHN. GROSE AND SELLER 1777-87

Supplement to the Antiquities of England and Wales. By Francis Grose, Esq^r., F.A.S. London. Printed for S. Hooper, N^o. 212, High Holborn, 1777-87. Sm. fol. 9 × 12¾ inches.

A very fine work in four volumes containing numerous views of cathedrals, churches, abbeys, castles and ancient remains, with a supplement in two volumes which also contain a number of views and a collection of fifty-two maps of the counties of England and Wales. Each map is printed on the upper part of a small folio page, with an historical account of the county at the bottom, which is continued on the back. The maps first appeared in *Anglia Contracta or A Description of the Kingdom of England & Principality of Wales . . . by John Seller*, 1695. All traces of their connection with Seller's work are removed.

According to the title-pages this work was published from 1773—1776 with supplementary volumes issued in 1777—1787, yet in each volume there are plates with dates to 1787, so that none of the volumes could have been made up before the latter date.

There is, in the British Museum, an edition in four volumes dated respectively 1773, 1774, 1775 and 1776. The maps are placed before the description of each county.

LODGE, JOHN. LODGE 1782-90

The Political Magazine and Parliamentary, Naval, Military and Literary Journal . . . London : Printed for R. Butters, No. 79, Fleet Street. 8^vo. 5 × 7½ inches.

Forty-five very clearly engraved maps, consisting of England, Scotland, Ireland, and the forty-two English counties, issued in the *Political Magazine* from 1782 to 1790. They are all engraved by John Lodge, his name appearing in the bottom right-hand corner of each plate.

LODGE 1782-90

The counties of Bedford, Hertford, Kent, Lancaster, Lincoln, Middlesex, Norfolk, and Northampton are wanting in the British Museum copy of the magazine. Their titles and scales were taken from the 1795 reprints.

The maps of Lancashire, Lincoln, Norfolk, and Northampton are represented by maps from the *Universal Magazine* engraved by Benjamin Baker.

WALPOOLE 1784

WALPOOLE, GEORGE AUGUSTUS.

The New British Traveller ; or, A Complete Modern Universal Display of Great-Britain and Ireland . . . Being really the result of An actual and late General Survey, accurately made by a Society of Gentlemen . . . including a valuable collection of Landscapes, Views, County-Maps, &c. . . . The whole published under the immediate inspection of George Augustus Walpoole, Esq. Assisted . . . by David Wynne Evans . . . Alexander Burnet . . . and . . . Robert Conway . . . London : Printed for Alex. Hogg, at the King's-Arms, No. 16, Paternoster-Row, 1784.

An interesting work in five parts paged throughout 1–520. Contains Map of England, Roads of England, North Wales, South Wales, Scotland, and Ireland ; with seventeen plates showing the counties of England in groups of two, three, and four on a plate.

Except where otherwise shown the titles begin : " A New Map of " and end : " Drawn from the latest Authorities." Along the top of each of the seventeen plates is : " Engraved for Walpoole's New & Complete British Traveller," and, at the bottom : " Published by Alex^r. Hogg at the King's Arms N°. 16, Paternoster Row."

As seen by the following list some plates bear the name of T. Conder as the engraver and, apparently, they are all by the same hand.

Facing the title-page is a symbolical frontispiece. The title-page, preface and introduction occupy pages I–VI.

There are numerous views of towns, residences, etc., spread throughout the work.

The New and Complete English Traveller : or, a New Historical Survey and Modern Description of England and Wales. A work calculated equally to please the Polite—entertain the Curious—instruct the Uninformed—and direct the Traveller . . . Written . . . by a Society of Gentlemen . . . revised, corrected, and improved, by William Hugh Dalton, Esq. . . . London : Printed for Alex. Hogg, No. 16, Paternoster-Row ; and Sold by the Booksellers of Bath, Bristol . . . and by all other Booksellers and Newsmen in England, Wales, Scotland, and Ireland.

The title on the frontispiece is :

Daltons New English Traveller . . . Ryley delin. Scott sculpt. Published by Alexr. Hogg, Novr. 22, 1794. fol. 9 × 15in.

Practically the same as the New British Traveller by Walpoole. The legend : " Engraved for Walpoole's New and Complete British Traveller," and the ornamental portion of the borders have been erased from the plates containing the maps. They still bear the original imprint, and " T. Conder sculp " is added to all the plates except Berks and Somerset which has no engraver's name, and Cornwall and Devon which has " Hatchett sculpt."

BOWLES 1785

Bowles's New Medium English Atlas ; or, Complete Set of Maps of the Counties of England and Wales : divided into their respective hundreds, wapontakes, wards, rapes, lathes, &c. . . . London, Printed for the Proprietor Carington Bowles, at his Map and Print Warehouse, No. 69, in St. Paul's Church Yard, MDCCLXXXV. 4to. 8 × 10½ inches.

The forty-four maps are re-issues of those by Emanuel and Thomas Bowen, published by Thomas Kitchin in *Atlas Anglicanus*, 1767. All the foliated cartouches with the original titles have been erased, and new titles re-engraved on circular or oval panels, all of which begin : " Bowles's New Medium Map of," and end with : " London : Printed for the Proprietor, Carington Bowles, No. 69, in St. Paul's Church Yard." The original imprints at the bottom have also been erased, and replaced by : " Published as the Act Directs, 3 Jan. 1785."

The distances from London have been added to all the principal towns. In other respects the plates are, apparently, unaltered.

The plates are numbered 1–44. Between the title and imprint on the title-page is a list of the maps.

Sir H. G. Fordham thinks it probable that this atlas was re-issued by Bowles and Carver as he has seen the map of Hertfordshire bearing their imprint.

The same authority also states that probably there was a smaller atlas than the *New Medium English Atlas*, issued by Carington Bowles, about 1785, as he has seen a map of Hertfordshire by C. Bowles, 7½ × 6 inches, apparently from a small atlas.

BOWLES 1785

BOWLES, CARINGTON.

Bowles's Pocket Atlas of the Counties of South Britain or England and Wales, Drawn to One Scale : By which the true proportion they severally bear to each other may be easily ascertained, with the Measured Distances from London by the nearest Roads annexed, to all the Cities, Borough and Market Towns in the Kingdom. Being the only Set of Counties, ever Published on this Plan. London. Printed for and Sold by the Proprietor Carington Bowles, No. 69 in St. Pauls Church Yard. [1785]. **8vo. 10⅞ × 8⅜ inches.**

A very fine atlas consisting of an engraved title-page and fifty-seven maps. The title is within an elliptical border formed by double lines, between which, at the bottom, is the imprint. Following the title-page is an engraved plate with the "Index" of maps. The maps are clearly engraved, the roads being a prominent feature. In some cases they are printed two on a page, and in that case the numbers are bracketed in the list. The title is given outside the border at the top of each map, and begins : "Bowles's reduced map of,"—as given in No. 1 of the list of maps.

The only copy known to me is in the possession of Dr. F. B. Penfold, Fetcham Holt, Leatherhead.

BOSWELL AND KITCHIN 1786

BOSWELL, HENRY, AND KITCHIN, THOMAS.

Historical Descriptions of New and Elegant Picturesque Views of the Antiquities of England and Wales : being a grand Copper-Plate Repository of Elegance, Taste, and Entertainment. Containing a new and complete collection of superb views of all the most remarkable Ruins and antient Buildings, such as Abbeys, Castles, Monasteries, Priories . . . Accompanied by elegant Letter-Press Descriptions . . . à complete Set of County-Maps . . . Together with an authentic account of Doomsday-Book . . . Published under the inspection of Henry Boswell, Esq. F.A.R.S. Assisted by Robert Hamilton . . . and other ingenious Gentlemen . . . London : Printed for Alex. Hogg, at the King's-Arms, N°. 16, Paternoster-Row, and Sold by all Booksellers, Printsellers, and News-Carriers, in Town and Country, [1786]. fol. 9 × 15 inches.

An interesting work containing fifty maps, those of the counties of England, except Yorkshire, are by Thomas Kitchin and originally appeared in the *London Magazine* from 1747—1760. They are without imprints and all evidence of their connection with the magazine has been removed. The maps of Yorkshire, Scotland, Wales and Ireland engraved by T. Conder, and Leinster by Terry, all bear the imprint : " Published by Alex^r. Hogg, at the King's Arms, N°. 16 Paternoster Row."

The maps are arranged throughout the text in a very irregular manner as shown by the following list. The 195 plates of views of seats of the nobility, and archæological remains, are also intermixed, in a haphazard way, with the text.

Following the title-page is the Preface on two pages, a List of Subscribers on four pages and " A General History of Antient Castles, Forts, &c." with pagination 1–42. The text which follows is irregularly numbered, sometimes in duplicate, at the bottom. At the end : " Index List of the Plates " on four pages.

CARY, JOHN. CARY 1787

Cary's New and Correct English Atlas: being A New Set of County Maps from Actual Surveys. Exhibiting All the Direct & principal Cross Roads, Cities, Towns, and most considerable Villages, Parks, Rivers, Navigable Canals &c. Preceded by a General Map of South Britain, shewing The Connexion of one Map with another also A General Description of each County, and Directions for the junction of the Roads from one County to another. London. Printed for John Cary, Engraver, Map and Printseller, the corner of Arundel Street, Strand. Published as the Act directs. Sept^r. 1^st 1787. 4^to. 10 × 13 inches.

Each of the forty-six maps has its title engraved on a long vertically hatched panel which passes through a very neatly engraved star compass indicator, with: "By John Cary, Engraver" immediately below. The imprint on all the maps is: "London. Published as the Act directs September 1^st, 1787, by J. Cary, Engraver, Map & Printseller N^o. 188, corner of Arundel Street, Strand."

Following the title-page is the dedication: "To The Right Honourable Thomas Lord Visc^t. Weymouth, Baron Thynne of Warminster . . . This Atlas is . . . dedicated by . . . John Cary." The verso is blank. Then comes an "Advertisement," followed by a list of Subscribers on three leaves, after which is a list of "Contents" on a separate leaf with blank verso.

Each of the county maps is accompanied by a page of descriptive text, North Wales and South Wales having two pages each. At the end are eight leaves with pagination 1–17, containing: "Directions for the junction of the Roads"; list of "The Market and Borough Towns"; and "A List of the Principal Post and Sub-Post-Towns with their Receiving Houses." Sir H. G. Fordham, in his Catalogue of Cary's Engravings, etc., says "There is a second state of this atlas of the same date."

———— **A further re-issue of the 1793 edition.** **CARY 1793**

The Cambridge University Library possesses a copy of this edition which is wanting the dedication and advertisement. On the back of the list of contents is added a note, in eight lines, referring to the roads. There are some slight additions to the maps and the dates corrected. The letter-press accompanying the maps is reset throughout.

Sir H. G. Fordham possesses a copy of the 1793 edition.

For particulars see the following table :—

The four issues of this edition being somewhat complicated the following comparative table will be of some assistance to enable the student to understand the variations.

CCLXIV.

CARY 1809

———— Another edition, 1809.

The date of the title-page is corrected to July 1st, 1809. This is practically a new work as the whole of the letter-press is reset and the maps re-engraved. Except Westmoreland, which is undated, the maps bear the imprint: "London. Published by J. Cary Engraver & Map-Seller, N°. 181, Strand. July 1, 1809." They may be identified by the plate-mark which is half-an-inch beyond the border of the maps instead of quarter-of-an-inch as was the case with the earlier impressions.

The "Directions for the junctions of the Roads," including "Index to preceeding Routes," is enlarged to fourteen pages, and placed before the maps. The list of "The Market and Borough Towns" and "A list of the Principal Post and Sub-Post Towns" have a separate pagination (1–12) and placed at the end.

CCLXV.

CARY 1812

———— Another edition, 1812.

Same as the 1809 issue. The title-page and the maps, except Rutland which is still dated July 1st, 1809, have the date corrected to July 1st, 1812.

CCLXVI.

CARY 1818

———— Another edition, 1818.

At foot of title-page is: "Corrected to 1818." The dates are removed from all the maps and the imprints closed up.

CCLXVII.

———— Another edition, 1821. CARY 1821

At foot of title-page is : " Corrected to 1821." Sir H. G. Fordham possesses a copy of this edition in which the text, interleaved in earlier issues, is omitted.

CCLXVIII. CARY 1823

———— Another edition, 1823.

The address in the imprint of the title-page is altered to N°. 86, St. James's Street, followed by : " Corrected to 1823." The maps are undated and still bear Cary's Strand address as in the 1818 issue.

The Directions for the Junctions of the Roads and Index to the Routes are reset on pages 1–12. The list of the Principal Post and Sub-Post Towns is omitted leaving the list of " The Market and Borough Towns " on pages 1–4.

CCLXIX.

———— Another edition, 1827. CARY 1827

An edition, " corrected to 1827," is mentioned by Sir H. G. Fordham, in the Supplement to his *Hertfordshire Maps*.

CCLXX.

———— Another edition, 1831. CARY 1831

At foot of title-page is : " Corrected to 1831." In other respects it is the same as the 1823 issue.

The editions of 1809, 1812, 1818, 1823 and 1831 are to be found in the Cambridge University Library.

CAMDEN, GOUGH AND CARY 1806

——————— **The Second edition, 1806.**

This edition is in four volumes, each bearing the following imprint: "London: Printed for John Stockdale, Piccadilly; By J. Nichols and Son, Red Lion Passage, Fleet Street, 1806."

The maps are the same as the first issue with "Published by John Stockdale Piccadilly, 26th March 1805," added to the title of each one.

There are two additional maps: "Britannia Romana" and "Saxon England."

CARY 1790

CARY, JOHN.

Cary's Traveller's Companion; or, a Delineation of the Turnpike Roads of England and Wales; shewing the immediate Rout to every Market and Borough Town throughout the Kingdom. Laid down from the best Authorities, on a New Set of County Maps. To which is added, An Alphabetical List of all the Market Towns, with the Days on which they are held. London. Printed for John Cary, Engraver, Map & Printseller, Strand. 1st Jany 1790. 8vo. 4 × 6¼ inches.

A finely engraved work, printed on thin paper on one side only.

Following the engraved title-page is the "Advertisement" and list of "Contents." Then comes a map of England and Wales followed by maps of the counties of England, and North and South Wales. Each of the maps bear the title as shown in the list, with "J. Cary" before it and, "Engraver" after it; and at the bottom "London. Published Sepr 1, 1789 by J. Cary, Engraver No. 188 Strand."

The Cambridge University Library possesses a copy of the 1790 edition printed on thick paper and on both sides.

The titles are given at the top in vertically hatched panels formed by the borders of the maps. Rising from the tops of the panels are star indicators of the points of the compass. Yorkshire is a folded map, being eight times larger than the others.

At the end, on seven pages, is a list of "The Market and Borough Towns in England and Wales, with the days on which their markets are held." On the back of page 7 is: "Maps Printed for John Cary."

Sir H. G. Fordham, in his *Notes on British and Irish Itineraries and Road-Books, Hertford*, 1912, says: "The 'Traveller's Companion' is found in at least eleven editions, 1790, 1791, 1806, 1810, 1812, 1814, 1817, 1819, 1821, 1822, 1824, and 1828." I have seen only the 1790 and 1791 editions.

The copper-plates of this most interesting work are, according to Sir H. G. Fordham, now in the possession of Messrs. Gall and Inglis, Edinburgh.

Laurie and Whittle's New and Improved English Atlas, Divided into Counties: shewing Their Respective Situations, Boundaries, and Extent . . . Together with An Alphabetical List of the most remarkable Antiquities, Monasteries, Castles, Seats, and Parks . . . London: Printed and Published by Robert Laurie and James Whittle, N°. 53, Fleet-Street, 1807. obl. 11 × 8¾ inches.

A good many additions and corrections have been made in the forty-four original plates. A star indicator of the points of the compass is added to the title-panel partly obliterating the engraver's name. "Published October . . . 1806, by Laurie & Whittle, N°. 55 Fleet Street London." is added at the bottom of each plate.

The following are additional maps:—

1. England and Wales. 60 Statute miles [=$1\frac{3}{16}$ inches]. Published 1st. October 1810, by Robt. Laurie & Jas. Whittle 53, Fleet Street, London.
2. Isle of Wight . . . Engraved by B. Baker. Scale of miles, 5 [=$1\frac{7}{8}$ inches]. Published Octr 13th, 1806, by Laurie & Whittle, N°. 53 Fleet Street, London.
3. A General Map of Yorkshire . . . Scale, 16 [miles=$1\frac{1}{8}$ inches]. Published 12th October 1806, by Laurie & Whittle, N°. 53, Fleet Street, London.

Facing the title-page is the frontispiece bearing the title "English Atlas," with Laurie and Whittle's imprint. Following the title-page are three sheets: the first containing "Adertisement," the second: the "Contents," and the third (an engraved plate): "Explanation," at the bottom of which is "J. Bye sculp."

Each map is accompanied by a sheet of explanatory text.

BOWEN 1794

The English Atlas ; or, a Set of Maps of all the Counties in England and Wales, drawn from the best authorities ; containing all the cities, towns, villages, and churches, chapels, many noblemen's and gentlemen's seats, &c. Each map is illustrated with A General Description of the Borough and Market Towns ; the number of members returned to Parliament ; of land, state of inhabitants, etc., etc. . . . London, Sold by R. Martin, Bookseller, N°. 47, Great Queen Street, Lincoln's-Inn Fields. [1794]. fol. 11¼ × 18½ inches.

The list of maps is printed on the title-page, in double column, immediately above the imprint. The maps first appeared in *The Royal English Atlas . . . By Emanuel Bowen*, 1762. fol. They are reprinted without alteration, except the imprints which have been corrected. The fact that many of the maps are dated 1777, and some 1778, suggests that there was an edition of the *Royal English Atlas* of about that date, or possibly the maps were issued separately at that time. Martin's atlas could not have been issued before 1794, and may have been some years later, as many of the maps bear the imprint of Bowles and Carver who succeeded to the business of Carington Bowles in that year. Robert Wilkinson had already, in 1779, succeeded John Bowles.

R. Martin's name is not to be found in the London Directory at the address given on the title-page.

A copy of this atlas is in the Library of the Royal Geographical Society.

ANDREWS 1797

ANDREWS, JOHN.

Historical atlas of England ; physical, political, astronomical, civil and ecclesiastical, biographical, naval, parliamentary, and geographical ; ancient and modern ; from the deluge to the present time. In which are described its minerals, curiosities, inland fisheries and navigation, commerce, peerages, noblemen and gentlemen's seats, &c. Interspersed with geographical notes and dates for the curious, and explanations to each map, in order to enable persons of every rank to read, with advantage, the natural history, antiquities, poetry, belles lettres, and geography of this country. To which are added, a physical map of the Terrestrial Globe, to shew the connection of the great chains of mountains, seas and rivers, with those of Britain ; and a political chart of Europe, to shew the naval and commercial intercourse between this country and the Continent. Delineated in a series of interesting maps, the result of a variety of critical researches. By John Andrews, geographer, land-surveyor, map-seller, and engraver. London ; printed by J. Smeeton : sold by the author, No. 211, facing Air Street, Piccadilly. (Entered at Stationers Hall.) 1797.

The plates are numbered I—XIII. They all bear : " Drawn and engraved by J. Andrews." The imprint on II and III is " Publish'd as the Act directs June 17, 1796." The others are dated from July 1, 1796, to March 9, 1798.

The only copy known to me is in Advocate's Library, Edinburgh.

COOKE 1802-10

COOKE, GEORGE ALEXANDER.

The Modern British Traveller : or, Tourist's Pocket Directory. Being an accurate and comprehensive History and Description of all the Counties in England, Scotland, and Wales ; as also the adjacent Islands . . . By G. A. Cooke . . . illustrated with maps of the Counties, forming a complete British Atlas. London : Printed for C. Cooke, No. 17, Paternoster Row, by Brimmer & Co., Upper Mary-le-bone Street, and sold by all the Booksellers in the United Kingdom. [1802–10].

A most interesting work in twenty-five small octavo volumes, published in forty-seven, undated, parts, each with its own title-page and pagination forming an independent and complete work. The sub-titles are similar to the following : " Topographical and Statistical Description of the County of Berks, containing an account of its Situation, Extent . . . Civil and Ecclesiastical Jurisdictions, &c. To which is prefixed

a copious Travelling Guide . . . forming a Complete County Itinerary. Also a list of the Markets and Fairs . . . by George Alexander Cooke . . . Illustrated with a map of the county. London: Printed for C. Cooke," etc. They vary somewhat according to the products of the county concerned. COOKE 1802-10

The forty-six maps contained in the work are very similar in design and construction to those issued in *Wallis's New Pocket Edition of the English Counties* [1810]; but on slightly larger plates.

The maps were reprinted in: *Gray's New Book of Roads. The Tourists and Traveller's Guide to the Roads of England and Wales . . . by George Carrington Gray, London*, 1824. 12mo.

BUTTERS, R.

An Atlas of England . . . London. Printed and sold by R. Butters, N°. 22, Fetter Lane, Fleet Street. [1803]. 8vo. 4 × 7½ inches.

Consists of a map of England and Wales (which serves as a frontispiece) and forty maps of the counties of England. Many of the maps, including England, are drawn upside down. Except Norfolk and Northampton, whose titles are on the right-hand side, the titles of the maps are outside the border at the bottom. Below the imprint on the title-page is : " Price 6*s*. plain, and 10*s*. coloured." At the end, on seventy-six pages, is : " A Description of the Principal Roads in England," followed by : " An Alphabetical List of all Cities, Towns, and Villages, in England and Wales, with the Distance from London," on sixteen pages. The population is given from the Census returns of 1801.

The maps were re-issued in 1804 in *The Picture of England . . . By William Green.*

There is a copy of this atlas in the Cambridge University Library.

GREEN. WILLIAM. GREEN 1804

The Picture of England Illustrated with correct colour'd Maps of the several Counties. In two volumes By William Green . . . London: Printed for J. Hatchard Bookseller to his Majesty, Piccadilly. 1804. 8vo. 4¾ × 8 inches. 2 vols.

Volume 1 consists of a frontispiece showing Britannia sitting upon a lion, engraved title-page, preface on one page, introduction on pages I to IV, and a description of the counties (Bedfordshire to Leicestershire) on pages 1 to 195. Volume 2 contains a map of England as a frontispiece, engraved title-page and 248 pages of descriptive text of the remaining counties (Lancashire to Yorkshire). The accompanying maps are reprints of those issued in *An Atlas of England . . . London. Printed and sold by R. Butters*, etc. [1803].

The maps of Norfolk, and Northamptonshire have their titles removed from the right-hand side to the bottom, indications of the original title being still visible.

CARY, JOHN, AND STOCKDALE, JOHN. CARY AND STOCKDALE 1805

New British Atlas, being a complete Set of County Maps, on which are delineated all the Roads, Cities, Towns, Villages, Rivers & Canals; together with correct general Maps of England, Wales, Scotland & Ireland. London. Printed for John Stockdale, Piccadilly, 1805. fol. 13¼ × 20 inches.

Consists of engraved title-page and list of "Contents" with forty-three maps of the counties of England; and general maps of England, North Wales, South Wales, Northern part of Scotland, Southern part of Scotland, and Ireland. These were originally published in Camden's *Britannia* translated by Richard Gough, 1789, and re-issued, as now corrected, in the second edition in 1806.

CARY AND STOCKDALE 1805

The imprint: "Published by John Stockdale, Piccadilly, 26th March, 1805," is added below the title of each map.

The map of England is divided into twenty squares, marked with Roman numerals, to serve as an index to Stockdale's map of 1809.

The title-page is the same as the first issue with the date corrected to 1811. The maps are also dated 1811.

The only perfect copy of this edition known to me is in the Cambridge University Library.

There is, in the British Museum, an imperfect copy of this issue made up by maps of earlier dates. The title-page and map of Wales are wanting. The maps are dated 1811, both in the title and imprint, except Cornwall, 1806; Cumberland, 1801 both

in title and imprint; Devonshire, 1807 in the title and 1811 in the imprint; Hertfordshire, 1811 in the title, and 1801 in the imprint; Leicestershire, 1811 in title and 1801 in imprint; Northumberland, 1807 both in title and imprint; and Rutland, 1801 both in title and imprint. CARY 1811

Added to the imprint, on the title-page, is: "Corrected with additions to the year 1818."

The maps are the same as in the first edition; they all have the date 1818 following the title, and bear Cary's imprint with the same date.

At the end is an Index on pages 1 to 39, and on page 40 "Summary of England, Wales, and Scotland."

The Cambridge University Library has recently acquired a copy of this edition which is the only one known to me.

COLE, G., AND ROPER, J. COLE AND ROPER 1810

The British Atlas; comprising a complete set of County Maps, of England and Wales; with a general map of Navigable Rivers and Canals; and Plans of Cities and principal Towns. London: Printed for Vernor, Hood, and Sharpe; Longman, Hurst, Rees, and Orme; J. Harris; J. Cuthell; J. Cundee; W. Faden; J. and A. Arch; Crosby and Co.; J. Richardson; and J. M. Richardson, 1810. 4to. $8\frac{5}{8} \times 11$ inches.

COLE AND ROPER 1810

A very nicely engraved atlas consisting of title-page, list of contents, two maps of England and Wales, fifty-six county maps, and twenty-one plans of towns.

All the plates with the exception of Cheshire and Caernarvon are engraved by J. Roper from drawings by J. Britton, G. Cole, J. Hayman, Thomas Sharp, J. R. Thompson-Thornton, and George Young. The draughtsman's name is so given in the bottom left-hand corner of each plate. In the bottom right-hand corner is: "to accompany the Beauties of England and Wales." The imprint on each plate is: "London published for the Proprietors by Vernor and Hood, Poultry" and dated variously from 1804—1810.

These maps and plans were engraved for, and originally issued to accompany *The Beauties of England and Wales* by E. W. Brayley and J. Britton. The county maps were re-issued, without alteration, in *English Topography* by Joseph Nightingale 1816. They were again re-issued in an edition of the same work about 1820. In 1858 poor lithographic copies, with imprints and all traces of their former connection erased, were published in *Collins' Railway and Pedestrian Atlas of England. London: Darton & Co.*

There is a second copy in the British Museum with variations in the list of contents. In spite of this list showing fifty-seven maps and twenty-two plans, the plates are precisely the same as in the other copy; but coloured in hundreds instead of in outline.

The whole Engraved in the most accurate manner from the latest actual surveys. London : Published by J. Wallis, 1812. fol. 10½ × 16 inches.

The title is taken from the cover. It consists of forty-two very clearly engraved maps of the counties of England, coloured in hundreds, variously dated 1812 and 1813. Each map has, immediately below the title : " Engraved by J. Wallis." Except where otherwise stated, the imprint on the maps is : " London, Published by S. A. Oddy."

The University Library, Cambridge, possesses a copy of this work.

NIGHTINGALE 1816

NIGHTINGALE, JOSEPH.

English Topography : or, A Series of Historical and Statistical Descriptions of the several Counties of England and Wales. Accompanied by a map of each county . . . "Thee, O my Country ! All my Soul reveres, And Admiration swells with ripening years." London : Printed for Baldwin, Cradock, and Joy, Paternoster Row. 1816. 4to. $9\frac{3}{4} \times 12\frac{3}{4}$ inches.

Consists of a general map of England as a frontispiece, title-page, followed by a preface on two pages, signed : "J. Nightingale. London. October, 1816." After the preface is a map of the canals and rivers of England followed by : "Outline of the ancient and present state of England and Wales," on pages 5 to 17. On the back of page 17 is a "Table of Contents." Then come fifty-six maps of the counties of England and Wales, each accompanied by a sheet (in some case two sheets) of descriptive letterpress.

These maps were engraved for, and originally issued to accompany, *The Beauties of England and Wales*, and issued in the *British Atlas* dated 1810. Except for the general map of England, where the imprint, date, and engraver's name have been erased, they are unaltered impressions of the originals.

Sir H. G. Fordham, in his *Hertfordshire Maps*, 1907, notes a second issue of the *English Topography*, without date, published by James Goodwin and Thomas McLean, instead of Baldwin, Craddock, and Joy. The preface still retains the date October 1816 ; but the dates and imprints of all the maps are erased.

ROWE 1816

ROWE, ROBERT.

The English Atlas. Being a new & complete Set of County Maps, divided into hundreds, exhibiting the direct and cross Roads, Cities, Towns, Villages, Parks, Rivers and navigable Canals, with the distances marked between the towns and from London. Preceeded by a general map of England and Wales, shewing the connection of the respective maps. By Robert Rowe, Geographer. London : Printed for R. Rowe, 19, Bedford Street, Bedford Row, 1816. Printed by Joyce Gold, 103, Shoe Lane, Fleet Street. fol. 11 × 17 inches.

This appears to be somewhat rare. The only copy known to me was recently acquired by Mr. Hugh Todhunter, Broadway, Worcestershire.

Contains forty-six maps, Yorkshire being in four sheets and Wales in two. The title in the cartouche on each map reads : "A New Map of the County of ———— divided into hundreds. By R. Rowe."

Possibly Phelps issued an edition of Langley's *Atlas of England and Wales* with all the maps bearing his imprint and dated 1820, as there are, in the British Museum, maps of Norfolk and Kent with his imprint and so dated.

ROBINS 1819

ROBINS, J.

Robins's Atlas of England and Wales, Accurately Engraved by Neele, from the Latest Surveys. London. Published by J. Robins & Co., Albion Press, Ivy Lane, Paternoster Row, 1819. 4to. 9 × 11½ inches.

A very neatly engraved atlas consisting of an engraved title-page (with a view of London, drawn and engraved by J. Greig, between the title and imprint) and forty-five coloured maps. With the exception of Northamptonshire, which is published by James Cundee, the imprint on each map is : " Published by J. Robins & Co., Albion Press, London, January 1st " and most of them are dated 1818. In the bottom right-hand corner is " Neele sculpt. Strand."

In a list of works published by J. Robins and Co., inserted at the end of vol. 4 of *The New British Traveller . . . by James Dugdale*, 1819, is " Robins's *British Atlas*, comprising a series of County Maps on Royal quarto, engraved by Neele. . . . In 9 parts, price 4*s*. each, or 2*l*. 2*s*. half bound." The atlas was, apparently, issued in parts. Some of the maps are dated 1812 and others bear indications of an earlier date than 1818 to which they have been corrected.

DUGDALE, JAMES.

DUGDALE 1819

The New British Traveller, or, Modern Panorama of England and Wales . . . by James Dugdale LL.D. Illustrated by a complete set of correct maps, views of public buildings, antiquities, &c. &c. London : Printed and published by J. Robins and Co., Albion Press, Ivy-Lane, Paternoster-Row. 1819. 4to. 8 × 10½ inches.

With the exception of the imprints, the maps in this work are precisely the same as those in Robins's *Atlas of England and Wales* 1819. Many of the maps in the British Museum copy are cropped and the imprints and dates sacrificed ; but, according to Sir H. G. Fordham the maps are variously dated, and published by James Cundee, 1812—1814 ; J. and J. Cundee, 1814, 1815 ; and J. Robins and Co., 1818, 1820.

The work, though dated in each of the four volumes 1819 was probably not actually issued before 1820, as it contains maps of that date.

A very neat little volume consisting of an engraved title-page, with a landscape

LEWIS 1819

between the title and the imprint, having a coach with postillions in the foreground. Following the title-page is the "Preface," on two pages, dated: "London: Oct. 16, 1819"; a sheet containing the "Contents"; a "List of Mail-Coaches, with the Inns they set out from, and the Towns they pass through"; "Rates of Postage, from the General Post-Office, Lombard-Street, to any place in England or Wales"; and "A Table of the charges for a pair of Post-horses, in any Stage, from five miles to twenty," etc. Then follow the maps of the counties of England together with maps of North and South Wales. Each map is accompanied by a sheet of descriptive letter-press. The general map of England is placed as a frontispiece.

These maps were originally issued in Wallis's *New Pocket Edition of the English Counties* [1810]. The original imprints are erased and: "London. Publish'd by W. Lewis, Finch Lane," substituted. All the plates have been altered considerably and the etching along the coast lines rubbed out; the roads, too, have been re-engraved and made bolder in order to be more serviceable to travellers. Some of the plates have been entirely re-engraved—notably Lincolnshire. The etching around the coast on the map of England is imperfectly obliterated, and a considerable number of names added.

The Pocket Tourist & English Atlas, being A New and Complete Set of County Maps, Exhibiting the whole of the Turnpike Roads, Cities, Market Towns, Great Rivers, and Navigable Canals with the Distances from London. Also the number of Acres & Inhabitants, &c. &c. Including a Copious Topographical Account of each County. London : Printed for O. Hodgson, Maiden Lane, Wood St. [1820]. **$3\frac{1}{4} \times 5\frac{1}{4}$ inches.**

This tiny atlas is engraved throughout and contains title-page, plate with "Explanation," list of "Contents," and maps of the English counties together with maps of England, North Wales, and South Wales. Each map has a note at the bottom giving the number of acres, cities, towns, inhabitants, etc. The population is given from the census returns of 1811.

Although the title-page promises a "Copious Topographical Account of each County" there is no descriptive text in the British Museum copy.

London : Printed by J. Wallis, Berwick Street, Soho ; and Published by W. H. Reid, Charing Cross, [1820]. 8o. 3 × 4¾ inches.

A neatly engraved little atlas containing a considerable amount of useful information for the traveller.

The only copy I have seen is in the possession of Dr. F. B. Penfold, Fetcham Holt, Leatherhead.

REID AND WALLIS 1820

On the cover is : " The Panorama of England and Wales," and on the back cover : " London. Publish'd by W. H. Reid, Charing Cross. Twelve shillings."

The work consists of an engraved title-page : " The Panorama of England and Wales," with Post-chase at the top and sheaves of corn at the bottom. This is followed by an engraved table of " Contents." with blank verso ; then comes the printed title-page on the verso of which is : " Index to the counties of England & Wales." After the title is : " Address to the Public," with " Errata " on the back. Between the Map of England and Wales and the county maps is an engraved title : " English Counties " with an ornamental border. The interleaved descriptive text is paged 1 to 158. Following the maps on pages 159 and 160 is : " List of Mail-Coaches. With the Inns they set out from, & the Towns they pass through." Page 161 bears : " Rates of Postage," and " A Table of the Charges for a Pair of Post Horses," with imprint at foot of page : " Printed by J. Wallis, 77, Berwick Street, Soho."

LEIGH 1820

LEIGH, SAMUEL.

Leigh's New Atlas of England and Wales . . . London, 1820. 12mo.

In the introduction of Leigh's *Picture of England and Wales*, 1820, it is stated that: "The proprietor has availed himself of the talents of Mr. Sidney Hall to project a

series of correct county maps, the same size as this book, which may be had in a separate volume, with a complete Index of the towns, villages, etc." LEIGH 1820

For description see the 1825 edition, accompanying Leigh's *New Pocket Road-Book*, etc.

Leigh's New Atlas of England & Wales. Sy. Hall sculpt. London Published by Samuel Leigh, 18, Strand. With Leigh's New Pocket Road-Book of England, Wales, and part of Scotland . . . London : Printed for Samuel Leigh, 18, Strand, 1825. 12mo. $3\frac{1}{4} \times 5\frac{1}{2}$ inches.

A very neat little atlas engraved throughout by Sidney Hall, presumably, first issued in 1820 with Leigh's *New Picture of England and Wales*. The atlas consists of an engraved pictorial title-page and fifty-five maps of the counties of England and Wales; each bearing, in the bottom left-hand corner, the imprint: "Pub. by S. Leigh"; and, in the right-hand corner: "Sidy Hall sculpt." The general map of England given at the end of the list accompanies the Road-Book.

The atlas was sometimes issued separately, but generally, as in the British Museum copy, bound up with the Road-Book.

SMITH 1822

SMITH, CHARLES.

Smith's New English Atlas, being a reduction of his large folio atlas Containing a Complete Set of County Maps on which are Delineated All the Direct & principal Cross Roads, Cities, Towns, & most considerable Villages, Parks, Rivers, and Navigable Canals: Preceded by A General Map of England & Wales. The whole carefully Arranged according to the Stations & Intersections of the Trigonometrical Survey of England. London: Printed for C. Smith, Mapseller extraordinary To His Majesty No. 172, Strand, 1822. 4to. 8⅞ × 11 inches.

A finely engraved set of forty-two maps by Gardner and Pickett, similar in construction to those in Cary's *New and Correct English Atlas*, 1787. The roads are the principal feature. Each map bears the imprint: "Printed for C. Smith, No. 172 Strand, 1822." The engraved title-page is without a border. In the bottom right-hand corner is "Pickett Scrip. et sculp." Following the title-page is a plate containing the: "Contents" and "Explanation."

The only copy known to me is in the Cambridge University Library.

GRAY, GEORGE CARRINGTON. GRAY 1824

Gray's New Book of Roads. The Tourists and Traveller's Guide to the Roads of England and Wales, and part of Scotland, on an entirely new plan, whereby the different lines of route leading to any required point of distance are brought under notice at one reference . . . The Great Roads, each distinctly given . . . and the Cross Roads . . . . with a very copious General Index, forming . . . a comprehensive . . . . Itinerary. By George Carrington Gray. London : Printed for Sherwood, Jones, and Co. Paternoster Row, 1824. 12mo. 4½ × 5¾ inches.

This neat little work consists of a frontispiece, formed by a picture of a toll-gate with horsemen paying toll, bearing the title : " Gray's Book of Roads. On an entirely new Plan," and, at the bottom : " Price seven shillings bound, or, with a series of maps, forming a complete county atlas, twelve shillings bound." This is followed by a sheet with : " Topographical works of Popular Interest published by Sherwood & Co.," then comes a map of the Roads of England, Published by Sherwood & Co., 1824, followed by the title-page, on the back of which is a note referring to the maps and roads. Following the title-page, on three leaves, are the preface, the Mail Coach Routes from London, a Table showing the distances on the Thames, and Explanation of the plan adopted in the arrangement of the Direct Roads from London. Then comes the Itinerary of the Main Roads on pages 1 to 86, followed by the " Cross Roads " on the verso of the last page of which is " References to the Maps," in two columns.

The maps are reprints of those issued in *The Modern British Traveller*, or, *Tourist's Pocket Directory . . . By G. A. Cooke, London*, 1802–10. They are now numbered,

GRAY 1824

in the top right-hand corner, 1–47, and, at the bottom of each map is a note referring to the colours. Derbyshire is superseded by: "A Map of Derbyshire and part of the seven adjacent counties . . . By John Farey, Sen^{r}. Mineral Surveyor. A scale of English miles, 10 [=1½ inches]. J. Farey, jun^{r}. script. Neele sculp^{t}. The map of Scotland is replaced by: "South of Scotland. London. Pub^{d}. Sep^{r}. 8, 1823, by Sherwood Jones & Co. Paternoster Row. Neele & Son, Strand." There are two additional maps: (1) The Lakes. Scale of miles, 10 [=1$\frac{3}{16}$ inches]. Neele & Son sc., Strand. (2) The Isle of Thanet. London: Pub^{d} for the Proprietors, by Sherwood & Co., May, 1, 1817. At the end is an Index in fourteen leaves, on the last of which is an errata.

PINNOCK, WILLIAM.

Pinnock's History and Topography of England and Wales. in six volumes . . . London: Printed for Geo. B. Whittaker, Ave-Maria Lane, 1825. 3¼ × 5⅜ inches.

Very similar to *The Modern British Traveller* by G. A. Cooke 1802–10, though not so neatly prepared. It was issued in the same way having a separate part for each county with independent title and pagination. The first published being Bedfordshire and Berkshire in 1819, under the sub-title of: "Pinnock's County Catechisms. The History and Topography of Bedfordshire, with Biographical Sketches, &c. &c. and a neat map of the county. London: Printed for Pinnock and Maunder, 267, (St. Clement's Church-Yard) Strand. 1819." Berkshire has a similar title, but the remainder have at the head of the titles: "Pinnock's County Histories." The earlier issues were published by Pinnock and Maunder, the later ones by G. and W. B Whittaker.

Each of the six volumes has the general title-page dated 1825.

PINNOCK 1825

The maps, many of which in the British Museum copy are closely cropped, are all engraved by Neele and Son whose name and address appear in the bottom right-hand corner. The dates given within square brackets, in the list of maps, are taken from the title of the part concerned.

COOKE 1830 COOKE, GEORGE ALEXANDER.

The Modern British Traveller, etc.

The series of County Histories making up this work was probably reprinted about 1830. There is in the British Museum a volume for Devonshire described on the title-page as the " Third Edition " ; and another for Cheshire described as " A New Edition," both dated on the frontispiece 1830.

TEESDALE 1830 TEESDALE, HENRY.

A New Travelling Atlas, containing a complete Set of County Maps, on which are Delineated all the Mail & Turnpike Roads, The Cities, Towns, Parks & Gentlemens Seats Preceded by General Maps of England & North & South Wales. The whole Revised and Corrected to the year 1830. London Published by Henry Teesdale & Co., 302, High Holborn. Sm. 4to. $6\frac{3}{4} \times 8\frac{5}{8}$ inches.

Forty-five clearly engraved coloured maps of the counties of England, all bearing the imprint of Henry Teesdale and dated 1830. The roads are the principal feature of the maps. The engraved title-page is without a border. Above the imprint is a small oval view of five cherubs apparently taking a lesson in geography. Following the title-page is an engraved plate, with ornamental border, containing the " Contents."

The only copy of this work known to me is in the University Library, Cambridge.

Possibly there was a latter issue. There is, in the same library, a copy of the Map of Cambridgeshire showing the " London & Cambridge Railway," which was opened 29th July, 1845. No. " 7 " is added to the top right-hand corner, and the imprint is erased.

PIGOT & CO. 1831

PIGOT, JAMES, & Co.

Pigot & Co.'s British Atlas, of The Counties of England, with A Map of England and Wales, and A Circular one of the country round London, to the distance of fourteen miles ; the whole engraved on steel plates, and embellished with a correct graphic series of vignettes of the Cathedrals and some of the handsomest Churches in England ; accompanied by topographical accounts, exhibiting the general statisticks of each county ; its ancient history, and modern localities, and divisions ; commerce, manufactures, and population ; tables of distances, &c. The entire prefixed by comprehensive reciprocal distance tables, of the Principal Towns in Great Britain, &c. And an itinerary of the most useful and generally travelled Mail and Coach Routes throughout the United Kingdom. Published by J. Pigot & Co. Basing Lane, London, and Fountain Street, Manchester : and sold by them and the following booksellers :—Simpkin and Marshall, Stationer's-Court, Ludgate Hill ; Sherwood and Co. Paternoster-row ; Winchester and Varnham, 61, Strand ; Effingham Wilson, and John Richardson, Royal Exchange ; Hatchard and Son, Piccadilly ; and by all respectable booksellers in the Kingdom. 1831. fol. $11\frac{1}{2} \times 16\frac{1}{4}$ inches.

An elegant atlas consisting of title-page, with a view of a group of churches at the top and, at the bottom, between the imprint and date : " Price, with Coloured Maps, neatly made up in boards £2 10*s*. 0*d*. Extra Coloured, and the maps mounted on Cloth £4 0*s*. 0*d*. Ditto, Ditto, elegantly bound, and gilt £4 10*s*. 0*d*." This is followed by an " Address " and list of maps ; two pages with : " Routes from London," " Provincial Routes," " Routes in Scotland," " Routes in Ireland," and, " Reciprocal Distance Table of the principal towns in England." There are forty-one maps very clearly " Engraved on Steel by Pigot & Son Manchester." The county maps are embellished with views of churches, and each accompanied by a sheet of text giving the population from the census returns of 1821.

The address in the imprint on the maps varies : Essex, Hertford, Kent, Middlesex, Surrey, Sussex, and London having 1, Basing Lane, London, and Fountain St., Manchester ; Beds, Berks, Cambridge, Cornwall, Cumberland, Devon, Dorset, Gloucester, Hants, Huntingdon, Monmouth, Norfolk, Northampton, Oxford, Somerset, Suffolk, and Wilts were issued from 17 Basing Lane and Fountain St., Manchester ; Bucks, Cheshire, Derby, Durham, Hereford, Lancashire, Leicester and Rutland, Lincoln, Northumberland, Nottingham, Shropshire, Stafford, Warwick, Wesmorland, Worcester, Yorkshire, bear the address of 24, Basing Lane and Fountain St., Manchester.

The county maps were probably issued, in groups, in Pigot & Co's National Commercial Directory at an earlier date.

The first appearance of Pigot & Co in the London Directory is at 24 Basing Lane, in 1828. In 1830 their address is given as 17, Basing Lane and in 1832 No. 1 Basing Lane, where they continued until 1837 when they removed to 59, Fleet Street. By the various addresses we are able to give an approximate date to the maps.

The only copy of this edition known to me is in the Cambridge University Library.

Additional maps :—**Pigot and Co's New Map of Ireland . . . Scale of Irish miles, 40 [=4 inches]. Published by Pigot & Co. Basing Lane, London & Fountain St., Manchester, 1834.**

Pigot & Co's New Map of Scotland . . . British statute miles, 60 [=4½ inches]. Published by Pigot & Co., 59, Fleet Street London, and Manchester, 1837.

The imprint on the county maps is corrected to: "Published by Pigot & Co., 59, Fleet Street, London & 18, Fountain St., Manchester." The date on the map of England and Wales is made 1838, and that on the map of the Environs of London 1839.

On the verso of the text of each map, statistics from the census returns of 1831, and from the Reform Bill of 1832, are added.

CCCCXXVII.

PIGOT & CO. 1840

——————— **Another edition, 1840.**

The dates on the maps of England, Ireland and Scotland are corrected to 1840 ; but the map of the Environs of London still bears the date 1839. The population is given from the census of 1831.

This, and the 1844 edition, is in the University Library, Cambridge.

CCCCXXVIII.

PIGOT & CO. 1844

——————— **Another edition, 1844.**

The title-page is corrected to :—**Pigot & Co.'s British Atlas . . . London : All engraved on Steel Plates Accompanied by Distance Tables of the Principal Towns in England, Scotland, Ireland, and Wales. Besides smaller County Tables, containing all the chief Towns in each of the English Shires. J. Slater, Printer, Fountain Street, Manchester.**

The census numbers given are those of 1841.

Following the "Address," which is the same as the former issues, are two sheets containing : "Distance Table of 72 Principal Towns in England and Wales," "Distance Table, in English miles, of 73 Principal Towns in Ireland," and "Distance Tables of the Principal Towns in the English Counties."

The maps of England, Ireland, and Scotland are still dated 1840, and, the Environs of London, 1839.

There is no text accompanying the county maps.

Judging by the railways shown in Gloucestershire this edition was probably issued in 1844.

CCCCXXIX.

———— Another edition, 1857. PIGOT & CO 1857

The title-page is corrected to :—**I. Slater's new British Atlas, . . . Published by Isaac Slater (late Pigot & Slater), Fleet Street, London ; Fountain Street, and Portland Street, Manchester : and sold by him and the following booksellers : Simpkin, Marshall & Co., etc.**

The population is given from the census returns of 1851. The maps of England and Scotland are dated 1854, and Ireland 1853. The date is erased from the map of the Environs of London. All the maps bear the imprint : " Published by J. Slater, Fleet St. London, and Fountain St., Manchester." The atlas is not dated ; but it was probably published in 1857 or early in 1858 as it was received in the British Museum, under the Copyright Act, May 25th, 1858.

COBBETT 1832

COBBETT, WILLIAM.

A Geographical Dictionary of England and Wales . . . each county is also preceded by a Map, showing, in the same manner, the local situations of the Cities, Boroughs and Market-towns . . . By William Cobbett. London : Published by Wm. Cobbett, 11, Bolt-Court, Fleet-Street . . . 1832. 8vo. 5⅛ × 7½ inches.

Contains fifty-two outline maps of the counties of England and Wales with a general map. The maps are very poor, simply giving the towns and county boundary. The names of the counties are given in long panels ; and below the border of each map is : " Drawn & Engraved for Cobbett's *Geographical Dictionary of England and Wales.*"

———— Another edition, 1843. DUGDALE 1843

Sir H. G. Fordham possesses a copy in four volumes—two of letterpress, one of views, and one of maps. He states in his *Hertfordshire Maps*, that many of the maps bear the imprint : " Drawn and engraved for Dugdale's England and Wales Delineated," and that the population cited in the text is that of 1831.

CCCCLXVI.

———— Another edition, 1848. DUGDALE 1848

A very nicely prepared work in three volumes, each containing an engraved title-page and frontispiece, with numerous finely engraved topographical views. The pagination, 1–1586, is continuous throughout the three volumes. The fifty-eight maps are " Drawn & engraved by J. Archer, Pentonville, London," the statement being given in the bottom right-hand corner of each map. The imprints referred to in the 1843 issue are erased. The maps are arranged alphabetically throughout the three volumes, but each one bears a number which shows that they were arranged differently in a former issue, probably in a separate volume. The Welsh counties bear the highest numbers. The population is given from the census returns of 1831. The text is, apparently, the same as the earlier issues ; but some of the views and the addition of railways on the maps suggest a later date.

At the end of volume 3 is " An Alphabetical Chronology of Remarkable Events . . . by Leonard Townsend. London : Tallis & Co., Green Arbour Court, Old Bailey." There is an engraved title-page, with a view of " The New Gresham College," drawn by T. H. Shepherd, and engraved by J. Tingle ; and frontispiece with : " Lord Hill's Column at Shrewsbury," drawn by T. H. Shepherd, and engraved by J. Brown. It consists of 140 pages of text and nineteen finely engraved portraits of some of the most famous men in English History.

DUGDALE 1854-60

———— Another edition, 1854–60.

Dugdale's England and Wales Delineated, edited by E. L. Blanchard. London : L. Tallis, 21, Warwick Square, Paternoster Row. [1854–60]. 2 vols. fol. 6 × 9¾ inches.

This edition was issued in fifty parts from 1854 to 1860. It is entirely reprinted, with considerable additions. The pagination 1–1582 is continuous throughout the parts. The maps are the same as the original issue, with additions to railways, and are arranged in alphabetical order. At the end of each volume are three engraved title-pages accompanied by frontispieces. This indicates that the original work was probably issued in six volumes.

MOULE 1837

———— Another edition, with title as above. 1837.

A splendid work, containing fifty-eight maps and plans embellished by topographical views, coats of arms (some of which are named), elaborately decorated borders, and symbolical pictures. Engraved by James Bingley, John Dower, and W. Schmollinger. Some of the plates bear the imprint of G. Virtue. Others have : " Engraved for Moule's English Counties," etc., at the bottom ; but Dorset, Isle of Wight, Bath, Environs of Bath and Bristol, Lincolnshire, and Westmoreland are without imprints. Volume 1 has a frontispiece with a portrait of William IV, and, in a cartouche at the bottom, " The English Counties Delineated." On a scroll, at the top : " Chorographica Britanniæ." Following the title is " The Table of Contents " on one leaf, and the " Preface " on two leaves, with an introduction on pages I–XXIV.

Several pages of text accompanies each county map giving a short account of the county, and the parishes, which are arranged according to the hundreds.

In addition to the printed title, volume 2 has an engraved title-page, entitled : " The English Counties in the Nineteenth Century. By Thomas Moule, author of Bibliotheca, Heraldica, &c. &c. London. Printed by G. Virtue, Ivy Lane, Paternoster Row." In the middle of the plate is a view of " Greenwich Hospital, Drawn by W. Bartlett. Engraved by J. Hinchliff." At the end is an index occupying pages 495–582.

WALKER 1837 ———— **A reprint, 1837.**

This was issued after the accession of Queen Victoria and has the following dedicatory title: "To Her most Excellent Majesty Queen Victoria; and to Her Royal Highness the Duchess of Kent, this British Atlas . . . is . . . dedicated." The imprint and date are the same as the first issue.

A copy of this is in the Cambridge University Library.

CCCCLXXVII.

WALKER 1841 ———— **Another edition, 1841.**

The imprint is corrected to: "Published March 1, 1841, by Longman, Rees & Co. . . . . & J. & C. Walker, 9, Castle Street, Holborn."

The maps are accompanied by a sheet of letter-press, printed on one side only, containing statistical tables, with tables of distances drawn up on the scheme invented by John Norden. The only copy of this edition known to me is in the possession of Sir H. G. Fordham, of Odsey, Herts.

CCCCLXXVIII.

WALKER 1846 ———— **Another edition, 1846.**

Possibly an edition was issued at this time, as separate county maps are met with dated 1846.

CCCCLXXIX.

WALKER 1852 ———— **Another edition, 1852.**

Same as the 1841 issue.

A copy of this is in the Cambridge University Library.

CCCCLXXIX*a*.

WALKER 1861 ———— **Another edition, 1861.**

Following the title are five sheets, printed on one side only, containing "Statistical Table" with tables of distances. The maps are undated; but bear the original imprints, except Dorset, Kent, and Northumberland which have: "Published by J. & C. Walker, 9, Castle St., Holborn, London." Leicester and Suffolk have "Longman, Orme, Rees & Co. Paternoster Row," and Norfolk has "Published by Longman & Co., Paternoster Row." The maps of Scotland and South Wales are without imprints. There are two additional maps: Ireland . . . 70 English miles [=3⅝ inches], and Scotland . . . 60 English miles [=3 inches].

The only copy known to me is in the Cambridge University Library.

CCCCLXXX.

WALKER 1862 ———— **Another edition, 1862.**

With the exception of additions to railways, and the imprint: "Published by Longman, Rees, Orme, Brown & Co., Paternoster Row. London." added to the map of South Wales, this is precisely the same as the 1861 issue.

CCCCLXXXI.

WALKER 1870

——————— **Another edition, 1870.**

The date is corrected to 1870. The imprints on the maps of England, Ireland, and South Wales have been erased. Those of Devonshire, Essex, Hertford, Surrey, and Sussex are corrected to: "London. Published by J. & C. Walker, 9, Castle St., Holborn."

The railways are brought up to date on all the maps.

FISHER, SON & CO. 1842-45

FISHER, SON & Co.

Fisher's County Atlas of England and Wales. Compiled from authentic Surveys, and corrected to the present time. With a topographical and statistical description of each county . . . Fisher, Son & Co., Caxton Press, Angel Street, St. Martin's-le-Grand, London ; Post-Office Place, Liverpool ; Piccadilly, Manchester. [1842–45]. 4to. 12 × 14½ inches.

A very nicely prepared atlas, began, apparently, by James Gilbert of Paternoster Row whose name and imprint appear on the plates of the first seven county maps. On maps 9, Gloucester, and 10 Oxford, Gilbert's name is given in the bottom left-hand corner ; but the imprint is that of Fisher, Son & Co. All the maps which have Gilbert's name were engraved by J. Archer, and published for the proprietor, M. Alleis ; but when Fisher & Co. took up the work the maps were drawn by F. P. Becker & Co., and " Engraved on Steel by the Omnigraph. F. P. Becker & Co. Patentees," is given in the bottom right-hand corner of the plates. The only legend, however, on the maps of Cumberland and Westmorland is Fisher's imprint.

FISHER, SON & CO. 1842-45

The work consists of title-page, preface (on the back of which is the list of "Contents") and forty-eight maps accompanied by ninety-six pages of descriptive text. It was issued, in part, from 1842 to 1845.

WYLD, JAMES.

WYLD 1842

Wyld's Atlas of English Counties. London, 1842. 4o.

I have not seen this atlas; but in *The London Catalogue of Books published in Great Britain from* 1814–1846 is the entry: "Wyld's Atlas of English Counties. 4to. hf.-bd., cal. 3 . 3 . 0 Wyld." The following maps, which are in the British Museum, are probably from this atlas. They all bear the imprint: "London. Published by Jas. Wyld, Charing Cross East." They were received by the British Museum 1st November 1843. The maps bear a strong resemblance to those in Cary's *New and Correct English Atlas*.

DARTON AND CLARK.

DARTON AND CLARK 1842

The Miniature Road-Book of Hampshire shewing the distances and routes from one town to another, and from each to London. With a Map, a Population Table, comprising the census of 1841, and various other topographical information. London: Darton and Clark. [1842]. 24mo. 2¼ × 2¾ inches.

It was the intention of the publishers to issue a series of these tiny Road Books of the Counties of England as shown in the preface of those known to me. It is there stated that "The whole of the Counties of England, treated in the same manner, will form four small volumes."

The British Museum possesses copies of Hampshire, Isle of Wight, Kent, Surrey, and Sussex. These were received by the Copyright Office of the British Museum on the 7th August, 1842. I am not aware of the existence of any other counties and possibly they were never published.

They are neat little books, all prepared in precisely the same way and bearing the same form of title. They contain a Preface, printed partly on the back of the title-page, "Directions for using the work," a "Topographical notice" of the county on two pages, a list of the towns giving the population for 1831, a tiny map of the county, that of Kent bearing the name "Geo. Wall," a description of the roads; a "Table showing the total amount of the population . . . according to the Census of 1801, 1811, 1821, 1831, and 1841, and, at the end, the "Great Direct Road" through the county shown in the form of a diagram.

REYNOLDS, JAMES. REYNOLDS 1848

Reynolds's Travelling Atlas of England : with all the Railways and Stations accurately laid down. Constructed from the Surveys of the Board of Ordnance, Railway Companies, and other authorities. London : Simpkin, Marshall & Co. Stationer's Court ; and James Reynolds, 174, Strand, 1848. 8vo. 5 × 7 inches.

A poorly prepared atlas, consisting of title-page, index of maps, and thirty-two clearly engraved plates, each of which bears in the bottom left-hand corner : " Drawn & Engraved by John Emslie," and the imprint : " Published by J. Reynolds, 174, Strand." The maps are numbered in the bottom right-hand corner. It will be noticed that in some cases as many as three and four counties are given on a plate.

These maps were re-issued, geologically coloured, in Reynolds's *Geological Atlas of Great Britain*, 1860 ; and later editions. They were also reproduced, in 1864, in : " Portable Atlas of England and Wales," etc.

Maps—

1. ENGLAND AND WALES . . . English miles, 100 [=1¾ inches].

COLLINS 1852

———— Another edition, 1852.

This edition was issued in parts during April, May, and June, 1852.

The imprint, both on the title-page and on the maps is corrected to: "London: Published (for the Proprietors) By W. S. Orr & Co., 2, Amen Corner, Paternoster Row."

The British Museum copy is imperfect, wanting the list of maps and the four maps of Worcestershire and Yorkshire. This may have been a part that was never issued.

REYNOLDS, JAMES.

REYNOLDS 1860

Reynolds's Geological Atlas of Great Britain, comprising a series of Maps in which the Roads, Railways, and geological features of England and Wales are accurately laid down : with a Geological Map of Scotland . . . London : Published by James Reynolds, 174, Strand, 1860. 8vo. 5 × 7½ inches.

On the back of the title-page is the list of maps, following which are pages 1—16 giving a description of the " Geological Structure of Great Britain," then comes a leaf with a description of the atlas, and, on the back : " Geological References."

The maps are geologically coloured impressions of those issued in Reynolds' *Travelling Atlas*, 1848, with a " Geological Map of Scotland," added.

DXLIII.

———— New edition, 1864.

REYNOLDS 1864

The title-page is reset and corrected to : " Reynolds's Geological Atlas of Great Britain ; comprising a series of maps geologically colored, preceded by a description of the Geological structure of Great Britain, and the Geological features of the several counties of England & Wales, mineral products &c ; with sections & views. New edition. London. Published by James Reynolds, 174, Strand." 8vo. 5 × 6¼ inches.

There is a second title-page which is the same as the above, but differently set up, and the statement : " From the best authorities " inserted between " A series of Maps geologically coloured," and " Preceded by," etc.

The frontispiece is a " Comparative view of the mountains and hills of England and Wales," etc. On the verso of the second title-page is " Index to Maps," followed by a note by the editor on the back of which is : " Geological Reference." The text is re-written on thirty-two pages, with views and sections incorporated.

REYNOLDS 1864

The plates have been reduced by the removal of the outer border lines and imprints. The numbers of the maps are now placed within the border in the bottom right-hand corner.

The map of Scotland is replaced by a new map: "Engraved by Becker's patent process on steel." Scale, 50 miles=$1\frac{11}{16}$ inches.

The thirty-two county maps were also issued in *Portable Atlas of England and Wales by James Reynolds*, [1864].

DXLIV.

REYNOLDS 1889

——————— Second edition, 1889.

The title-page is the same as the second one in the 1864 edition, but with the back plain. The preface follows the title, on the back of which is "Index to Maps." The "Geological Reference" is placed on an open sheet with a list of: "Some of the principal fossils in each stratum." The text is increased to forty-eight pages, the last eleven being the "Tourists Guide to the principal places of interest," etc. Added to each of the maps is Reynolds' imprint and an index diagram. The map of Scotland is again changed, the present one being on a slightly larger scale, *i.e.*—40 miles=$1\frac{1}{2}$ inches, the 1864 issue being 40 miles=$1\frac{1}{4}$ inches.

The thirty-two county maps were re-issued in Stanford's *Geological Atlas of Great Britain . . . By H. B. Woodward . . .* 1904.

WEEKLY DISPATCH. WEEKLY DISPATCH 1863

The Dispatch Atlas. London: Published at the "Weekly Dispatch" Office, 139, Fleet Street, London, and sold by all Booksellers and Newsagents, 1863. fol. $13\frac{5}{8} \times 18\frac{7}{8}$ inches.

A very fine collection of maps consisting of a map of the world, sixty-five of Great Britain and Ireland, twenty-six of Asia, seventeen of America, and nine of Australia and the Pacific. Drawn and engraved by B. R. Davies, John Dower, T. Ettling, J. W. Lowry, and Edward Weller. In the bottom left-hand corner of each map is: "Weekly Dispatch Atlas, 139, Fleet Street," and near the title is an emblematical design formed by the upper half of a globe with a scroll upon which is engraved: "The Dispatch Atlas," and, above, a flying figure of Mercury.

These maps originally appeared in the *Weekly Dispatch* newspaper from 1856 to 1862. They were then collected together and issued as above. The maps of Great Britain and Ireland were re-issued in monthly parts from 1863 to 1867 by Cassell, Petter and Galpin. They were then published collectively with the title: "Cassell's British Atlas," by Cassell, Petter and Galpin, without date.

The general maps of the world were also re-issued in like manner by the same firm.

The plates of the county maps were acquired by G. W. Bacon & Co., and re-issued in 1876 under the title: *Bacon's New Quarto Atlas . . . of the Counties of England.* In 1883 they were again issued by Bacon & Co. with the title *New Ordnance Atlas of the British Isles.* In 1913 the maps of the Home Counties, with all traces of their former connection erased, were re-issued by Bacon & Co. in their *Large Scale Atlas of London.*

The verso of the title-page is plain, and is followed by the preface on the back of which is: "Directions for Binding." Then comes the index on two pages followed by the maps as given in the accompanying list. The date given to the county maps are those of the newspaper in which they first appeared.

CRUCHLEY 1863

CRUCHLEY, GEORGE FREDERICK.

Cruchley's County Atlas of England & Wales shewing all the Railways & Stations with their names, also the Turnpike Roads and principal Cross roads to all the Cities, Market and Borough Towns with the distance from town to town. Delineated on a series of 46 county maps. Published by G. F. Cruchley, Map Seller & Globe Maker, 81, Fleet Street, London, 1863. 8°. 5½ × 9 inches.

Consists of title-page, list of maps, and forty-six lithographic reproductions of the maps in Cary's *New and Correct English Atlas*, 1787. New titles and the railways are added to the maps, and: "London. Published by G. F. Cruchley, Map-Seller & Globe Maker, 81, Fleet Street," is substituted for Cary's imprint. The county maps are numbered, in the top right-hand corner, 1 to 46.

DLIII.

———— Another edition, 1868. CRUCHLEY 1868

This edition is undated. The imprint is removed from all the county maps, but it remains on the map of England. The numbers have been slightly altered, Wales now being 45 and 46 instead of 41 and 42.

CASSELL, PETTER AND GALPIN 1864-67

CASSELL, PETTER AND GALPIN.

Cassell's British Atlas : consisting of counties of England, with large divisional maps of Scotland, Ireland, and Wales ; copious maps of all the principal routes of railway throughout the country, with indications of every object of importance and interest to the Traveller along the lines ; separate maps of Cities, Towns, and places of importance ; the Great Map of London, on a scale of nine inches to the mile, with the suburbs and environs, and also a facsimile of Ralph Aggas's Map of Old London, as it was in the time of Queen Elizabeth. London : Cassell, Petter, and Galpin, La Belle Sauvage Yard, Ludgate Hill, E.C. [1864–67]. fol. 11 × 16¼ inches.

This atlas was issued in nineteen monthly parts from February, 1864, to August, 1865, with five Supplementary parts published September, 1866, to January, 1867. The cover of Part I bears the title *In Monthly Parts, price one shilling each, Cassell's Universal Atlas : A series of about 260 beautifully engraved folio maps, corrected to the present time, and including all the most recent Geographical Discoveries . . . Each monthly part will contain six coloured sheets. London : Cassell, Petter, and Galpin, etc.*

The maps first appeared in the *Weekly Dispatch* newspaper from 1856–62, and was issued, in 1863, as *The Dispatch Atlas*. Full particulars of the maps will be found under that date. All traces of their connection with the *Weekly Dispatch* have been obliterated. The authors' and engravers' names are removed from the bottom right-hand corner, and, in some cases, placed under the title, the vacant space being occupied by : " London, Published by Cassell, Petter, & Galpin, La Belle Sauvage Yard, Ludgate Hill, E.C."

Notes and statistics, taken from the census returns of 1861, have been printed on each of the county maps.

The plates are numbered 1–102, and the supplementary maps 1–16.

JANSSON, JOANNES. JANSSON 1646

Joannis Janssonii Novus Atlas, sive Theatrum Orbis Terrarum : in quo Magna Britannia, seu Angliæ & Scotiæ nec non Hiberniæ, Regna exhibentur. Tomus Quartus. Amstelodami, Apud Joannem Janssonium. Anno CIↃ IↃCXLVI. [1646]. fol. 13½ × 20 inches.

Jansson did not issue a separate volume for Scotland and Ireland in the manner of his contemporary, Blaeu, the historical description being very much shorter.

Scotland and Ireland come at the end of the volume containing England. The pagination of Scotland is 1–30, and the register A—I, both being continuous with Ireland.

In addition to the maps given under England, the index gives : " Insulæ Scotiæ " as at page 24, but it is not to be found in any of the British Museum copies of the atlas, and, apparently, was never issued as the other maps bear the pagination and register, and the work appears to be complete.

For list of maps, see the various editions of the atlas under England, 1646.

BLAEU, JOANNES. BLAEU 1654

Toonneel des Aerdrycx, oft Nieuwe Atlas, Uytgegeven door Joan Blaeu. Vyfde deel. Met Privilegie. Amstelædami Apud Joannem Blaeu. MDCLIV. fol. 13½ × 21 inches.

This splendid book is volume 5 of the Dutch edition of Blaeu's *Atlas Novus*, being the first printed atlas of Scotland.

It contains a handsome title-page consisting of the arms of Scotland mounted upon a marble pedestal with plinth, in the centre of which is a cartouche containing the imprint. The middle of the pedestal is plain with the title of the atlas printed on a separate piece of paper and attached thereto. The back of the title-page is plain. Following the title, on three pages, is Blaeu's address to the reader, followed by a Privilege of Ferdinand III, signed by Joannes Walderode and another of the States General bearing the signature N. Ruysch. There are 189 pages of text. Except Kircudbright, the North part of Carrick, and the Upper Ward of Clydesdale, which are plain at the back, the back of each map forms two pages, but the maps themselves

BLAEU 1654

do not come in the pagination. On pages 1–3 is an unsigned letter, dated January 24th, 1648, from Robert Gordon to John Scot of Scotstarvet.

The atlas contains forty-nine maps. One of Great Britain according to Ptolemy, and two of Scotland both by Robert Gordon. Of the forty-six sectional maps, thirty-six are definitely stated to be from the surveys of Timothy Pont, three are attributed to Robert Gordon, one to James Gordon, and six are without authors' names.

There is no map accompanying the description of Angus and Perthshire ; the latter, however, is covered by other maps, the upper part by "Braid Allabon," etc., but Angus does not seem ever to have been issued by Blaeu.

BLAEU 1654

———— Latin edition, 1654.

Guil. et Joannis Blaeu Theatrum Orbis Terrarum, sive Atlas Novus. Pars quinta.

On the verso of page 3 of Blaeu's address to the reader is printed the privilege of the States General, and following, on six leaves, is "Andræ Melvini Scotiæ Topographia," etc. After this come leaves numbered I to XV, XIV being in duplicate, containing a short description of Scotland from the history of George Buchanan. On the back of page XV is "Regum Scotia Catalogus." The pagination 1–154 includes, at the beginning, the ancient history of Scotland by Robert Gordon. R. Gordon's letter to Sir J. Scot is omitted.

Geographiæ Blavianæ volumen sextum, quo liber XII, XIII, Europæ continentur. Amstelædami, Labore & Sumptibus Joannis Blaeu, MDCLXII. fol.

This is volume 6 of Blaeu's *Atlas Major*. The title-page of the 1654 issue is given still bearing the original date and imprint, but with the following title : "Scotia, quæ

est Europæ liber XII." Blaeu's address to the reader, on two leaves, follows the titles, after which comes R. Gordon's letter to John Scot of Scotstarvet, unsigned, dated "Februar. 1648," followed by the Privileges of Ferdinand III, Oliver Cromwell, dated June 1654, and the States General. Then comes six leaves containing: "Andreæ Melvini Scotiæ Topographia," etc. The text, pagination, and maps are the same as in the Latin edition of 1654. BLAEU 1662

In the British Museum copy pages 67 and 68, bearing the register B*b*, and containing the map: "Gallovidiæ Pars Media," are missing.

Sixième Volume de la Geographie Blaviane, contenant les livres XII & XIII de l'Europe. A Amsterdam, Chez Jean Blaeu. MDCLXIII.

The second title-page still bears the original date and imprint, but the title is corrected to: "Escosse, qui est le XII. livre de l'Europe." Cromwell's privilege, and "Andreæ Melvini Scotiæ Topographia," etc., are omitted. Gordon's letter to John Scot of Scotstarvet is signed J. G. and dated "le 24 de Janvier, 1648." The pagination is 1—181, pages 32 and 33 being omitted, but the text runs on correctly.

Nuevo Atlas de los Reynos de Escocia e Yrlanda. En Amsterdam, en la Officina Blaviana.

The imprint in the cartouche is: "Amstelædami Apud Joannem Blaeu, MDCLXII."

The pagination is 1—232, and the Register A to Rrrr. The maps are precisely the same as in the Dutch edition of 1664 and still have the Dutch text at the back with the Spanish text pasted over it. This is accounted for by the fact of the plates having been destroyed in the fire which took place in Blaeu's establishment on February 22nd, 1672, at the time this edition was in preparation. Maps already printed off for the Dutch edition were used to complete the Spanish issue, which is accordingly exceedingly rare.

SIBBALD 1683

SIBBALD, SIR ROBERT.

An account of the Scottish Atlas or The Description of Scotland ancient & modern, By His Scacred Majestie's special Command to be published presently, By Sir Robert Sibbald, D.M. His Majestie's Physician in Ordinary, and Geographer for His Ancient Kingdom of Scotland. Edinburgh, Printed by David Lindsay, Mr. James Kniblo, Josua van Solingen and John Colmar. 1683. fol. 8 × 12½ inches.

This is an advertisement of an atlas of Scotland prepared by Sir Robert Sibbald which, however, was never published.

On the back of the title-page of the advertisement is: "Mark Alexander Boyd's verses in commendation of Scotland translated out of Latin by J. B." Following, on nine small folio pages, is: "An account of the work Designed; or The Scottish Atlas to be Published."

This advertisement is also published in Latin.

Gough, in his *British Topography*, vol. 2, p. 557, says: "By order of Charles II. who appointed him [Sir Robert Sibbald] geographer-royal for Scotland, he intended a general description of antient and modern Scotland, intitled 'Albania, sive Scotia antiqua illustrata' . . . The general title was 'Atlas Scoticus' of which the Latin part was 'Albania, sive Scotia antiqua & moderna.' The titles of the several chapters of each of these books with a plan of the work is prefixed to his 'Scotia illustrata' . . . This atlas is now in MS. folio, in the Advocates library," etc.

Again on page 590 he says: "The original drawings of Pont's maps being purchased after Sir Robert Sibbald's death, were deposited in the Advocates library, in one volume, folio, consisting of fifty openings, being designed to accompany Sir Robert Sibbald's Atlas Scotiæ, which he never finished. The following list of them was communicated to me by Mr. Paton." The list contains a full description of the maps in the fifty openings.

ADAIR 1688

ADAIR, JOHN.

[Atlas of Scotland by John Adair. Paris, 1688].

I have never met with a copy of this atlas; but on page 25 of the "Memoir relative to the construction of the Map of Scotland published by Aaron Arrowsmith in the year 1807," is a notice of: "A small Atlas of Scotland by Adair" published in France about the year 1688.

Mr. H. Inglis of Edinburgh says this is a confused reference to the maps of Scotland prepared by Adair in 1688.

KITCHIN 1756

———— Another edition, 1756.

The title is the same: but has been re-set in larger type and the imprint corrected to: "London. Printed according to Act of Parliament, for D. Browne, T. Osborne, J. Hodges, J. Osborne, A. Millar, J. Robinson, W. Johnston, and P. Davey and B. Law. MDCCLVI."

Mr. John Shearer of Stirling informs me that the fourth edition of *Geographia Scotiæ* was issued in 1746: but he does not know when the earlier editions were issued. The fourth edition, 1746, is also mentioned by Mr. C. G. Cash in his *Notes on Scottish Maps*, 1917, but he does not give details of the other editions.

Consists of an elegant title-page, surmounted by a canopy with a figure on either side supporting the drapery. At the bottom, between the title and imprint, are the arms of the Duke of Argyll, and, immediately below: "Luffman sc. Newgate Strt." At the side are ornamental columns encircled by floral designs.

Following the title-page is a leaf containing an index of the cities, towns, villages, and cross roads, and, on the verso: "A List of the Stages on the Great Roads;" etc.

The sixty-one plates of the roads, engraved by Barber, Bowen, Luffman, Prockter, Pyle, Roberts, Taylor, and Terry, except plate 61, are printed on both sides of the paper.

AGRICULTURAL SURVEY OF SCOTLAND. AGRICULTURAL SURVEY OF SCOTLAND 1795-1813

Between 1795 and 1813 the Agricultural Survey of the counties of Scotland was issued. There was, presumably, a volume for each county which contained a map showing the nature of the soil. As shown by the following list the British Museum set is incomplete, and I have not met with the work elsewhere. The maps are by various authors and engravers, and on varying scales. The date given at the end of each entry is that of the volume in which the map appears.

The counties wanting are: Ayr, Linlithgow and Selkirk. Argyll is represented in the British Museum set; but is without a map.

each other. Published by Thomas Brown No. 1 North Bridge, Edinburgh. T. Clerk sculpsit. [1800]. 4to. $12\frac{3}{4} \times 15\frac{3}{4}$ inches. BROWN 1800

A finely engraved atlas. Consists of an engraved title-page of flourished penmanship. In the topmost flourish are the words: "Butterworth junior scripsit." Following the title-page is a leaf with the list of "Contents," the verso of which is blank. At the end of the list of twenty-seven maps is:

"Price coloured outline £1 11 6
,, fully coloured . . . . . £1 14 0"

Below this is: "Edinburgh Printed for Tho. Brown . . . By J. Moir, Royal Bank Close," etc.

At the bottom: "Tho. Brown has always for sale, the greatest variety of atlases."

The titles of the maps, which are in an oval placque with a double lined border, begin: "A New and Accurate Map of—." Between the border lines of the placque is the imprint: "Published by Tho. Brown, Bookseller, Edinburgh."

Except Kirkcudbright and Wigton, Peebles, Renfrew and Stirling and Dumbarton, which have: "T. Clerk sculpt," all the maps have: "Gavin & Son sculpt." immediately below the oval placque.

The only copies known to me are in the Cambridge University Library, the Signet Library, Edinburgh, and John Rylands' Library, Manchester.

TAYLOR AND SKINNER 1800

TAYLOR, GEORGE, AND SKINNER, ANDREW.

Taylor & Skinner's Survey of the Roads of Scotland, on an improved plan. To which is prefixed an accurate map of Scotland, with the New Roads, &c. &c. since the survey was taken. Edn^r. published by Tho^s. Brown. [1800]. 8°. 3⅞ × 7 inches.

A very neatly prepared atlas consisting of engraved title-page, in the lower part of which is a foliated cartouche, enclosing the arms of Scotland, engraved by D. Lizars. Following the title-page is a map of Scotland with the following title, enclosed in a delicately engraved foliated oval cartouche : " A New & Accurate Map of Scotland with the Distances marked between each stage in measured miles. Published . . . by Thomas Brown," etc. After this come 178 pages containing the roads of Scotland engraved in strip formation with two strips on a page. These are followed by eight pages giving : " A List of the Stages on the Great Roads," and " An Index of the Cross Roads."

The first edition of this work was issued by J. Fairbairn, Edinburgh, 1798. It contains a general map of Scotland ; but no other illustrations. In the " Advertisement to the sixth edition," it says : " The maps and views have been engraved expressly for this Edition, and will, it is hoped, be found neat and accurate."

The maps certainly are neatly engraved, but they are on a very small scale, and give but little detail.

LOTHIAN 1829

——————— Second edition, 1829.

Mr. Shearer informs me that the second issue probably appeared in 1829. Apparently this edition had an appendix containing eight additional maps, numbered 34 to 41, which were afterwards issued in Lothian's *Historical Atlas of Scotland*," 1829, still bearing the original numbers. An error was made in numeration by duplicating 37 and missing 36.

A copy of this issue is in the Signet Library, Edinburgh. The Librarian informs me that it contains the additional maps numbered 34 to 41 preceded by an additional engraved title-page, and advertisement of two pages, and a leaf containing " A Journal of Prince Charles' movements in 1745–6."

LOTHIAN 1833

——————— Third edition, 1838.

Atlas of Modern Scotland containing Maps of all the Counties in their District divisions, Earldoms & Lordships. With the Roads, Railways, Canals, Country Seats, Villages, Towns, Lighthouses & Harbour Lights, Fishing Streams, Rivers & Lakes, Places of Historical & Legendary Note, Memoranda of Battles and former Boundaries. Together with a General Map of Scotland and a view of the Comparative Heights of the chief hills. The Latitudes and Longitudes are reduced to modern observation and divided to every minute of a degree. Third edition. By John Lothian Geographer. Edinburgh. John Sutherland, 12, Calton Street. 1838. $5\frac{1}{2} \times 7\frac{1}{2}$ inches.

A neatly prepared and clearly printed atlas. Preceding the title-page is a decorative " Frontispiece " composed of a view of the " Comparative heights of LIX principal hills in Scotland." Above which is a scroll, suspended from a globe, giving the names and elevations of the hills. On each side of the picture is a stone column surmounted by the figure of Atlas supporting a globe. At the foot is : " Published by John Lothian, Edinburgh, 31st March 1835." Following the title-page is a leaf containing an account of the atlas, on the verso of which is the Index. Then come thirty-three county maps followed by a general map of Scotland. Aberdeen, Ayr, Argyll, Berwick, Dumbarton, Edinburgh, Fife and Kinross, Forfar, Lanark, Perth, Renfrew, Roxburgh, Stirling, and Orkney Island bear the imprint : " Lothian's maps of Scotland Published by John Sutherland, 12, Calton St. Edinburgh. 10th Sept. 1838." The remainder have the original imprint : " Published by J. Lothian, Edinburgh . . . 1835."

Shearer, in his *Old Maps of Scotland*, page 82, states that in 1834–35 the maps were issued folded in four cases. Those dated 1835 are, probably, copies of that issue. The

map of Scotland bears the number 41 as in the appendix of the second edition. The maps were re-issued in Black's *County Atlas of Scotland . . . Edinburgh . . .* 1848. 4to.; and again in Black's *Tourist's and Sportsman's Companion to the Counties of Scotland*, [1852]. 8o. LOTHIAN 1838

LOTHIAN 1829 LOTHIAN, JOHN.

Lothian's Historical Atlas of Scotland, consisting of Five General Maps, exhibiting the geography of the country in the 1st. 5th. 10th. 15th. & 19th. centuries, with a map of The Highlands, A.D. 1715-45, shewing the territories of The Clans, and tracing the route of The Unfortunate Prince Charles, accompanied by a Journal of his Successes and Disasters. Containing also Facsimilies of the two Curious Maps of Scotland constructed by Ptolemy A.D. 46 and by Richard, Monk of Cirencester 1336. Edinburgh. Published by John Lothian, 41. St. Andrew Square, 1829. 1st Sep. 4to. $9\frac{1}{2} \times 11\frac{3}{4}$ inches.

A nicely prepared atlas consisting of frontispiece, which is precisely the same as that in the *Atlas of Modern Scotland* by John Lothian, and an engraved title-page surmounted by the arms of Scotland. This is followed by a sheet of text dated 1st September, 1829. The seven plates bear the imprint: "Published by J. Lothian 41, St. Andrew Square, Edinburgh" and dated 1829, except the map of Modern Scotland which is dated March, 1827.

Maps—

1. (1.) Facsimile of Ptolemy's map of Scotland.
   (2.) Facsimile of Richard of Cirencester's map of Scotland.
2. (3.) Scotland under the Romans. Scale of English miles, 50 [$=2\frac{1}{16}$ inches].
3. (4.) Scotland under the Picts.
   (5.) Scotland under the Picts & Scots.
4. (6.) Scotland in the fifteenth century.
5. (7.) Highlands of Scotland.
6. Modern Scotland. Scale of miles, 50 [$=1\frac{1}{2}$ inches].

These maps were issued as an appendix to the second edition of John Lothian's *Atlas of Modern Scotland*, Edinburgh, 1829.

The plates bear the numbers 34 to 41 being a continuation of the thirty-three maps in that atlas.

Edinburgh: Adam and Charles Black, North Bridge, Booksellers and Publishers to her Majesty. MD.CCCXLVIII. 4to. 9 × 12 inches.

A nicely prepared atlas containing a frontispiece, title-page (with a view of a boy in a boat between the title and imprint), list of contents, and forty-six pages of historical text and list of parishes in Scotland. The first five plates contain the maps which were issued in Lothian's *Historical Atlas of Scotland*, 1829. The county maps and frontispiece first appeared in the *Atlas of Modern Scotland* by J. Lothian, 1826.

BLACK, A. & C. 1848

All the plates bear the imprint: "Edinburgh Published by A. & C. Black, 27, North Bridge, 1st May, 1847." An "Index to Parishes" has been added to the county maps. Edinburgh still bears the original number "11" and Roxburgh "8." But Argyll is unnumbered.

BLACK, ADAM AND CHARLES.

BLACK, A. & C. 1852

Black's Tourist's and Sportsman's Companion to the Counties of Scotland. A series of thirty-six maps, shewing all the roads, railways, villages . . . parish divisions, earldoms and lordships. Edinburgh : Adam and Charles Black, North Bridge, Booksellers to Her Majesty. [1852]. 8°. 5¼ × 7⅜ inches.

Consists of frontispiece, printed title-page, "Index to the Counties, Earldoms, Lordships and Districts," a general map of Scotland, map of the Highlands of Scotland, and thirty-three maps of the counties and islands. The frontispiece and maps are lithographic reproductions of those issued in Lothian's *Atlas of Modern Scotland*, 1826.

The plates agree with the index, but for some unexplained reason Scotland is numbered 4, and the county maps 10 to 39. The map of the Highlands is unnumbered.

All the plates bear the imprint : "Edinburgh. Published by A. & C. Black." In the bottom right-hand corner, outside the border, of the map of Scotland is the signature : "W. Hughes." In the same position on plate 13, Berwick, is : "J. Bower sc^{t}. Edin.^{r}" At the bottom, outside the border, of Lanark, Linlithgow, and Stirling is : "Schenk & McFarlane Lith^{rs}. Edinburgh."

The Imperial Gazetteer of Scotland . . . Edited by The Rev. J. M. Wilson. A Fullarton & Co. Steads Place, Edinburgh ; 106, Newgate Street, London, and 196 Great Brunswick Street, Dublin, [1854-57]. 8°. 5¼ × 7½ inches.

This work contains thirty-six maps of the counties, islands and principal towns of Scotland which would form a very neat atlas of the country.

The maps are surrounded by an ornate border of delicate design. Each plate bears the imprint : "A Fullarton & Co. London & Edinburgh."

Mr. C. G. Cash, in his *Scottish Topography*, says that Fullarton published a County Atlas of Scotland containing thirty-two county maps. Probably the same maps as those in the above work.

Containing One General Map of the whole Kingdom with 4 Provincial and 32 County Maps, divided into Baronies, wherein are carefully laid down all the Cities, Towns, Rivers, Harbours, Headlands &c. With the addition of several Market Towns and other places of Note omitted in former Maps, together with all the Principal Roads, and the distances in comon reputed Miles . . . The whole being laid down from the best Maps Viz : S^r^. W^m^. Petty's Mr. Pratt's &^c^. with a Description of each County collected from the best accounts extant. 1720. Printed for and Sold by Tho : Bowles Print & Map Seller near the Chapter House in St. Paul's Church Yard, London. obl. 12^mo^. $7\frac{1}{4} \times 6$ inches.

The title is engraved within a foliated border similar in design to the first edition. At the bottom of the title, in two lines, are the symbols used on the maps.

Following the title-page are fourteen pages containing : " A Description of the Kingdom of Ireland." The map of Great Britain and Ireland is not issued in this edition. The general map of Ireland is superseded by " A Pocket Companion of y^e^ Roads of Ireland . . . Printed and Sold by Tho. Bowles " . . . 25 Irish miles [$=1\frac{1}{4}$ inches].

Together with the index of counties is " A Catalogue of the Towns & Places where Barracks are erected," etc.

The roads are added to all the county maps. The original plates may be identified by the brackets around the plate number.

The following plates are re-engraved :

LEINSTER PROVINCE. English miles, 15 [$=\frac{5}{8}$ inch]. The title, in a small cartouche, is in the bottom left-hand corner, instead of between the border lines, at the top, as in the former edition.

4. DUBLIN COUNTY. English miles, 5 [=1 inch].

12*a*. ULSTER PROVINCE. English miles, 15 [$=\frac{1}{2}$ inch]. The title, in a small cartouche, is in the top left-hand corner, instead of between the border lines as in the earlier edition.

13. ANTRIM COUNTY. English miles, 10 [$=\frac{13}{16}$ inch]. In place of the foliated cartouche of the earlier edition, the title is in a small cartouche standing upon a plinth, with the scale immediately below.

14. DOWN COUNTY. Title in small cartouche in top left-hand corner.

15. LONDONDERRY COUNTY. English miles, 10 [$=1\frac{1}{8}$ inches]. The title is in a small cartouche instead of the floral design shown in the earlier edition.

16. DONNAGALL OR TYRCONEL COUNTY. English miles, 10 [$=\frac{3}{4}$ inch]. The title is in a small cartouche.

17. TYRONE COUNTY. The title, in a small cartouche, is in the top right-hand corner, in the earlier edition it was enclosed in a floral design placed in the top left-hand corner.

SCALÉ, BERNARD. SCALÉ 1776

An Hibernian Atlas; or General Description of the Kingdom of Ireland: Divided into Provinces; with its sub-divisions of Counties, Baronies, &c. Shewing their boundaries, extent, soil, produce, contents, measure, Members of Parliament and number of inhabitants; also the Cities, Boroughs, Villages, Mountains, Bogs, Lakes, Rivers, and Natural Curiosities. Together with the Great and Bye Post Roads. The whole taken from actual Surveys and Observations. By Bernard Scalé, Land Surveyor, and beautifully engraved on 78 copper plates, by Mess^{rs}. Ellis and Palmer. Published as the Act directs, 1, Feb. 1776. London: Printed for Robert Sayer, and John Bennet, Map and Printsellers, N°. 53 in Fleet Street; and may be had of the Author, at his house in Dublin, and at Mangroves, near Brentwood, Essex. 4°. 7 × 10 inches.

A beautifully prepared atlas, containing thirty-seven finely engraved maps of the provinces and counties of Ireland. Each map is preceded by an engraved plate of letter-press giving a description of the county, or province as the case may be. The maps bear the imprint and date as given in No. 1. The compass indicators, on the maps, are of a highly decorative character.

At the bottom of the title-page, just above the imprint, is a view with the arms of Ireland surrounded by implements and products indicative of the industry of the country.

SCALÉ 1776

Following the title-page is the dedication : " To His Most Excellent Majesty George the Third . . . This atlas . . . is inscribed by : . . . Bern[d]. Scalé. Grignon sculp. Published as the Act directs, by Rob[t]. Sayer & John Bennett, 1. Feb. 1776." The Preface and Index of the maps are each engraved on a separate plate.

The original imprint on the title-page is imperfectly erased and the following added: "Published as the Act directs 12th May 1798 by Rob^{t}. Laurie & Jas. Whittle, N^{o}. 53, Fleet Street, London. Successors to the late Mr. Rob^{t}. Sayer."

The dedication now ends: "His Majestys most Dutiful Subjects & Servants Laurie & Whittle." The preface and the index of maps are the same.

Except the maps of Leinster and Munster, which bear the imprint: "Published 12th May 1798 by Laurie & Whittle, 53 Fleet Street, London," all the imprints are corrected to: "Published as the Act directs, by Rob^{t}. Sayer, 53 Fleet Street." This was carried out by erasing Bennett's name and date and adding Sayer's address in its place.

A copy of this edition is in the possession of Sir H. G. Fordham of Odsey, Hertfordshire.

TAYLOR, GEORGE, AND SKINNER, ANDREW. TAYLOR AND SKINNER 1778

Taylor and Skinner's Maps of the Roads of Ireland, surveyed 1777. Published for the Authors as the Act directs 14th Nov^{r}. 1778. Sold by G. Nicol, Strand; J. Murray, Fleet-Street, London, and by W. Wilson, N^{o}. 6, Dame-Street, Dublin. 8^{o}. $4\frac{1}{2} \times 8\frac{3}{8}$ inches.

A well prepared atlas consisting of a neatly engraved title-page with a small view between the title and imprint. In the bottom right-hand corner is: "Price £1 . 4^{s}," and below the border: "Engrav'd by G. Terry. No. 54, Paternoster Row, Cheapside, London." Following the title, on page III, is the dedication: "To The Right Honourable Edmond Sexten Pery, Speaker of the House of Commons &c. &c. &c. The following work is most humbly inscribed . . . by . . . George Taylor, Andrew Skinner." At the bottom, below the border, is "Downes, sculpsit." On page IV is the "Explanation" with the scale. Below the border at the bottom: "Terry sculp^{t}. Paternoster Row, London."

The following pages, V—XVI, contain an Index to Distances and Cross Roads.

The first map is: "A New & accurate Map of the Kingdom of Ireland, made from actual surveys, by Taylor & Skinner. A scale of Irish miles . . . 20 [=$1\frac{3}{4}$ inches]. Terry sculp^{t}. . . . Publish'd as the Act directs, 18th Nov^{r}. 1778." This is followed by 288 pages containing maps of the roads of Ireland. Most of the maps are in strips, two on a page, similar to those in Ogilby's *Britannia*, but with more topographical detail. They are printed on both sides of the paper, and at the bottom, outside the border, of each page is "Terry sculp." On certain pages the date of publication is variously given as 29th July; 13th Aug.; 20th Aug.; 27th Aug.; 24th Sep^{t}.; 1st Oct.; 22^{d}. Oct.; 31st Oct.; 3^{d}. Nov. 1778.

BIOGRAPHICAL NOTES

Adair, John. An eminent Scottish surveyor and map-maker. Fellow of the Royal Society. Between 1682 and 1688 he drew a series of maps of the Scottish counties, but most of these were not published until after his death which occurred, probably, about 1722. In 1703, five maps of the East Coast of Scotland, by Adair, were issued in *Description of the Sea Coast*, a work intended to have been issued in parts, but only the first of which was attempted. For a full account of Adair's Life and Works see an article by Harry R. G. Inglis, F.S.A.Scot., in *The Scottish Geographical Magazine*, vol. XXXIV, no. 2.

Ainslie, John. Land-surveyor and engraver, flourished about 1772—1813. One of the leading Scottish geographers of his day. Early maps from surveys by Ainslie include *Selkirk*, 1772; *Fife and Kinross*, 1775. His best known works were probably *A plan of the City of Edinburgh*, published in 1780, and the nine-sheet map of *Scotland*, on the scale of four miles to one inch, published in 1789. Other counties published were *Wigtown*, 1782; *Forfar*, 1794; *Kirkcudbright*, 1797. In 1812 appeared *The Treatise of Surveying*, a new and enlarged edition of which was issued by William Galbraith in 1849.

Andrews, John. Geographer, land-surveyor, map-seller and engraver, worked from about 1766 to 1809. His addresses are given as: (1) No. 5 in the Fish-Market, Westminster Bridge; (2) from about 1777, at 29 Long Acre; (3) from 1781, at 211, facing Air Street, Piccadilly. In collaboration with Andrew Dury, he surveyed and produced large-scale maps of the counties of *Hertford* (1766), *Kent* (1769), and *Wilts* (1773). Other works produced by Andrews, either alone or with the assistance of Dury, include plans of the towns of *Hertford* (1766), *St. Albans* (1766), *Canterbury* (1768); *A collection of Plans of the Capital Cities of Europe, etc.* (1771); *A topographical Map of the Isle of Wight* (1775); *Map of the Country fifteen miles round Richmond* (1777); *Map of the Country twenty-five miles round Windsor* (1777); *A new Physical . . . and Political Map of England* (1786); *Historical Atlas of England* (1797), and *A Map of the Country sixty-five miles round London* (1809).

Armstrong, Mostyn John. Geographer and publisher *c.* 1771—1791. Son and partner of Captain Andrew Armstrong. Many of their well-known maps were published by subscription. The principal works by Mostyn John Armstrong are: *Map of the County of Peebles*, 1775; *An actual Survey of the great post-road between London and Edinburgh*, 1776; *Actual Survey of the great post-road between London and Dover*, 1777; *A Scotch Atlas*, engraved on thirty copper plates and a *Plan of Encampment of the first or Western Battalion of the Norfolk Regt. Militia . . . near Aldborough . . . drawn by M. J. Armstrong*, 1779.

Badeslade, Thomas. Surveyor and engineer, flourished from about 1719—1745. He was specially interested in the improvements of harbours, rivers and channels and in schemes for the reclaiming of the Fens. He wrote *The History of the Ancient and Present State of the Navigation of the Port of King's Lyn, etc.*, in 1725, and *The new-cut*

Canal intended for improving the Navigation of the City of Chester, etc., in 1736. Badeslade also drew several maps of the Fens, the maps for *Chorographia Britannia*, and many views of castles and seats. A large number of these were engraved by Toms.

Baker, Benjamin. An engraver and publisher, like other members of his family, at Lower Street, Islington, worked from about 1780 to 1824. He engraved maps for the *Universal Magazine*, 1791—1798; Wilkinson's *Atlas Classica*, 1796—1803; Staunton's *Embassy . . . to the Emperor of China*, 1798; and Kitchin's *New Universal Atlas*, 1799. He also engraved Lindley and Crosley's *Map of Surrey*, 1793, and a plan of *Islington* in the same year. In later years Baker seems to have been chiefly occupied at the Ordnance Office in the Tower, engraving the sheets of the first edition of the one-inch Ordnance Survey maps.

Bakewell, Thomas. Bookseller and map-and print-seller, from about 1730—1764. His addresses are given as " Next y^e^ Horn Tavern in Fleet Street " and " Against Birchin Lane in Cornhill." In 1731, he published *A New Map of England and Wales*; and in 1746, *A New and Accurate Map of Scotland*, by E. Bowen. Several maps in *The Royal English Atlas*, by Bowen and Kitchin, bear Bakewell's imprint.

Baldwin, Richard. Bookseller at the Rose in Paternoster Row, was the son of Richard Baldwin, bookseller of St. Paul's Church-yard and was the first member of the family to settle in Paternoster Row. His imprint appears on the *London Magazine* for the first time in 1746. He died in January, 1770, and was succeeded by Robert Baldwin, a nephew of the elder Richard, who carried on the business until 1810.

Barber, J. A little-known engraver, worked at the latter end of the eighteenth century. He engraved a map of Ireland in 1776 for *A Tour in Ireland in 1775*; a map of Greece for Chandler's *Travels in Greece*, 1776; and plate 2 of Taylor and Skinner's *Survey . . . of the Roads of North Britain*, 1776.

Basset, Thomas. Bookseller *c.* 1659–93. His addresses are given as: (1) The George, near St. Dunstan's Church, in Fleet Street, and (2) Westminster Hall. Basset, who seems to have been a collector and dealer in law books, issued *An exact catalogue of the Common and Statute Law Books* in 1673, and a further catalogue in 1682. His name appears with that of Richard Chiswell in the imprint of John Speed's *Theatre of the Empire of Great Britaine*, also in the *Epitome* of Speed's *Theatre*, both of which were published in 1676.

Bell, Andrew. A publisher of miscellaneous works from 1694 to 1715, was in business at the Pestle and Mortar over against the Horseshoe Tavern in Chancery Lane and afterwards at the Cross-keys and Bible in Cornhill. Topographical works published by him include *The New Description and State of England*, 1704, and *Fifty-six new and accurate Maps of England*, 1708.

Berry, William. Bookseller, geographer, and engraver, from about 1670 to 1703. His addresses are given as: (1) the Blue Anchor, Middle Row, Holborn, 1671; (2) the Globe, between York House and the New Exchange, in the Strand, 1672; (3) the Globe, between Charing Cross and Whitehall, 1678; (4) Cragg's Court, near Charing Cross, 1703. He was in partnership, first with E. Berry and afterwards with R. Morden, and dealt chiefly in topographical works, prints, maps, charts, and globes. Berry corrected and amended a set of maps of the World, described by N. Sanson. These maps were issued separately between 1680 and 1689; as a collection they are known as 'The English Sanson' and are very rare. Berry also engraved, or published, maps of *England*, 1671; *XVII Provinces*, 1672; *Lorraine and Alsace*, 1677; *Seat of*

War in Germany, 1677 ; *Jamaica*, 1678 ; *Grand Roads of England*, 1679 ; *Scotland*, 1679 ; *Tangier*, 1680 ; *Sea Coast of England, France and Holland*, 1688 ; and Petty's *A Geographical Description of the Kingdom of Ireland*, 1689.

Bew, John. Bookseller, at 28, Paternoster Row, London, from 1774 to 1793. He published the monthly parts of *The Political Magazine* from 1780 to March, 1785, when it was taken over by John Murray, of 32, Fleet Street. During that period Bew published in the magazine a number of interesting maps of various parts of the world, engraved by J. Lodge. An edition of Maitland's *History of London*, dated 1775, was published by J. Wilkie, T. Lowndes and J. Bew. He died on April 12, 1793.

Bickham, George, senior. Author and engraver of many works on penmanship, was born in 1684 and flourished from about 1702 to 1758. He studied the art of engraving under John Sturt, a famous engraver of writing and, in turn, became a celebrated exponent of the art. In his early days Bickham appears to have taught writing and engraving at Brentford-End, Middlesex. He lived for a considerable time at the Crown in James Street, Bunhill Fields, London, and, according to W. Massey in his work *The Origin and Progress of Letters*, dated 1763, removed a little while before his death, to Red-Lion Street, Clerkenwell. A plate of *Alphabets* inserted at the end of a copy of the *Universal Penman* and dated 1752 gives his address as Featherstone-Street, Bunhill-Fields. He died May 4, 1758, age 74, and was buried in St. Luke's Church Yard, Old Street. In addition to his own works on penmanship, Bickham engraved many works by other famous writers of the time. His *Universal Penman* was issued in fifty-two numbers from 1733 to 1741 and contains specimens of penmanship by various writers. His other works include *First Principles of Heraldry*, 1742, and *The British Monarchy*, 1743. Bickham also engraved portraits, chiefly of writers, and a few paintings.

Bickham, George, junior. Son of the above, was an engraver and publisher, from about 1735 to 1767. His address is given as at " Y^{e} Corner of Bedford-Bury, New Street, Covent Garden," and, later, at May's Buildings, Bedford Court, Covent Garden. He engraved a few portraits, humorous drawings, and caricatures and was, for a short period, drawing-master to the Academy at Greenwich. The title-pages of *A Description of the several counties in South Britain*, 1750, and *A Short Description of the American Colonies*, which although of a later date, are included in *The British Monarchy*, bear the imprint of G. Bickham, junr., and many of the views, variously dated 1750—1754, are signed by him. A later edition of *The British Monarchy* also bears his imprint. The younger Bickham's works include *The Musical Entertainer*, 1737—1738, a collection of songs set to music, with engraved head-pieces, in two volumes, the first of its type published in England ; *Deliciæ Britannicæ ; or the curiosities of Hampton-Court and Windsor-Castle*, 1742 ; *The Beauties of Stow*, 1750 ; *Sixteen perspective views . . . at Stow*, 1753 ; *Plan of St. George's Parish, Hanover Square*, 1761 ; *Plan of Kensington Palace, Gardens, etc.*, 1764, and *A Topographical Survey of the Parish of Kensington*, 1766. He disposed of his stock-in-trade by auction in 1767 and retired to Richmond. An entry in *The London Chronicle*, July 3, 1771, records the death of George Bickham, engraver, at his house in Kew Lane.

Note : The Dictionary of National Biography gives the date of the elder Bickham's death as 1769 and that of the younger as 1758. W. Massey, who was almost contemporary with the Bickhams and knew many of the writing-masters of that time, clearly indicates the elder Bickham, the famous penman, as having died in 1758. Dod, in his *MS. Notes on Engravers*, agrees with Massey's statement.

Bickham, John. An engraver of writing and publisher, at : (1) the Seven-Stars in King-Street, Covent Garden, and (2) opposite Fetter Lane, Holborn, was probably a brother of one of the George Bickhams. He engraved the plates in *Fables and other short*

Poems, 1737 ; several of the plates in *The Universal Penman*, 1733—1741 ; and was associated with the other two Bickhams in the production of *A short Description of the American Colonies*, 1743, in *The British Monarchy*. Otherwise nothing appears to be known of him.

Bill, John. King's printer and bookseller in London, 1604—1630. His addresses are given as : (1) Northumberland House, St. Martin's Lane, Aldersgate Street, and (2) Hunsdon House, Blackfriars. A native of Shropshire. Was apprenticed to John Norton, the printer, in 1592. Sir Thomas Bodley, the founder of the Bodleian Library, selected Bill to travel abroad and collect books for his library on commission probably between 1599—1602. From 1604 onwards he became an extensive publisher of books, which included the *Abridgement of Camden's Britannia*, 1626. John Bill was a regular visitor to the Frankfort Book Fair, and for a considerable period issued an edition of the Frankfort catalogue for circulation in England. He appears to have been a shareholder in the King's Printing House, from about 1617, to the time of his death, which took place on May 5, 1630. His son John Bill succeeded to his father's share in the King's Printing House.

Bishop, George. Bookseller and printer at The Bell, St. Paul's Churchyard, from about 1562—1611. He is believed to have been a native of Shropshire and was apprenticed to Robert Toye, the printer. During his career he issued a large number of books including the 1590, 1594 and 1600 editions of Camden's *Britannia*, and (in conjunction with John Norton) those of 1607 and 1610. Bishop published *Holinshed's Cronicles* of 1577, and was joint publisher with R. Newberie of *Hakluyt's Principal Navigations*, 1589. Besides being an Alderman of the City of London Bishop rose to prominent positions in the Stationers' Company, being Warden in the years 1577–8, and 1583–4, and Master of the Company four times. He died in January, 1611, and was buried in the Church of St. Faith under St. Paul's Cathedral. He left his premises in St. Paul's Churchyard to his cousin, Thomas Adams, who succeeded to the business.

Blaeu, William. Surveyor, globe-maker and publisher, was born at Alkmaar in 1571, and died at Amsterdam Oct. 21, 1638. In 1599 Blaeu was occupied in making globes, and in 1606 published a small pair $5\frac{1}{2}$ inches in diameter. These are now remarkably rare and, as far as is known, those in the British Museum are the only copies on record. In 1628 he surveyed the entire coast between the Texel and the Meuse. Sometime prior to 1606 Blaeu established at Amsterdam his famous printing and publishing business from which was issued the finest series of atlases and maps ever produced, beginning with a maritime atlas in 1608 and culminating, in 1667, with the splendid French edition of the *Atlas Major*, in twelve volumes. The business was at first carried on under the name of Guilielmus Janssonius with the result that Blaeu was often confounded with his rival Joannes Janssonius, another famous publisher in the same city. Among the early publications of W. Blaeu was : *Het Licht der Zeevaert . . . door Willem Jans Zoon, tot Amsterdam*, 1608. This was re-issued in 1612 with title and text in English. In 1630 appeared his first terrestrial atlas : *Atlantis Appendix, sive pars altera continens tab. geographicas diversarum Orbis regionum nuc, primum editas. Amsterdam. Apud Guiljelmum Blaeuw, Anno* 1630. A second edition of this was published in the following year under a new title : *Theatri A. Ortelii et Atlantis G. Mercatoris . . . Amsterdam . . .* 1631. The copy of the first edition in the British Museum is believed to be unique. In 1635 Blaeu issued his *Theatrum Orbis Terrarum, sive Atlas Novus*, which was enlarged and re-issued by his son Johann, in various languages, the last being the Spanish edition of 1672.

Blaeu, John. Johann Blaeu, son of William Blaeu, was born at Amsterdam Sept. 23, 1596, and died there Dec. 28, 1673. After travelling in Italy he returned to Amsterdam and entered the business of his father on whose death, in 1638, he became the head of

the establishment. He soon made a great reputation and is thought to have taken precedence of the rival house of Joannes Janssonius. In 1635 W. Blaeu issued his *Theatrum Orbis Terrarum, sive Atlas Novus*, in two volumes. In conjunction with his brother Cornelius, whom he had taken into partnership in 1640, John Blaeu brought out the third volume of this atlas, and volume four, containing maps of the counties of England and Wales, was published in 1645 after the death of Cornelius which occurred in 1642. Blaeu's most finished and complete work was : *Atlas Major, sive Cosmographia Blaviana, Qua Solum, Salum, Coelum, Accuratissime Describuntur.* It consists of eleven large folio volumes, each of which (in addition to the general title) has its own distinctive title-page and is dated 1662 throughout. A French edition, in twelve volumes, was published in 1663 and re-issued in 1667, all the volumes being so dated. A Spanish edition, in ten volumes, was prepared and issued in 1672. The maps, or most of them, are those of the 1667 French edition and still have the French text at the back with the Spanish text pasted over it. This is accounted for by the fact of the copper plates having been destroyed in the fire which took place in Blaeu's establishment, Feb. 22, 1672, at the time this edition was being prepared. About 1647 Blaeu published a pair of globes, each 24 inches in diameter. They are now very rare. Blaeu had an extensive foreign business, and in 1663 is known to have possessed an establishment in Vienna. The above-mentioned fire destroyed the whole of his printing house, at Amsterdam, and with it perished most of the copper plates belonging to his geographical works. Those that were saved passed into the hands of Frederick de Wit, who engraved his name upon them and issued them as his own work. De Wit's business came eventually into the possession of Covens and Mortier, when the inscriptions on Blaeu's plates were again altered.

Blome, Richard. A cartographer and compiler of books on heraldry and topography, was probably a relative of Jacob Blome, a bookseller of Knightrider Street. He flourished from about 1660 to 1705 and, for a short period, from 1668—1679, sold his own books at Mr. Kid's in the corner of Lincoln's Inn Fields near New [=Clare] Market, where he lodged. Later, in 1694, his address is given as New Weld Street, at the Green Pales, near Clare-market. His chief topographical works were as follows : *A Geographical Description of the four parts of the World*, 1670 ; *A Description of the Island of Jamaica*, 1672 ; *Britannia : or a Geographical Description of the Kingdom of England, Scotland and Ireland*, 1673 ; *A View of the English Acquisitions in Guinea and the East Indies*, 1686 ; *The Present State of his Majesties Isles and Territories in America*, 1687, and plans of the Wards and Parishes of London. In spite of the fact that most of his work was pirated and of poor quality, Blome never seemed to lack patrons or subscribers. His *Britannia* is described by Bishop Nicolson as " A most entire piece of theft out of Camden and Speed," and by Anthony à Wood as " Scribbled and transcribed from Cambden's Britannia and Speed's Maps." His works on heraldry were similarly criticized.

Bowen, Emanuel. Engraver and print-seller, worked in London from about 1720 to 1767. His address in 1720 is given as " Next y^e^ King of Spain in S^t^. Katherines," or " Near y^e^ Stairs in S^t^. Katherines," and, on a map dated 1722, as " Opposite to the Bolt and Tunn Inn in Fleet Street." Bowen engraved the plates for *Britannia Depicta*, which was first published in 1720 and passed through many editions down to 1764 ; seventy maps for *A Complete System of Geography*, 1744—1747 ; maps for the *London* and *Universal Magazines*, 1747—1763 ; for Harris' *Complete Collection of Voyages*, 1748 ; *Universal History of the World*, 1766 ; and the *General Magazine of Arts and Sciences*, 1759–63. He also engraved many of the maps in *The Large English Atlas*, first published about 1750, of which several editions were issued ; *The Royal English Atlas*, [1764] ; *Atlas Anglicanus*, [1767], and a large number of separate maps and charts. A peculiar feature of the three atlases just mentioned is the large amount of text inserted on each map. Bowen was appointed engraver of maps to George II and Louis XV,

but, according to Gough (*British Topography*, vol. I, p. 99) he died May, 1767, in reduced circumstances and nearly blind. His business was carried on by his son, Thomas Bowen.

Bowen, Thomas. Engraver of maps and charts, from about 1760 to 1790, was the son of Emanuel Bowen. He assisted his father in engraving maps for *The Royal English Atlas* and *Atlas Anglicanus* and completed the latter work on the death of his father in 1767. Thomas Bowen engraved maps or charts for Morant's *History of Essex*, 1768; Taylor and Skinner's *Survey . . . of the Roads of North Britain*, 1776; Middleton's *New and Complete System of Geography*, 1777–8; Carver's *The New Universal Traveller*, 1779; *The Gentleman's Magazine*, 1773—1780; Forster's *History of Voyages*, 1786. He also engraved maps and charts from surveys by Captain James Speer and many others. In 1786 he was living at No. 9 Charterhouse Lane, Clerkenwell, and he died in Clerkenwell Workhouse in 1790.

Bowles, Carington. Son of John Bowles, of the Black Horse in Cornhill, was born in 1724. From 1754 till about 1764 he assisted his father and from that year until his death in 1793 he carried on the business of Thomas Bowles in St. Paul's Church Yard. His publications included *Britannia Depicta*, 1764; a pirated edition of Lewis Evans' map of the Middle British Colonies, [1765]; *The Large English Atlas*; *Atlas Minor*; *The Royal English Atlas*; *Post-Chaise Companion*, 1782; *New Medium English Atlas*, 1785; *Universal Atlas*, [1792]; new four-sheet maps of *America, England and Wales Ireland, and Scotland*. After his death the business was carried on under the title of Bowles and Carver.

Bowles, John. Map and print-seller, was probably the son of Thomas Bowles, of St. Paul's Church Yard, and was born in 1701. He seems to have commenced publishing about 1720 and continued until his death in 1779, when he was succeeded by Robert Wilkinson. His address is generally given as at the Black Horse in Cornhill, but occasionally we find it given as over against Stocks Market or at Mercers Hall in Cheapside. From 1754 to about 1764 his son Carington Bowles was in partnership with him and the business was styled "John Bowles and Son." At that date (1764) Carington Bowles took over the business of Thomas Bowles in St. Paul's Church Yard and John Bowles carried on alone in Cornhill. During this long period of over fifty years a very large number of maps and prints were published by him. Some of the earliest included later editions of the maps of Herman Moll, issued in his large atlas of the World at the beginning of the eighteenth century; *A Set of Fifty New & Correct Maps of England & Wales*, by the same geographer, 1724; and *Several Prospects of the most noted Public Buildings in . . . the City of London*, 1724. He also published a large number of maps and prints engraved by his brother, Thomas Bowles. Catalogues of his publications were issued from time to time and two copies are in the British Museum, dated 1728 and 1753.

Bowles, Thomas. Map and print-seller, next the Chapter House in St. Paul's Church Yard, during the early part of the eighteenth century, was probably the father of John Bowles, map and printseller, in Cornhill, and of Thomas Bowles, the engraver. The pedigree of the Bowles family published in Sir H. G. Fordham's *Hertfordshire Maps . . . Supplement*, is not very precise as to the early members of the family. Thomas Bowles, the printseller, and Thomas Bowles, the engraver, appear, from their work, to have been different persons. A large number of engravings by the latter were printed and sold by John Bowles only and it would seem, therefore, that the engraver, was not, at least for some years, a publisher as well. The earliest publications by Thomas Bowles appear to have been some views of St. Paul's Cathedral, drawn by Wm. Emmett, dated 1702, and issued in *Nouveau Théatre de la Grande Bretagne*, vol. II, 1713, and many of the maps in Moll's large atlas of the World, published about 1714.

Views of the Palace and Town of Windsor, the Palace of Hampton Court, the Palace of Kensington and the Palace of St. James were all published before 1720. *A Catalogue of some Prints & Maps, Printed for & Sold by Tho: Bowles at his Shop next y Chapter House in S^t. Pauls Ch'-Yard, London*, is printed on the back of the title-page of some copies of *Britannia Depicta*, published in 1720. Thomas Bowles retired in or about 1764 and was succeeded by Carington Bowles. His death is recorded in *The Gentleman's Magazine*, vol. xxxvii, under the date of April 8, 1767. The family of Bowles continued to publish maps, plans and views for about one hundred and thirty years.

Bowles, Thomas. Engraver of maps, plans and views, was probably the son of Thomas Bowles, printseller in St. Paul's Church Yard, and brother of John Bowles, printseller in Cornhill. There is no evidence either of the fact of his succeeding to the business in St. Paul's Church Yard or of the date at which this may have taken place, but, for many years, his engravings were printed and sold by his brother. According to the pedigree referred to under Thomas Bowles, the printseller, he was born in 1712. There are, however, engravings by him of Cambridge, Ely Cathedral, Peterborough Cathedral, and St. George's Chapel, Windsor, in *Nouveau Théatre de la Grande Bretagne*, published in 1724, and a map of *London*, dated 1725. He produced a very large number of plans and views of London and other places in England, engravings illustrating the Protestant persecution, and views of many continental towns.

Brown, George. Land-surveyor and road-engineer, of Elgin, Scotland, was a prominent figure in the development of the Highlands of Scotland during the latter part of the eighteenth century. Between the years 1790 and 1799 he surveyed thirty proposed lines of roads and prepared estimates of the cost of their construction. His plans and estimates were extensively used by the Commissioners for Highland Roads and Bridges appointed under the Act of Parliament of 1803 and he submitted to the same Commissioners, in 1803, a *General Report of the most necessary and useful Lines of Roads, betwixt the East and West Sea, through the four Northern Counties of Scotland*. He also prepared a map of Moray and Nairn Shires inserted in *General View of the Agriculture of the Counties of Nairn and Moray*, 1813.

Browne, Christopher. Cartographer and publisher, at the Globe near the West end of St. Paul's Church Yard and in the North Entrance of the Royal Exchange, from about 1684 to 1712. His most important cartographical works were: (1) the large map of *England*, in fifteen sheets, prepared by him in 1700 and engraved by J. Harris, of which two editions published by P. Overton and T. Bowles, dated 1735, are in the British Museum; and (2) *Geographia Classica, The Geography of the Ancients*, 1712, which passed through several editions. Browne also engraved or prepared maps of *England*, 1693; *Flanders*, 1700; *London*, 1700; *Rome*, [1710]; and five county maps of *England* which appeared in Henry Overton's collection of Speed's maps, 1713. Browne also printed and published many other maps including the large map of the *Fens* by Sir Jonas Moore, Surveyor General, in 1684, and an edition of F. de Witt's *Atlas Major*, in two volumes, about 1706, with his own imprint on many of the maps. Browne's name still appears in the imprints of the fifth and seventh editions of *Geographia Classica*, dated 1727 and 1736 respectively, but it is doubtful whether he was still in business at those dates.

Burghers, Michael. Draughtsman and engraver, was probably a native of the Netherlands and came over to England, after the fall of Utrecht, in 1672. He settled in Oxford and became engraver to the University. He engraved the *Almanacks* for the University from 1676, many views of the city churches and colleges, and a variety of portraits, including those of Sir Thomas Bodley and Anthony à Wood. He engraved a large number of plates for the famous antiquary, Sir Thomas Hearne; [Specimens

of various Oriental Alphabets] *The Alphabet . . . of the Malabars, etc.* [1700]; several of the maps in *A New Sett of Maps . . . by E. Wells,* 1701; a few of the plates in Dugdale's *Monasticon Anglicanus*; and two maps in *Magna Britannia,* [1720].

Burroughs (or **Burrows**), **Samuel.** Appears, in the Term Catalogue, as a bookseller from 1697 to 1707, at (1) Crown in Cornhill; (2) Bible and Three Legs, Poultry; (3) Little Britain. The only topographical work mentioned is the second edition of *The New Description and State of England . . . by Robert Morden,* published in 1704.

Camden, William. Antiquary and historian, was born in the Old Bailey, London, May 2, 1551. He was educated at Christ's Hospital, St. Paul's School, and at Oxford. In 1575 he became a master at Westminster School and spent his vacations travelling all over the country collecting historical and antiquarian information. The result of his labours appeared in 1586, when the first edition of the *Britannia* was published. The first five editions contained only a general map. The sixth edition published in 1607 contained the county maps of England and Wales, engraved by William Hole and William Kip from the surveys of Norden, Saxton and Owen. Camden became head-master of Westminster School in 1593, Clarenceux king-of-arms in 1597, and founded a chair of history at Oxford in 1622. He died at Chislehurst, Nov. 9, 1623, and was buried in Westminster Abbey.

Carnan, Thomas. Publisher, 65, St. Paul's Churchyard, son of William Carnan, printer, of Reading, who was proprietor and editor of one of the earliest provincial newspapers: *The Reading Mercury and Oxford Gazette.* William Carnan died in 1737 and two or three years later his widow married John Newbery, who commenced business at the Bible and Crown, near Devereux Court, without Temple Bar, and afterwards at the Bible and Sun, St. Paul's Churchyard. Thomas Carnan appears to have come to London with his step-father, and to have been closely connected with him in his business of publisher and bookseller. Carnan's imprint appears on the title-page of *The Midwife* as early as 1751, also on several works up to the time of John Newbery's death in 1767. From this date to about 1780, Carnan was in partnership with Francis Newbery junior, several works being published under their joint imprints. In 1768, appeared *Description of Tower*; 1769, Third edition of *Geography*; 1770, Mallett's *Northern Antiquities*; 1771, New edition of Goldsmith's *England*; 1773, Paterson's *Travelling Dictionary*; 1779, *New and accurate Maps of the Counties of England and Wales.* Carnan's imprint appears alone on the various editions of Paterson's *Roads* issued between 1771—1786, and also on the 1772 edition of his *Travelling Dictionary,* although Newbery seems to have been in partnership with him until about 1780; from this date Carnan published alone until his death which took place at his house in Hornsey Lane, near Highgate, on Aug. 29, 1788.

Cary, John. Engraver and publisher, born *c.* 1754. Died August, 1835. He commenced business as an engraver and map and print-seller, *circa* 1783, at the corner of Arundel Street, 188, Strand. He had, however, been engraving maps some few years before this. There is in the British Museum Map Room a volume of plans of canals, many of them bearing Cary's name as the engraver, one of which is dated May 29, 1779: others, of course, may be of a still earlier date. In 1791 Cary removed to 181, Strand, where he remained until Jan. 17, 1820, when his premises were destroyed by fire. An account of this is given in *The Gentleman's Magazine* for 1820 (p. 81). Although Cary's premises were, apparently, entirely destroyed he does not appear to have lost any of the copper-plates of his maps. After the fire Cary removed to 86, St. James's Street, and the name of George Cary soon afterwards appears in the imprint of the firm. Under the name of G. and J. Cary they continued to publish at St. James's Street until at least 1844. Cary was succeeded by George Frederick Cruchley, of 81,

Fleet Street, who took over the cartographical department and the stock-in-trade. In 1876 the whole of the copper-plates of Cary's three atlases passed from Cruchley into the hands of Messrs. Gall and Inglis of Edinburgh who, according to Sir H. G. Fordham, were still using them in 1910 with all indications of their seventeenth and eighteenth-century origin removed. Cary's maps show a marked improvement on all previous productions, the engraving being remarkably clear and distinct. The first atlas published by him was : *Cary's New and correct English Atlas*, 1787. This appears to have been very popular ; nine editions are known and there may be others. Cary first adopted the meridian of Greenwich in substitution for that of St. Paul's, London, in his map of England published in 1794. In 1804 he was awarded a gold medal by the Royal Society of Arts for the publication of Joseph Singer's *Survey of Cardiganshire*. For fuller detail of Cary and his publications see *John Cary, Engraver, Map, Chart and Printseller and Globe-Maker*. By Sir H. G. Fordham, Cambridge, 1925.

Chiswell, Richard. Bookseller, in London. Born in the parish of St. Botolph's, Aldersgate, on Jan. 4, 1639. His address is given as : (1) Two Angels and Crown, Little Britain ; and (2) Rose and Crown, St. Paul's Churchyard. John Dunton in his *Life and Errors*, says : " Mr. Richard Chiswell, who well deserves the title of Metropolitan Bookseller of England, if not of the whole world. His name at the bottom of a title-page does sufficiently recommend the book. He has not been known to print either a bad book, or on bad paper." Chiswell, in partnership with Thomas Basset, published Speed's *Theatre of the Empire of Great Britaine*, 1676, also an *Epitome of Mr. John Speed's Theatre of the Empire of Great Britaine, etc.*, 1676. He was also publisher to the Royal Society. He died May 3, 1711, and was buried in St. Botolph's Church, where a monument was erected to his memory by his son Richard Chiswell.

Churchill, Awnsham. Bookseller and publisher in London, at the Black Swan, in Paternoster Row, *c.* 1681—1728. Son of William Churchill of Dorchester, and an apprentice of George Sawbridge. His name appears as publisher of *The Touchstone of Precedents*, in 1681. In 1690 he took into partnership his brother John and together they published Gibson's edition of *Camden's Britannia* in 1695. (A later edition of this work dated 1722, was published by Awnsham alone.) Other topographical or cartographical works issued by them include, *A Collection of Voyages and Travels*, 1704 ; *A New View of London*, 1707 ; *A New Set of Maps, both of Ancient and Present Geography*, 1708 ; *The Compleat Geographer*, 1709 ; *Atlas Manuale*, 1709. Awnsham Churchill was considered the leading bookseller of the day ; he amassed a considerable fortune and purchased an estate in Dorset. He was M.P. for Dorchester between 1705—1710. He died on April 24, 1728.

Churchill, John. Bookseller and publisher in London, at the Black Swan, in Paternoster Row, *c.* 1690—1714. He entered into partnership with his brother, Awnsham Churchill, in 1690. They were the leading booksellers of the day, and amongst the numerous works published by them, the following are of topographical, or cartographical interest : Gibson's edition of *Camden's Britannia*, 1695 ; *A Collection of Voyages and Travels*, 1704, of which the first four volumes only were published. *A New View of London*, 1707 ; *A New Set of Maps, both of Ancient and Present Geography*, 1708 ; *The Compleat Geographer*, 1709 ; *Atlas Manuale*, 1709. John Churchill probably died soon after 1714, leaving three sons, two of whom were booksellers.

Clerk, Thomas. A Scottish engraver in the early part of the nineteenth century. From 1813 to 1823 his address in the Edinburgh Directory is given as 265 High Street, and from 1831 to 1835 as 22 St. James Square. He compiled *The Works of William Hogarth*, in two volumes, published in 1810, and engraved most of the plates. Maps by him include the *Soils and Roads in Dumbartonshire* for *General View of the Agriculture of Dumbarton*, 1811 ; *Roads of Perthshire* for *A Guide to the City of Perth*, 1813 ;

Atlantic Islands, *East India Isles*, *Jamaica*, and *Switzerland* for Thomson's *A New General Atlas*, 1817 ; a map of *Dumbarton Shire* by John Wood, published in 1818 ; and a *Plan of the Town of Kinross*, 1823.

Cockerill, Thomas. Publisher and bookseller in London from about 1674 to 1702. Until 1677 he was in business at the same address as Robert Morden, at the Atlas in Cornhill. In that year, or early in 1678, he moved to the Three Legs in the Poultry, over against the Stocks Market. In 1697 Cockerill moved to the corner of Warwick Lane, Paternoster Row, and in 1699, to the Three Legs and Bible against Grocers Hall in the Poultry. He dealt chiefly in educational and theological works but his name appears with R. Morden as a publisher of *Geography rectified : or a description of the World*, 1680, and *The new Description & State of England*, 1701.

Conder, Thomas. Engraver of maps and plans from about 1780 to 1801. His work appears in *The New British Traveller . . . by G. A. Walpoole*, 1784 ; *Historical Descriptions . . . of England and Wales*, [1786] ; *The History of Mexico . . . by C. Cullen*, 1787 ; *A New . . . Collection of . . . Voyages and Travels . . . By W. H. Portlock*, 1794 ; *A Topographical Description of the Western Territory of North America . . . by G. Imlay*, 1797 ; two atlases published by R. Wilkinson, 1794—1796 ; and *An Historical Geography of the Old and New Testament . . . by E. Wells*, 1801. Conder also engraved *A plan of the Town of Liverpool*, 1790.

Cooper, H. An engraver, at 28 Chancery Lane, London, during the early part of the nineteenth century. Between the years 1806 and 1810, he engraved a number of maps for the atlas to *The Cyclopædia . . . By A. Rees ; A new general Atlas . . . by Principal Playfair* ; and *A Topographical Dictionary of the United Kingdom . . . By B. P. Capper*. A map of London and its environs, engraved by him, appeared in various editions of Lockie's *Topography of London*.

Cooper, Mrs. Mary. Widow of Thomas Cooper, a bookseller and publisher, carried on the business at the sign of the Globe in Paternoster Row, London, from about 1740 to her death in 1761. She published *A plan of the town of Dunkirk*, engraved by R. Parr, in 1743 ; *View of the British Trade in the Mediterranean*, 1744 ; B. Langley's *A Survey of Westminster Bridge*, 1748 ; *The Small English Atlas*, 1749 ; *A Concise History of the City of London*, 1752 ; *A Survey of the Cities of London and Westminster, etc.*, 1753 ; *The Expedience . . . of a new Bridge at or near Black Fryars*, 1756.

Cowley, John. A political writer and geographer, flourished from about 1734 to 1744. He was the author of *The Candidates Guide : or the Electors Rights decided*, and *Orders and Resolutions of the House of Commons*, both published in 1734 ; *The Sailor's Companion*, 1740 ; *A View of the British Trade to the Mediterranean*, 1744, and *The Description of the Windward Passage*. He prepared maps for Sir Alexander Murray's *The True Interest of Great Britain, Ireland, etc.*, published in 1740, and for Dodsley's *Geography of England*, published in 1744. In the former work the maps comprise : *A Plan & Perspective View of the improved Land of Mingary* ; *A Map of the improved Moss and improveable Bay of Kintra* ; *A new Map of North Britain* ; *A Display of the Coasting Lines of six several Maps of North Britain* ; *A Map of . . . part of the Duke of Argyle's heritable Dukedom* ; *A hydrographical Description or Chart of the Sea Coasts of Great Britain*.

Cruchley, George Frederick. Map-seller, globe-maker, engraver and printer, was in business from about 1823 to 1876. His addresses are given as, 349 Oxford Street, until 1825 ; 38 Ludgate Street, until 1833 ; and afterwards, 81 Fleet Street. According to his own imprints he was previously employed with the famous firm of Arrowsmith. His early engravings and publications were chiefly of London and its environs but, about

1850, he took over the plates and stock-in-trade of the well-known firm of Cary, and his publications then became more general in character. In 1876, Cary's plates were taken over by the Scottish firm of Gall and Inglis and many of the original plates were in use at a comparatively recent date. In addition to maps Cruchley also issued a number of guide-books of London and at the end of *Cruchley's London in 1867*, is a *Catalogue of Maps, Globes, Atlases, &c., published by G. F. Cruchley, 81 Fleet Street, London.* Some interesting notes on Cruchley are given by Sir H. G. Fordham, on pp. xxviii and xxix, of his work, *John Cary*, 1925.

Darton, William. Geographer and publisher, at 40, Holborn Hill and, later, at 58, Holborn Hill, London. He was probably the son of William Darton, partner in a similar business at 55, Gracechurch Street, and many of his publications have the imprint: "W^m^. Darton, Jun^r^." The business at Holborn Hill first appeared in the Directory, in 1806, as W^m^. Darton, jun^r^.; from 1807 to 1810, as W. & T. Darton; and from the latter date until 1834, as William Darton alone. Thomas Darton appears to have set up in business for himself at 25, Great Surrey Street. From 1835 to 1837 the business was carried on under the style of W^m^. Darton & Son, and from 1838 as Darton and Clarke. The change from no. 40 to no. 58, Holborn Hill took place in 1810. William Darton published *Dix's Juvenile Atlas*, 1811; *Union Atlas*, 1812[–14]; *New Miniature Atlas*, [1820]; and *A Complete Atlas of the English Counties*, 1822.

Dicey, Cluer. Printer and publisher, in Aldermary Church Yard, during the middle of the eighteenth century. W. Dicey seems to have had a similar establishment in Bow Church Yard. The firm, which also had premises in Northampton, printed and published broadsides, prints, and chap-books. A collection of the latter was sold in Sotheby's at the sale of the Auchinleck Library on June 23, 1893. A collection of Speed's maps, with the imprint of C. Dicey and Co., was published about 1770. Sir George Fordham in the *Supplement* to his *Hertfordshire Maps*, 1914, mentions a *Catalogue of Maps, Prints, etc. Printed and Sold by Cluer Dicey and Richard Marshall, Aldermary Church-Yard, London*, 1764.

Dix, Thomas. A schoolmaster at Oundle in Northamptonshire and, afterwards, a surveyor and geographer of North Walsham in Norfolk in the early part of the nineteenth century, was the author of many works for the use of schools. He compiled *A Treatise on Land Surveying*, 1799; *A Treatise on the Construction and Copying all kinds of Maps*, 1805; *The Juvenile Atlas*, 1811; *Sketches of School Letters*; *Child's First Book of Arithmetic*; *First Principles of Astronomy*; and *A Complete Atlas of the English Counties.* The county maps of the last mentioned work were separately published between the years 1816 and 1821 by W. Darton of Holborn Hill, London, who completed and published the atlas in 1822 after the death of Thomas Dix.

Dodsley, Robert. Poet, dramatist, miscellaneous writer, and publisher, was born in 1703, near Mansfield, Nottinghamshire. He was in early days an apprentice to a stocking-weaver, and afterwards entered service as a footman. Several of his small poems were written while acting in this position in the service of the Hon. Mrs. Lowther. In 1735 Dodsley entered on his career as a bookseller at the sign of Tully's Head, Pall Mall, where his shop became the resort of famous literary men and women. Dr. Samuel Johnson sold his first original publication to Dodsley and it was the latter who first suggested to Johnson the idea of an English dictionary. Dodsley's literary schemes included, *The Public Register*, begun January 3, 1741, of which twenty-four numbers were issued; *The Museum*, 1746, of which three volumes appeared; the *Preceptor*, 1748; and the *Annual Register*, 1758. The last-mentioned was probably the most important and successful of his projects. In its preparation Dodsley had the liberal assistance of Edmund Burke. The following topographical works were issued by Dodsley: *The Geography of England*, with maps by J. Cowley, 1744, re-

published in 1765, without maps ; *England Illustrated*, 1764, in two volumes ; *A New and Accurate Description of the Present Great Roads . . . of England and Wales*, 1756 and 1759 ; *London and its Environs Described*, 1761. 6 vols. He also published the first edition in London of Lewis Evans' *A General Map of the Middle British Colonies in America*, 1755, and *A New and Correct Plan of London*, 1761. Dodsley died at Durham, in 1764, age 61 years.

Drayton, Michael. Poet, born in 1563, at Hartshill, near Atherstone in Warwickshire. The first part of eighteen songs, *Poly-Olbion, or a Chorographicall Description of all the Tracts, Rivers, Mountains, Forests, and other parts . . . of Great Britaine*, with eighteen maps, the most famous of his works, was published in 1612, but for the second part Drayton did not find a publisher until 1622. He died in London Dec. 23, 1631, and was buried in Westminster Abbey.

Durham, Thomas. 1595. The only entry found is "The Isle of Man described by Thomas Durham, 1595," in *The Theatre of the Empire of Great Britaine . . . by John Speed*, 1611.

Ellis, John. An engraver of maps and views from about 1750 to 1796. In conjunction with W. Palmer, Ellis engraved the maps for his *English Atlas*, first published in 1766, and Bernard Scalé's *Hibernian Atlas*, published in 1776. He engraved a plan of *Newcastle-upon-Tyne*, surveyed by C. Hutton in 1770 ; maps of roads in *The Kentish Traveller's Companion*, 1776 ; a plan of *London and Westminster*, by Bowles, 1780 ; maps of *Sardinia*, [1780] ; *Diocese of Canterbury*, 1782 ; *Corsica*, [1790] ; *Thanet*, [1796] ; *Twenty-five miles round London*, and many views. According to Gough's *British Topography* (vol. I, p. 144), some of the engravings in Hayes' *A Natural History of British Birds*, 1775, were by J. Ellis.

Faulkner, George. A famous printer and bookseller in Dublin, was born about 1700. He served his apprenticeship with a printer in Dublin named Thomas Hume and for a short period, in 1726, was with the famous London printer, William Bowyer. He commenced his business career soon afterwards, at the corner of Christ Church Lane, in Skinner's Row, Dublin, where he was in partnership with James Hoey. The partnership was soon dissolved and, in 1730, he moved to Essex Street. He was in many ways an eccentric man and often the subject of ridicule, but he became the friend of Dean Swift, by whom he was called ' the prince of Dublin printers,' and Lord Chesterfield, the Viceroy of Ireland. The works of Swift were printed by him and, after the Dean's death, he issued a set of his works in twenty volumes. He is credited with having refused an offer of knighthood from the Viceroy, but became an alderman of Dublin in 1770. He died Aug. 30, 1775.

Fowler, W. A little-known engraver during the middle years of the eighteenth century. A map of Oxfordshire, by him, appears in *The Universal Magazine*, Feb., 1765 ; and maps of Wiltshire and Worcestershire in *Ellis's* English Atlas, 1766.

Gardner, Thomas. Engraved the plates for *A Pocket-Guide to the English Traveller*, MDCCXIX, and is identified, in the British Museum *Catalogue of Printed Books*, with the antiquary of Southwold who compiled *An Historical Account of Dunwich*, MDCCLIV. Gardner died in 1769, aged 79, and was buried in Southwold Churchyard.

Garrett, John. Bookseller and publisher, during the second half of the seventeenth century, was probably the successor of Thomas Jenner. His address is given in various forms : (*a*) at his Shop going up the Stairs of the Royal Exchange, Cornhill, (*b*) in the Piazza of the Exchange, (*c*) near the Stairs of the Royal Exchange, (*d*) at the South

Side of the Royal Exchange. He dealt chiefly in maps, copy-books and other educational works, and his entries appear in the *Term Catalogues* between 1676 and 1697. A short catalogue of his publications appears at the end of *Albert Durer Revived: or a book of drawing . . . or colouring of Maps and Prints*, 1679. In addition to *A Direction for the English Traveller*, and *A Book of the Names of all Parishes*, Garrett published *A Book of Maps exactly describing Europe*, 1676; *A map of the Land of Canaan*, 1676; *A most exact and accurate Map of the World*, 1676; *The Kingdome of England . . . W. Hollar fecit*, 1676; views of Windsor, 1687, Bow Church, 1687, and New Bedlam, 1694. He also sold books by Edward Cocker, and a work entitled, *Thographia: or a new Art of writing short-hand.*

Gibson, John. A prolific engraver of maps and charts from about 1750 to 1787. In 1758 his address is given as No. 18 George's Court, Clerkenwell. He is often associated with other famous map engravers of the period, including Emanuel and Thomas Bowen, Thomas Kitchin, and Thomas Jefferys. Maps and charts engraved by Gibson appear in Salmon's *The Universal Traveller*, 1752—1753; Palairet's *Atlas Méthodique*, 1755; *The Grand Magazine of Magazines*, 1759; *The Gentleman's Magazine*, 1758—1766, including a set of maps of the Roads of England and Wales; *The Universal Museum*, 1762—1764; *The American Gazetteer . . . of the New World*, 1762; and Capt. J. S. Speer's *The West India Pilot*, 1771. He produced the *Atlas Minimus*, published by Newbery in 1758 and engraved the maps to accompany Rider's *A new History of England*, 1761—1764. He also engraved a pirated copy of Lewis Evans' famous map *A general Map of the Middle British Colonies in America*, published by T. Kitchin in 1756, and many other single maps.

Goddard, John, junior. Engraver of a map of Norfolk in Bassett and Chiswell's edition of Speed's atlas, published in 1676. There is also a map of *Virginia*, dated 1651, in Bland's *The Discovery of New Brittaine*; a map of *Asia*, dated 1652, in Heylyn's *Cosmographie*; title-pages of Austen's *The Spiritual Use of an Orchard*, 1657, and Austin's *Cato Major*, 1671; and a set of plates of *The Seven Deadly Sins*, sold by T. Jenner, engraved by J. Goddard, but without the *junior* attached.

Gordon, Robert. Of Straloch, geographer, 1580—1661. Born at Kinmundy, Aberdeenshire, on Sept. 14, 1580. He was educated at Marischal College, Aberdeen, and continued his studies in Paris until the death of his father in 1600. Gordon appears to have been a leader in the political affairs of his day; he was also an enthusiastic geographer, and probably for this reason was persuaded by Sir John Scott of Scotstarvet to undertake the task of correcting and completing Timothy Pont's maps, which had been neglected by Pont's heirs, until rescued by King James VI, and placed in the royal archives. Scott urged the King to have the maps published, and undertook to superintend the work of publication. Gordon, with the assistance of his son James, completed the manuscripts for the engravers, and added several maps of their own to fill the place of those missing from Pont's manuscripts. Gordon appears to have completed his task by the beginning of 1648, but it was not until 1654, that the maps appeared as Vol. v of Blaeu's *Atlas Novus*. The maps in the 1662 issue of Blaeu's atlas are the same, but an entirely new description of Aberdeen and Banff by Robert Gordon is added to the one previously given. Several manuscript maps by Gordon are now preserved in the Advocates' Library, Edinburgh. Gordon died in August, 1661, in his eighty-first year.

Grose, Francis. An antiquary, draughtsman, and author, was born about 1731 at Greenford, Middlesex. His father, a native of Berne, Switzerland, was a successful jeweller in Richmond and left him a considerable fortune. He studied art at Shipley's Drawing School and became a member of the Incorporated Society of Artists. From 1755 to 1763 he was Richmond Herald and, in 1757, was elected a Fellow of the Society of

Antiquaries. He took a prominent part in the Militia movement, becoming in turn Adjutant and Paymaster in the Hampshire Militia and Captain and Adjutant in the Surrey Militia. The topographical and antiquarian work of Grose include *The Antiquities of England and Wales*, in four volumes, 1773—1787 ; *The Antiquarian Repertory*, 1775 ; *History of Dover Castle*, by Rev. Wm. Darell, [edited], 1786 ; *The Antiquities of Scotland*, in two volumes, 1789—1791, for which he toured Scotland in 1789. A similar work for Ireland was projected, but, during his tour of that country, he died suddenly from an apoplectic fit, May 12, 1791. The Irish work was issued by Dr. Ledwich, in two volumes, 1791—1795. Grose also contributed to *Archæologia* and compiled several other works.

Hall, Sidney. An engraver of maps from about 1818 to 1860, lived in Bury Street, Bloomsbury. In addition to the atlases of England and Wales produced by him, he engraved the maps for Vane's *Narrative of the Peninsular War*, 1828, and the same author's *Narrative of the War in Germany and France*, 1830 ; *A new General Atlas*, 1830 ; *An Historical Atlas*, 1830 ; Gorton's *Topographical Dictionary*, 1833 ; and eighty-two maps for Murray's *Encyclopædia of Geography*, 1834, etc. Separate maps or plans by him include, *A Guide through London*, 1821 ; *Northern (and Southern) part of Angusshire*, 1825, published in a large *Atlas of Scotland*, 1832 ; and two plans of *Bristol*, [1840] and [1850].

Harris, John. Draughtsman and engraver of maps, plans, charts, views, and architectural subjects, flourished from about 1686 to 1746. His output of work was very large and, in addition to the maps mentioned in this work, included *A Chart of the East Coast from Boston . . . to Dover*, 1693 ; *A New Map of the English Empire in America*, [1696] ; *Actuall Survey of London, etc.*, 1700 ; *The City and Harbour of Cadiz*, [1702] ; *An Actuall Survey of the Parish of St. Dunstan, Stepney*, 1703 ; *A Map of the Hamlet of Mile End Old-Town*, 1703 ; views in *Britannia Illustrata*, 1709–31 ; *Views of all the Cathedrall Churches of England and Wales*, [1730] ; and, with J. Kip, *Views of Noblemen and Gentlemen's Seats in the County of Kent*, [1720].

Hebb, Andrew. Bookseller, at the Bell in St. Paul's Churchyard, *c.* 1625—1648. In 1625, he appears to have acquired all the copyrights of Thomas Adams. One of the earliest works published by Hebb was the English translation of Peter Martyr's *Historie of the West Indies* [eight decades], published about 1626, followed by *Ludus Literarius, or, The Grammar Schoole*, 1627 ; *The Fables of Esop*, in English, 1634 ; and Camden's *Britannia* in 1637. Hebb died of dropsy Oct. 28, 1648.

Hinton, John. A well-known bookseller and publisher at (1) King's Arms, in St. Paul's Church Yard, from about 1745 to 1752 ; (2) King's Arms, in Newgate Street, from 1752 to 1765 ; (3) King's Arms, 34 Paternoster Row, from 1766 until his death, May 21, 1781. He published vols. 1–68 of the *Universal Magazine*, 1747—1781, and some of Bowen and Kitchen's maps in the *Large English Atlas*, 1749—1751.

Hitch, Charles. A noted bookseller and publisher, was apprenticed to Arthur Bettesworth, of the Red Lion, in Paternoster Row, London, on April 7, 1718. From about 1730 to 1739 he was in partnership with his old master and married his daughter Elizabeth. In the latter year, Bettesworth died and Hitch carried on the business alone until 1754. From then until 1763 the business was in the name of Hitch and Hawes. Hitch was Master of the Stationers' Company in 1758 and a Commissioner of the Peace for the County of Essex. His publications included Badeslade's *Chorographia Britanniæ*, [1743], and Gibson's edition of Camden's *Britannia*, 1753. He died Sept. 20, 1764, and was buried at East Ham.

Hogenberg, Remigius. Engraver, worked in England 1572—1589. Believed to have been the son of Hans Hogenberg, a Flemish painter, who died, about 1544, at Mechlin

where Remigius was born, but the date of his birth is not known. He came to England about 1572 and was engaged by Archbishop Parker who employed him and Richard Lyne, another engraver, in constructing genealogies. Hogenberg engraved, from a drawing by Lyne, a small portrait of Archbishop Parker which he signed " R. Berg " and dated 1572, afterwards altered to 1573. Virtue thought this to be the first portrait engraved in England. Sometime between 1572 and 1575 Hogenberg engraved a portrait of Queen Elizabeth. Between 1575 and 1578 he engraved the following maps for Saxton's *Atlas of England and Wales:* Kent (combined with Middlesex, Surrey and Sussex), Wilts, Devon, Shropshire, Hereford, Lincoln and Nottingham, Lancaster, Denbigh, Flint, and Montgomery. He engraved, for John Hooker, Mayor of Exeter, a plan of the City of Exeter dated 1587, which appears to be the latest plate on which his name occurs.

Hogg, Alexander. Publisher and bookseller, at the King's Arms, No. 16 Paternoster Row, London, from about 1778 to 1805. From the latter date until 1817, the business appears in the directory as Hogg and Co., and from 1818, as H. Hogg. He became prominent as one of the publishers of elaborately advertised works, issued in weekly numbers, called *Paternoster-Row Numbers*. These included such works as *New, authentic, and complete collection of Voyages round the World*, 1784; *The New British Traveller*, [1784]; *Historical Descriptions . . . of the Antiquities of England and Wales*, [1786]; and *The New and complete English Traveller*, [1794].

Hogius, Cornelius. Hogius engraved the map of Norfolk in Saxton's atlas of England, 1579. Nothing more appears to be known of him.

Hole, William. One of the earliest English engravers, worked in London from about 1600 to 1646. He engraved the title-page and several maps in Camden's *Britannia*, 1607, the famous map of Virginia, by Captain John Smith, 1608, and two maps, "Gosen" and Arabia, in Raleigh's *History of the World*, 1614. Hole is perhaps better known as an engraver of portraits, book-illustrations and title-pages and as being the earliest engraver of music on copper-plates in this country. His portraits include Charles I, Henry, Prince of Wales, Martin Billingsley, George Chapman, Thomas Coryat, Michael Drayton, Thomas Egerton, Viscount Brackley, Giovanni Florio, Sir John Hayward, and George Wither. He also engraved the whole of the plates of Billingsley's *The Pen's Excellencie*, and possibly the bird's-eye views and maps of Drayton's *Poly-Olbion*. As an engraver of music, Hole produced the now very rare *Parthenia* in 1611 and *Prime Musiche nuove di Angelo Notari* in 1613. An unsigned work, *Fantasies of Three Parts*, by Orlando Gibbons is also thought to have been engraved by him.

Hollar, Wencelaus. Engraver, was born at Prague in 1607. It was intended by his father that he should follow the profession of the law. After the battle of Prague, in 1619, the ruin of his family was completed by the confiscation of their property, and he had to depend for future maintenance upon a dexterity which he had very early shown in the use of his pen and pencil. He adopted, and excelled in, a style best suited to chorography or delineation of cities. On leaving the home of his parents he went to reside at Frankfurt where he received instructions from Mathew Merian the well-known engraver. Hollar travelled through Germany taking views of the chief towns, and making sketches of paintings from the best collections. In 1636, Thomas, Earl of Arundel, met Hollar at Cologne, who exhibited his works to him, and this circumstance was the origin of all his good fortune. Hollar was at once retained in Arundel's suite. Soon after his arrival in England he published a view of London from Greenwich Park. In 1644 he had completed a collection of sixty plates of dresses of ladies of different European countries which was entitled *Aula Veneris*. In 1645 he became a soldier, and with Robert Peak, an artist and print-seller, and W. Faithorne, held a commission under the Marquis of Winchester, and was present with him at Basing

House during its defence in a siege which lasted two months. After the fall of Basing House Hollar was taken prisoner, but escaped to Antwerp where he found his patron, the Earl of Arundel. After the death of Arundel, which occurred in 1646, Hollar remained for some years in Antwerp earning a precarious livelihood by working for dealers in prints in that city. It is not surprising, therefore, that he was willing, on the invitation of Sir W. Dugdale, to return to England with a prospect of work on the *Monasticon*, which Dugdale was contemplating; he accordingly returned to England in 1652. At the Restoration Hollar received the title of the King's Iconographer. In 1669 he accepted a post, offered him by Lord Howard (who had been appointed Governor of Tangiers), to make plans and drafts of the Tangiers' fortifications. This work occupied him for about a year, and on his return to London he finished the plates and was rewarded for all his toil with a grant from the Crown of £100. In 1672, Hollar had a permanent engagement, with Dugdale and Sandford, engraving the plates for the *Monasticon* and the *Royal Genealogy*. His last plate, left unfinished owing to failing health, was of the tomb of Edward IV in the Chapel of Windsor Castle. He died in 1677 and was buried in the Churchyard of St. Margaret's, Westminster. According to the *Dictionary of National Biography* Hollar's work amounted to 2,733 prints.

Hondius, Jodocus. Engraver and publisher, born in 1563. Walpole gives his birthplace as Ghent, Gough says he was born at Walkene, in Flanders. Hondius came to London when he was about 28 years of age, and set up as a type-founder, afterwards making mathematical instruments and engraving maps and charts. In 1586 he married, in London, the sister of Pieter van den Keere, and in about 1594 removed to Amsterdam, where he became connected with (and eventually acquired) the famous publishing business of Gerard Mercator. In 1606 Hondius issued an enlarged edition of Mercator's atlas, now known as the *Mercator-Hondius Atlas*. Hondius died at Amsterdam Feb. 10, 1611, at the early age of 48 years. His son Henry continued the publishing business and issued several enlarged editions of the *Mercator-Hondius Atlas*. On the death of Henry Hondius, in about 1657, Jan Jansson, who had married the daughter of Jodocus Hondius, acquired entire control of the establishment. Hondius engraved a number of the maps in John Speed's *Theatre of the Empire of Great Britain*, 1611–12, thirty of the maps are signed by him and, most of them, dated 1610. The following are some of the more interesting maps engraved by Hondius: Three charts of the coasts of Europe in Wagenaer's *Mariner's Mirrour*, 1588; *Americæ novissima descriptio*, 1589; *England*, with portrait of Queen Elizabeth, 1590; *France*, with portrait of Henri IV, 1591; a pair of Globes designed by Emerie Mollineux, 1592, now in the Middle Temple Library; *Typus Totius Orbis Terrarum c.* 1597, known as the Christian Knight map; the famous map of the World in two hemispheres illustrating the voyages of Drake and Cavendish, bearing the following title: *Vera totius expeditionis nauticae Descriptio D. Franc. Draci . . . addita est etiam . . . delineatio navigationis Thomas Candissh . . . Jodocus Hondius.*

Hooper, Samuel. Bookseller, publisher, and stationer, from about 1770 to 1793, at (1) New Church, Strand; (2) 25, Ludgate Hill; (3) 212, High Holborn. Owing to his negligent and unpunctual habits he was not a successful man in business and his friend, Francis Grose, the eminent antiquary, for whom he published, frequently complained of dilatory ways. He published *A New and Compleat Map of North Carolina, by Capt. Collet*, 1770, and charts by Capt. J. S. Speer, 1771. In 1777 he published *A Catalogue of the Cottonian Library*. At his death, Feb. 20, 1793, the business was carried on by his widow, Mary Hooper.

Humble, George. Bookseller and print-seller in London, from about 1608 to 1640. His addresses are given as: (1) The White Horse, Pope's Head Alley, 1610–27; (2) In Pope's Head Palace, 1627. He was, for a short time, partner with John Sudbury and

together they published John Speed's *Theatre of the Empire of Great Britaine*, 1611–12, and the second edition, 1614–16. The later edition, 1627–31, was published by Humble alone. He also published about 1620 *England, Wales, Scotland, and Ireland abridged*, and a later edition dated 1627. Humble died in Pope's Head Alley on Aug. 7, 1640.

Humble, William. Bookseller in London, from about 1640 to 1659, at Pope's Head Palace, probably a son of George Humble. His principal topographical and cartographical work appears to have been the 1646 edition of Speed's *Prospect of the most famous parts of the World*. In 1659, he assigned the copyright of Speed's works to William Garrett.

Jansson, John. Contemporary and rival of John Blaeu, was born at Arnheim *c.* 1596, and died at Amsterdam in 1664. He was admitted to the Printers' Guild in 1618. In his early days Jansson was associated with Henry Hondius in the completion of the *Mercator-Hondius Atlas*, many of the maps bearing his name. He married the daughter of Jodocus Hondius and, on the death of his brother-in-law (Henry) about 1657 acquired entire control of the publishing business founded by Gerard Mercator in the latter half of the sixteenth century. Among the earliest publications of Jansson are: maps of France and Italy, 1616; an edition of Ptolemy's Geography by Magini, 1617; *Novus Tabularum Geographicarum Belgicæ Liber . . . per A. Goos. Amstelodami, excudebat Joannes Jansonius, Anno* 1619, and a small metal globe, 4½ inches in diameter, supported by the figure "Atlas," upon which is mounted a map of the world bearing the imprint: "Amstelodami excudebat Joannes Janssonius, 1620." In 1633 Jansson, together with Henry Hondius, issued the second volume of the Mercator-Hondius atlas with the title: *L'Appendice de l'Atlas de G. Mercator et J. Hondius*, the third volume appeared in 1642, and in 1646 volume 4 was issued containing a description of England in Latin, taken from Camden's *Britannia*, accompanied by maps of the counties of England and Wales compiled from those of Saxton and Speed. This completed Jansson's atlas in four volumes, dated 1646–47. Enlarged editions, in six volumes, were issued subsequently in Dutch, French, German and Latin.

Peter Schenk acquired Jansson's business and in *c.* 1683 republished his atlas including the English counties.

Jefferys, Thomas. Author, publisher and map-engraver from about 1732—1771. His addresses are given as: (1) Red Lyon Street, near St. John's Gate; and (2) St. Martin's Lane, Charing Cross. He became geographer to the Prince of Wales, and afterwards to George III. Jefferys is considered the most prolific of the eighteenth-century cartographers. His earliest publications were Morden and Lea's edition of William Morgan's *Map of London, A new and exact Plan of the Citys of London and Westminster*, 1735, and, in conjunction with Thomas Kitchin, *The Small English Atlas*, 1749. From this date to the appearance of his large county maps he appears to have been engaged upon miscellaneous engravings for various magazines, and publications of learned societies. In 1760 Jefferys engraved the plates for, and published, *The Natural and Civil History of the French Dominions in North and South America*. He engraved Benjamin Donn's large map of Devonshire, on the scale of one inch to the mile, published in 1765, this being the first map to obtain the award of £100 offered in 1759 by the Royal Society of Arts for an accurate survey of any county. In response to the offer by the Society of Arts to give a premium for the production of large scale county maps Jefferys surveyed, and engraved the maps of Bedfordshire 1765, Huntingdonshire 1766, Oxfordshire 1766–67, Durham and Westmoreland 1768. He also engraved and published *A New Plan of the City of London in* 1766. From 1767 to 1770 Jefferys was engaged on his map of Yorkshire, in twenty sheets, but he does not appear to have received the Society of Arts' award. After Jefferys' decease the plates of the Yorkshire map were purchased by Robert Sayer. The latter years of Jefferys' life were spent

in engraving three of his most important works ; *The American Atlas or A Geographical Description of the Whole Continent of America, The North American Pilot* and *The West Indian Atlas*. These were published by Sayer and Bennett in 1775. Jefferys died Nov. 20, 1771. He was succeeded by William Faden.

Jenner, Thomas. Bookseller, print-seller and engraver, 1623–68. His addresses are given as : (1) At the White Beare, near the Exchange ; (2) South Entrance to the Royall Exchange. One of his earliest works appears to be *The Soules Solace*, published in 1626. He published the 1643 edition of *A Direction for the English Traviller*, followed by other editions in 1657, 1662 and 1668. Other works issued include *London's Blame if not its Shame*, 1651 ; *The Path of Life*, 1656, illustrated with copper-plate views. In 1653, Jenner engraved a plate of a large ship, called *The Soverayne of the Seas, built in the yeare* 1637. This was apparently copied from an earlier print engraved by John Payne.

Johnston, Alexander Keith (1804–1871). Younger brother of Sir Wm. Johnston, whom he joined in business, 1826. Through his influence the firm developed production of cartography. First maps published in 1830 as *A Traveller's Guide*. Published *National Atlas*, 1843. Humboldt, the German Scientist, drew his attention to physical geography, and in 1848 *Physical Atlas* published, the pioneer work in English in sphere of physical geography. Plans of Edinburgh from 1834 onwards, including Lancefield's Map, 1851. Thirty-inch diameter physical globe, 1851. In 1861 appeared *Royal Atlas*, subsequently republished in many editions. Other works were *Dictionary of Geography* (1850), Atlas to accompany Alison's *History of Europe* (1850), *Atlas of the United States* (1857), appointed Geographer to the Queen on the publication of the *National Atlas*, and received LL.D. degree from Edinburgh University (1865), and in 1871 Patron's Gold Medal of Royal Geographical Society. His son, Alexander Keith, was well known as an explorer, and died at Berobero in East Africa, 1879.

Johnston, Sir William (1802–1888). Geographical Publisher, Lord Provost of Edinburgh 1844—1851, founder of W. & A. K. Johnston, Edinburgh. Began business as steel-plate and copper-plate Printer in 1825 at 6 Hill Square, Edinburgh. Business transferred in 1826 to 160 High Street, in 1837 to 4 St. Andrew Square, and in 1879 to Edina Works, Easter Road. Firm appointed engravers to King William IV and to Queen Victoria, and later, Geographers to the Queen.

Keere, Pieter van den. A Dutch artist, engraver, and bookseller, believed to be the son of Henri van den Keere, of Ghent ; flourished from about 1590 to 1620. He worked for some time in England, probably with Jodocus Hondius who married his sister in London. He afterwards returned to Amsterdam where, in a work published in 1619, entitled *Journal ou Description du Merveilleux Voyage de G. Schouten*, he is described as "Tailleur de Cartes demeurant en la Calverstraet." His most famous cartographical work was *Germania Inferior*, published at Amsterdam in 1617, for which Keere was awarded a state gift of 150 guldens. Other maps engraved by Keere include a plan of London for Norden's *Speculum Britanniæ*, 1593 ; charts, dated 1593—1595, for Bernard's *Description de la Mer Mediterranee*, 1599 ; a set of maps for *Caert-Thresoor*, 1598 ; maps of the Counties of England, 1599 ; maps and views in Guicciardin's *Description de toutes les Pay-Bas*, 1613 ; a view of *Constantinople*, 1616, and many separate maps and views.

Kip, William. Engraver, worked from about 1598 to 1635. He engraved the map of *Hartfordshire* in Norden's *Speculi Britanniæ pars : The Description of Hartfordshire*, 1598 ; thirty-three maps for Camden's *Britannia*, 1607 ; and the small circular map of England and Wales in J. van Langeren's *Direction for the English Traviller*, 1635. Kip's most elaborate work appeared in the *Archs of Triumph* by Stephen Harrison,

1604, a pictorial representation of the triumphal arches erected in 1603–4 to welcome the entry of James I into the city of London. Kip engraved the title-page and seven plates.

Kirkwood, James. Originally a watchmaker in Perth, became an engraver of ornamental writing and founded the business of James Kirkwood and Sons, carried on at No. 19, Parliament Square, Edinburgh, until 1824. In that year a fire, which started at No. 19, destroyed a considerable amount of property in Parliament Square and the immediate neighbourhood, and compelled the firm to find new premises. For a short time it occupied 166, High Street, and afterwards, 11, South St. Andrew Street, where it remained in existence until 1851. James Kirkwood engraved a plan of the town of Perth, which was published in an edition of *The Muses Threnodie*, edited by James Cant, 1774.

Kirkwood, Robert. Son of the above, and partner in the firm of Kirkwood and Sons, acquired even greater fame than his father as an engraver of ornamental writing. His cartographical work included a plan of the city and environs of *Edinburgh*, in ten sheets, and an ancient plan of the same city, both published in 1817; a map of *St. Helena*, 1815, and probably many of the maps issued under the firm's name. He patented certain improvements in the copper-plate printing press in 1803; produced *An Improved Method of Teaching Writing*, in 1808; and a series of illustrations of Edinburgh, in 1818. The plates in Deuchar's *British Crests*, published in 1817, were also engraved by him. An entry in *The Scot's Magazine*, 1818, records the death of Robert Kirkwood, Engraver, on Nov. 14, 1818.

Kitchin, Thomas. An engraver and publisher, worked in London, at the Star, opposite Ely Gate, Holborn, from about 1738 to 1776. His chief productions were maps, plans, and charts, for which he was appointed Hydrographer to the King, but he also engraved book-plates and portraits. He worked with Emanuel Bowen and Thomas Jefferys and assisted in producing many of the English atlases and maps during the middle of the eighteenth century. His output of work was very large. Two important maps engraved by Kitchin were *A Map of the British and French Dominions in North America . . . By . . . Jn°. Mitchell . . .* 1755, considered to be the most accurate map of the period and one that was used at the peace council at the close of the Revolutionary War, and a *Map of the County of Northumberland . . . By Lieut. A. Armstrong . . .* 1769, which received an award of fifty guineas from the Royal Society of Arts. He also issued in 1756 a pirated edition of *A general Map of the Middle British Colonies in America . . . By Mr. Lewis Evans.* In the later years of his life Kitchin was assisted by his son, many of his maps being signed "T. Kitchin, Sen^r," and the name of the business is given as "Kitchin & Son." He died at St. Albans in June, 1784.

On a map entitled *The Country twenty-five miles round New York*, the imprint reads "Published . . . 1st November, 1776, by W. Hawkes (Successor to T. Kitchin), No. 59, Holborn Hill."

Lamb, Francis. Publisher and engraver, from about 1670 to 1700. His addresses are given as: (1) Peuter Plater Alley, Gracechurch Street, and (2) Next but one to the White Swan in Newgate Street. His first publication appears to have been *Astroscopium: or two Hemispheres*, issued in 1673, but he was probably engraving maps before that date. Lamb engraved the maps for Petty's *A Geographical Description of the Kingdom of Ireland*, [1685]; and maps or charts for Seller's *English Pilot*, 1671, and *Atlas Maritimus*, 1675; Speed's *Prospect of the most famous parts of the World*, 1676; Collin's *Great Britain's Coasting Pilot*, 1693; maps of *Kent* and *Essex*, for John Ogilby, [1670]; *The Land of Canaan*, for John More, 1682, and various other single maps.

Langeren, Jacob van. Engraver, 1635. Very little appears to be known of Langeren, but he engraved the maps for *A Direction for the English Traviller*, published in 1635, and probably engraved the plates for Jenner's *Path of Life*, published in 1656, as plate 9, bears the initials, J. v. L.

Langley, Edward. Engraver, bookseller, printer, and publisher, at 173, High Street, Borough, London, from about 1804 to 1835. From 1807 to 1820 the name of the firm appears in the directory as Langley and Belch and from 1821 to 1835 as E. Langley. Most of the maps issued by the firm have the imprint of Langley and Belch. Maps of the counties of England and Wales, dated 1817 and 1818, were issued separately and also as an atlas, with the title *Langley's New County Atlas of England and Wales.* The maps were re-issued by Joseph Phelps, of 27, Paternoster Row, London, in 1820. *A plan of London, with a Companion*, was issued in 1812, and again in 1816, and a map of England and Wales in 1817.

Laurie, Robert. Engraver and cartographical publisher, was born about 1755. In his early days he was a mezzotint engraver of some repute and between the years 1770 and 1776 he received several premiums from the Royal Society of Arts for drawings and designs, including one of thirty guineas for inventing a method of printing mezzotint engravings in colour. He engraved a large number of portraits and many biblical and theatrical groups. On his earlier engravings his name is spelt as Lowry, Lowery, Lowrie, or Lawrie. Many of his prints were published by Robert Sayer, but a portrait of David Garrick was published by Laurie himself, March 15, 1779, at No. 48, opposite the Gardens, Grays Inn Lane. In 1794, Robert Laurie, in partnership with James Whittle, succeeded to the flourishing business of Robert Sayer, map, chart, and print-seller, at the Golden Buck, No. 53, Fleet Street, and from about 1797 he seems to have devoted all his time to the publishing business. A large number of maritime atlases and new editions of the most famous works of Kitchin, Jefferys, and other cartographers were issued between the years 1794 and 1812. Laurie retired in 1812 and died at Broxbourne, May 19, 1836, aged 81 years. James Whittle took into partnership Richard Holmes Laurie, son of Robert, under whom the business finally developed into a famous publishing house for nautical charts, still in existence to-day as part of the firm of Imray, Laurie, Norie & Wilson, Ltd.

Lea, Philip. Cartographer, globe-maker, and publisher of globes, maps, mathematical instruments and books, from about 1683 to 1700. His addresses are given as: the Atlas and Hercules, Poultry (or Cheapside), and Westminster Hall. He issued, in partnership with Robert Morden, the following works: *A new Terrestrial Globe*, [1683]; *A Map of Tartary*, [1690]; *A Book of the Prospects . . . in and about the City of London*, [1690]; *London, Westminster and Southwark*, in six sheets, 1690; *Actuall Survey of London*, 1700; and an edition of Ogilby and Morgan's large plan of *London*. In partnership with Moll, he issued *A New Map of Ireland*, in four sheets, [1692]. Other publications prepared or corrected by Lea include a later edition of an unknown map by Saxton, entitled *The Traveller's Guide, being the best mapp of the Kingdom of England . . . described by C. Saxton*, in twenty sheets, [1687]; a later edition of Saxton's famous atlas, *The Shires of England and Wales, described by C. Saxton*, [1690]; *An Atlas containing y^e best maps . . . of the World*, [1690]; *Hydrographia Universalis*, [1700], and *Index Villaris*, 1692. The date of his death is uncertain, but his widow was carrying on the business in Cheapside in 1703.

Lizars, Daniel. A Scottish engraver, was born in the early half of the eighteenth century and worked in Edinburgh from about 1776 to 1812. He was an apprentice of Andrew Bell, a famous engraver and proprietor of the original *Encyclopædia Britannica*. He engraved a plan of the town and harbour of *Dundee*, 1776; ruins of *St. Andrew's Cathedral*, to accompany a poem by John Copland, 1776; map of the

Country round Philadelphia, for the *Scots' Magazine*, 1776 ; a plate in Armstrong's *Survey of the Great Post Roads*, 1776 ; plans of Edinburgh in Arnot's *History of Edinburgh*, 1779 and 1787, in Denovan's *Edinburgh Directory*, 1804, and in various editions of *The New Picture of Edinburgh*, 1806, etc. ; and maps in vol. I of Kerr's *General History . . . of Voyages and Travels*, 1811. Apart from cartographical work Lizars engraved many portraits and historical subjects, including the portraits in an edition of Hume's *History of England*. He died Dec. 6, 1812, and was succeeded in the business by his son, William Home Lizars.

Lizars, William Home. A painter and engraver, was born in 1788. He was trained by his father and also studied at the Trustees Academy in Edinburgh. He was more interested in painting than in engraving and, between 1807 and 1812, many of his works were exhibited in his native town. In 1812, two paintings by him, *Reading the Will* and *A Scotch Wedding*, were exhibited at the Royal Academy, in London. He also took an active part in founding the Royal Scottish Academy. His father died in 1812 and, owing to the reduced circumstances of his family, he was compelled to return to the business of engraving, which was carried on, first, at 61, Princes Street, Edinburgh, and afterwards at 3, St. James's Square. He engraved Oliver's plan of Newcastle-upon-Tyne, 1831 ; maps published in the *Transactions of the Highland and Agricultural Society of Scotland*, 1837—1847 ; maps of the counties of Scotland in *The New Statistical Account of Scotland*, 1845 ; *The Young Scholar's Atlas*, 1850 ; *Modern and Ancient General Atlas of the World* ; and many other single maps. Apart from cartographical work, W. H. Lizars engraved the plates for *A System of Anatomical Plates of the Human Body*, written by his brother John, and published in 1822 ; a series of etchings of the great fire in Edinburgh, in 1824 ; *Picturesque Views of Edinburgh*, 1825 ; and the engravings for Sir William Jardine's *Naturalist's Library*, 1833–44. He died in Edinburgh, March 30, 1859.

Lodge, John. Geographer and engraver, of Charlotte Street, Bloomsbury, London, worked from about 1754 to 1794. He engraved a number of maps, including six of canals in England, for *The Gentleman's Magazine*, from 1754 to 1772, and about sixty maps for *The Political Magazine*, between 1780 and 1790, including a collection of maps of the counties of England and Wales. Other maps engraved by Lodge are to be found in the following works :—Belfour : *A new History of Scotland*, 1770 ; Adair : *The History of the American Indians*, 1775 ; Russell : *The History of America*, 1778 ; *The North American Gazetteer*, 1778 ; Galloway : *Letters to a Nobleman*, 1779 ; Carver : *The New Universal Traveller*, 1779 ; Andrews : *History of the War with America, France, etc.*, 1786 ; Cooke : *Modern . . . System of Universal Geography*.

Lothian, John. A geographer and publisher, from about 1825 to 1835, first at 41, St. Andrew's Square, Edinburgh, and afterwards at 37, George Square. Although he appears as a geographer after 1835 his name ceases to appear in the directory as a publisher. He published, in 1825, a plan of *Edinburgh*, interesting because it was engraved by G. Bartholomew, an ancestor of the famous John Bartholomew ; *Atlas of Modern Scotland*, 1826, the third edition of which was published by John Sutherland in 1838 ; Lothian's *Historical Atlas of Scotland*, 1829 ; and Lothian's *Pocket Bible Atlas*. He also compiled a *Table to find the number of days between two dates*, in 1839, and revised *The Peoples Atlas*, published by J. Macleod in 1846.

Luffman, John. Author, geographer, engraver, publisher and goldsmith, produced a large number of maps, plans and books, between 1776 and 1820. He moved about a good deal in the course of his career and his works were published from the following addresses :—98 Newgate Street, in 1776 ; 85 London Wall, in 1781 ; Alfred's Buildings, Windmill Street, Finsbury Square, in 1789 ; 2 Inner Sweetings Alley, Royal Exchange, in 1799 ; 28 Little Bell Alley, Coleman Street, from Oct. 1800 to about 1806, and

afterwards, at 377 Strand. His earliest cartographical work appears to have been in 1776 when he engraved some of the plates for Taylor and Skinner's *Survey . . . of the Roads of North Britain* and Armstrong's *An actual Survey of the Great Post-Roads between London and Edinburgh*. He engraved and published several fine works including *Select Plans of the principal Cities, Harbours, Forts, &c.*, 1801 ; *Luffman's Collection or A Geographical and Topographical Atlas*, consisting of two hundred plates, in two volumes, 1815, 1816 ; *Plans of the principal Fortresses in the Netherlands*, 1816 ; and *The World, engraved on 42 Copper Plates*, 1815. He paid a visit to Antigua between the years 1786 and 1788 and published a series of letters on his visit in 1789. He also engraved a fine map of the island which was published by Faden in 1793. In addition to his own publications he engraved the plates for Lavater's *Physiognomical Sketches* ; maps and plans for *The Little Sea Torch*, by J. T. Serres, 1801 ; and Capt. Andrew Armstrong's map of *Rutland*, 1781.

Marshall, John. Bookseller, from about 1695—1725, at the Bible in Gracechurch Street. He dealt chiefly in theological books, and up to 1699 appears to have been associated with William Marshall; after this date his name appears alone. His topographical and cartographical works appear to be few. In 1703, he published the third edition of Seller's *History of England*, at the end of which appears a catalogue of works issued by Marshall at that time, including the second edition of the above work.

Moffat, John. A Scottish engraver, flourished from about 1795. His address in 1813 is given as 15 Merchant Court, Edinburgh ; in 1818, as Buchanan Court, and in 1823, as again at Merchant Court. In 1831 the name appears as John Moffat & Co., and the address as 1 Milne Square. He engraved a number of maps for Kerr's *A General History . . . of Voyages and Travels*, 1811, etc. ; a map of the county of Dumfries for *General View of the Agriculture . . . in the County of Dumfries*, 1812 ; and three maps in Thomson's *A New General Atlas*, [1814], published in 1817. He also did some aquatints of views in India. The date of his death is unknown.

Moll, Herman. Geographer and bookseller from about 1688—1732. A Dutchman, who came to London about 1688. In his early career he sold maps in "Vanley's Court, in Blackfryers," and finally established himself in Devereux Court, Strand, where he acquired a considerable reputation for the excellence of his numerous maps and geographical compilations. He was an acquaintance of Dr. William Stukeley, to whom he dedicated his *Geographia Antiqua*, 1721. One of his earliest maps, *The Turnings of the River Forth with ye adjacent County of Clackmanan*, H. Moll, Sculp., is dated 1688. *A New Mapp giving a true description of Germany and the XVII Provinces*, followed in 1689. Other maps engraved, or published by Moll are : *A New Map of the Sea-Coasts of England, Scotland and Ireland, &c.*, 1690 ; *The South Part of Great Britain, called England and Wales*, 1710 ; *The North Part of Great Britain, called Scotland*, 1714 ; *A Pocket Companion of ye Roads of ye South Part of Great Britain*, 1717 ; *An actual Survey of the North Road from London, by York, to Berwick*, 1718 ; *A Set of Fifty new and correct maps of England and Wales*, 1724. Of Atlases of the World Moll published : A Modern Atlas without title, about 1700 ; *Atlas Manuale*, 1709 ; *Atlas Geographus*, 1711–17 ; also a large number of maps of Africa, America, Asia and Europe. Moll died in St. Clement Danes, Sept 22, 1732.

Morden, Robert. A bookseller, publisher, geographer and cartographer, at the Atlas in Cornhill from 1668 to 1703. The works issued by him include *Description and use of a large Quadrant . . . made by H. Sutton*, 1669 ; *Introduction to Astronomy, etc.*, 1675 and 1702 ; *Geography Rectified*, 1680 and later editions ; *Pocket Book Maps of all the Counties of England and Wales*, [1680] ; Petty's *A Geographicall Description of ye Kingdom of Ireland*, [1685] ; *A Book of Prospects . . . in and about the City of London*, [1690] ; *Sea Atlas*, 1699 ; *Atlas Terrestris*, 1700 ; *New Description and State*

of England, 1701 and 1704. Morden also prepared the maps for Gordon's *Geography Anatomized*, 1693, and Gibson's edition of *Camden's Britannia*, 1695, produced many single maps, charts and globes, and worked in collaboration with Philip Lea, William Berry and John Overton. He died in the parish of St. Christopher-le-Stock, London, 1703.

Morphew, John. Bookseller, near Stationers' Hall, from about 1706–20. Was one of the publishers of Herman Moll's *Atlas Geographus*, commenced in June, 1708, and published monthly, his numerous works were mainly political pamphlets, news-sheets and novels. He was considered one of the leading booksellers of his day, and appears to have been publishing in 1720. According to Arber, he apparently succeeded John Nutt, on the latter becoming a printer in The Savoy.

Moule, Thomas. Bookseller, and writer on heraldry and antiquities. Born on Jan. 14, 1784, in the parish of St. Marylebone, and carried on business as bookseller in Duke Street, Grosvenor Square, from about 1816—1823. He was for forty-four years inspector of ' Blind Letters ' in the General Post Office, and for a time held the post of Chamber-Keeper in the Lord Chamberlain's department, which gave him an official residence in the Stable Yard, St. James Palace, where he died on Jan. 14, 1851. His principal works are : *Bibliotheca Heraldica Magnæ Britanniæ*, 1822 ; *Essay on the Roman Villas of the Augustan Age*, 1833 ; *The English Counties delineated*, 2 vols., 1837 ; *The Heraldry of Fish : Notices of the Principal Families bearing Fish in their Arms*, 1842. He also contributed descriptive letter-press to : *Antiquities in Westminster Abbey*, 1825 ; *Great Britain Illustrated . . . by Westall* 1830 ; *Winkles's Architectural and Picturesque illustrations of the Cathedral Churches of England and Wales*, 1836–42. 3 vols.

Murray, John. Founder of the famous publishing house, now in Albemarle Street, London, was born in Edinburgh in 1745. The surname of the family at that time was McMurray and under that name he served in the Royal Marines from 1762 to 1768. Becoming dissatisfied with the prospects of promotion, he accepted an offer to take over the business of William Sandby, bookseller, at the sign of the Ship in Fleet Street. The site is now occupied by George Philip & Son, Ltd. He offered a partnership in the business to his friend, William Falconer, the seaman and poet, but, for some unknown reason, the offer was not accepted. According to a trade card issued at the time, McMurray described himself as John Murray (successor to Mr. Sandby), Bookseller and Stationer, at No. 32, over-against St. Dunstan's Church, in Fleet Street, London. From 1773 to 1776, Murray was the London agent for the *Edinburgh Magazine and Review* ; in 1780 he commenced a volume of annual intelligence under the title of the *London Mercury*, and in 1783, the *English Review*. He also published several volumes of the *Political Magazine*. He died on Nov. 6, 1793, at the early age of 48 and his only son, aged 15, being still at school, the business was carried on by the chief assistant, Samuel Highley. In 1795, a partnership was concluded between Murray and Highley which existed until 1803, when it was dissolved and Murray carried on alone at 32, Fleet Street. He died in 1843 and was succeeded by his son the third John Murray, one of whose principal achievements was the invention and in great part the writing of the famous Handbooks for Travellers.

After leaving the University of Edinburgh he spent all his holidays travelling over Europe from Silesia to Italy and from Spain to the Danube. He wrote the Handbooks of Holland, Belgium, North and East Germany, Switzerland and part of France from his own notes made on the spot. These were published in 1836 onwards, and in due course the series included all of the continent of Europe, England, India, Japan and New Zealand. Baedeker's books were in the first instance based upon Murray's to whom he owed the idea and, in great part, his materials. The third John Murray died in 1892 and was succeeded by his son, the fourth John, (now Sir John Murray, K.C.V.O.) and the fifth John, Lieut.-Col. John Murray, D.S.O.

Newbery, Francis, junior. Bookseller and publisher, 1743—1818, at 65, St. Paul's Churchyard. Son of John Newbery. Born on July 6, 1743. From the death of his father, in 1767, he was in partnership with Thomas Carnan, and several works were published under their joint imprints. In 1768, appeared *Description of Tower* ; 1770, Mallett's *Northern Antiquities* ; 1771, new edition of Goldsmith's *England* ; 1773, Paterson's *Travelling Dictionary* ; 1779, *New and accurate Maps of the Counties of England and Wales*. Newbery's connection with Carnan appears to have ended about 1780, after which date he confined himself to the medicine business left him on his father's death. He died July 17, 1818, at the age of 75.

Note : An account of Newbery's life and a list of the books he published can be found in *A Bookseller of the Last Century*. By Charles Welsh. 1885.

Newbery, John. Bookseller and publisher. Born at Waltham St. Lawrence, Berkshire, in 1713, he was a descendant of Ralph Newberie, one of the greatest publishers of the sixteenth century. At about the age of 16 Newbery appears to have engaged himself to a merchant in Reading, probably William Carnan the printer who died in 1737, leaving all his property and business to his brother Charles and John Newbery. Soon after Carnan's death, Newbery married his widow, and established himself in London, first at the Bible and Crown, near Devereux Court, and afterwards at the Bible and Sun, St. Paul's Churchyard. His activity covered every branch of the publishing trade ; he was the first publisher to cater seriously for juvenile readers, and introduced the regular system of a Juvenile Library with *Goody Two Shoes, Giles Gingerbread*, and many other stories. In addition to his very extensive publishing and book-selling business, Newbery appears to have had a large medicine vending business, which at his death was left to his son Francis. His chief geographical publications are *Atlas Minimus*, drawn and engraved by J. Gibson, 1758 ; *New and Accurate Maps of the Counties of England and Wales*, advertised in 1759. A copy of the last-named work dated 1779, printed for T. Carnan and F. Newbery, Jr., is in the Douse Collection, in the Bodleian Library, Oxford. Newbery appears to have been intimately associated with Johnson, Goldsmith, Smart, and several other literary celebrities of his day. He died on Dec. 22, 1767, at the early age of 54, and was buried in the churchyard of his birthplace, Waltham St. Lawrence.

Note : A full account of Newbery's life, and of the books he published can be found in *A Bookseller of the Last Century*. By Charles Welsh. 1885.

Nicholls, Sutton. Draughtsman and engraver, at London Wall near the Weavers' Arms against the Postern, London, flourished from about 1695 to 1740. He engraved several of the maps in Gibson's edition of Camden's *Britannia*, 1695 ; *An Epitome of S^r. William Petty's large Survey of Ireland, by P. Lea*, published in *Hibernia Anglicana . . . by R. Cox*, 1699 ; *A True Survey of the Earl of Donagals Barronie of Enish-Owen*, published by P. Lea about 1700 ; several of the maps in *A new Sett of Maps . . . by E. Wells*, 1701 ; *A New Map of Yorkshire*, 1711 ; *Mapp of* 20 *Miles round Leeds*, 1712, for *Ducatus Leodiensis . . . by R. Thoresby* ; maps of various parts of the World by N. Sanson, reprinted and published by H. Overton between 1706 and 1739 ; and a large number of views published in *Several Prospects of the most noted Publick Buildings, in and about the City of London*, 1725 ; *Nouveau Théâtre de la Grande Bretagne*, and Stow's *Survey of London*.

Nichols, John. A famous printer, antiquary, and author, of Red Lion Passage, Fleet Street, London, was born at Islington, Feb. 2, 1745. In 1757 he was apprenticed to William Bowyer, junr., one of the most famous printers of modern times and, in 1766, was taken into partnership. In 1777 Bowyer died and left the residue of his estate to his partner. In the following year Nichols assisted in the management of the *Gentleman's Magazine* and from 1792 to his death in 1826 had sole control of that publication. He took an active part in civic life and was elected Master of the Stationers'

Company in 1804. Although still active in his literary career, he practically retired from the printing business in 1803. He suffered a serious loss in Feb., 1808, when a fire at the premises in Red Lion Passage destroyed a large portion of his stock of books. Nichols produced an immense amount of literary and topographical work. Included among his books were *Biographical and Literary Anecdotes of William Bowyer, Printer*, 1782, and a supplementary work *Literary Anecdotes of the 18th Century*, nine vols., 1812—1815; *Bibliotheca Topographica Britannica*, eight vols., 1780—1790, together with a supplement, *Miscellaneous Antiquities*, two vols., 1791—1800; and *The History and Antiquities of the County of Leicester*, four vols. in eight, 1795—1815. *Illustrations of the Literary History of the 18th Century*, which he left uncompleted was finished by his son. He died at Highbury, Nov. 26, 1826.

Nichols, John Bowyer. Eldest son of the above, was born in Red Lion Passage, Fleet Street, July 15, 1779. He maintained the great reputation gained by his father as a printer, antiquary, and author. He entered the printing office of his father in Sept., 1796, and had charge of the business from about 1803, when his father had, to a great extent, retired from active participation. He contributed many articles to the *Gentleman's Magazine* and, except for a short period, had sole control of the magazine from 1833 to 1856. Nearly all the large county histories issued during the first half of the nineteenth century were published by him, including those by Baker, Clutterbuck, Hoare, Hunter, Lipscomb, Omerod and Surtees. His literary and topographical work included the completion of *Illustrations of the Literary History of the 18th Century*, started by his father, and *Collectanea Topographica et Genealogica*, in eight vols., 1834–43. He became Master of the Stationers' Company in 1850 and member of many learned Societies. He died at Ealing, Oct. 19, 1863, and was succeeded in the business by his eldest son, John Gough Nichols.

Nicholson, John. Bookseller, 1686—1715, King's (or Queen's) Arms, Little Britain. His first work appears to have been published in 1686. From 1697, he was a prolific publisher of all kinds of works, and held shares in most of the large publications of his period. Amongst his more notable publications are: *A Complete History of Europe*, 1698, and several later editions; Gage's *New Survey of the West Indies*, 1699; *Index Villaris*, 1700; *A Collection of Voyages, undertaken by the Dutch East India Company*, 1703; *The New Description and State of England*, second edition, 1704; *Three Years Travels from Moscow overland to China*, 1706; *New and accurate maps of the several parts of Europe*, 1707; *A New View of London*, 1707; *Fifty-six new and accurate Maps of Great Britain*, 1708; *A new Voyage to the East Indies*, 1708; *The British Empire in America*, 1708; and *A new and accurate Map of Great Britain*, 1708.

Norden, John. Topographer, was born in 1548 and died about 1625. His birthplace is not known, but it is thought that he was a native of Middlesex. He proposed to issue a topographical description of the counties of England and in 1593 a Privy Council order was issued to the Lieutenants of the counties showing that Norden was authorised by Queen Elizabeth to survey and make maps of the counties. The first to be published was *Speculum Britanniæ*, Part I, 1593, containing Middlesex, this being probably the earliest county map showing roads. This was followed by Hertfordshire in 1598. Owing to the lack of financial support Norden appears to have been unable to carry out his somewhat ambitious scheme and no other counties were published during his life-time. He however surveyed, and made maps of, Cornwall, Essex, Northamptonshire, Surrey and Sussex. In 1607 he surveyed Windsor and neighbourhood for which he received £200 from the King. In 1600 Norden held the post of Surveyor of Crown woods and forests and was Surveyor to the Duchy of Cornwall in 1605. The well-known triangular distance tables were invented by Norden and issued in his latest work, *An intended Guyde for English Travellers*, 1625.

Ogilby, John. Was born in or near Edinburgh in Nov., 1600, and, after a most varied career, in which he became a dancing master, theatre owner, bookseller, printer, and author of many classical translations, finally settled down to become one of the most famous of English geographers and cartographers. He twice lost all his money, first in the Irish rebellion of 1641, and later in the great Fire of London when his house and stock-in-trade as a printer and publisher were destroyed. He died on Sept. 4, 1676, and was buried in St. Bride's Church, Fleet Street.

Ogilby made the first survey of the roads of England and Wales, and is probably best known on this account. He published the result of the survey in 1675 under the title : *Britannia, Volume the First : or, an Illustration of the Kingdom of England and Dominion of Wales : By a Geographical and Historical Description of the Principal Roads thereof. Actually Admeasured and Delineated in a Century of Whole-Sheet Copper-Sculps . . . By John Ogilby Esq., etc.*

Sir H. G. Fordham in the work mentioned below, says this " is of particular and historical importance, as it displaced the old British mile of 2,428 yards, and substituted for it the statute mile of 1,760 yards, thus effecting a revolution in customary measurements." There was a second issue in the same year entitled : *Itinirarium Angliae : or, a Book of the Roads, wherein are Contain'd The Principal Road-Ways Of His Majesty's Kingdom of England and Dominion of Wales, etc.*

Ogilby was appointed by the Corporation of London, together with William Morgan, John Oliver and Thomas Mills, to survey the area of the City devastated by the Great Fire, a result being the publication by W. Morgan in 1677 of a large plan of the City on the scale of about twenty-five inches to one mile. Accompanying the plan is a list showing the names, and positions on the plan, of all the Alleys, Courts, Streets and Yards. This list is now extremely rare.

An account of Ogilby's life and work is given in the *Dictionary of National Biography*, vol. 42, and a more complete account of his cartographical and geographical work, especially in relation to his Road Books and Itineraries, is given by Sir George Fordham in *The Library*, Sept., 1925.

Overton, Henry. Bookseller and print-seller, at the White Horse, without Newgate, from about 1706 to 1764. He was the son of John Overton, bookseller, and on his marriage, in 1707, bought his father's stock of maps, prints, and engravings. In 1713 he reprinted Speed's county maps with additions and issued them with the title : *England fully described in a compleat Sett of Maps of ye Countys of England and Wales, etc.* This was re-issued in 1743. Overton's name appears, with those of other publishers, in the imprint of Bowen's *Royal English Atlas*, *c.* 1764.

Owen, George. 1552—1613. County historian, born at Henllys, Pembrokeshire, 1552 ; the place of his education is unknown, and little appears to be known of his life. He was High Sheriff for Pembrokeshire in 1587, and in 1602, and held the office of Vice-Admiral for the counties of Pembroke and Cardigan. His chief literary work was the *Description of Pembroke*, 1603 ; he also furnished the map of Pembrokeshire which appeared in the sixth edition of Camden's *Britannia*, published in 1607. He appears to have left behind a number of short treatises, copies of which are scattered among various libraries. Owen died at the place of his birth on Aug. 26, 1613.

Note : Accounts of Owen's life and works are to be found in the *Dictionary of National Biography*, and in the *Description of Pembrokeshire*, edited by Henry Owen, as No. 1, *Cymmrodorion Record Series*, 1892.

Owen, William. An eminent bookseller and publisher, at the Homer's Head, near Temple Bar, Fleet Street, from about 1750 until his death on Dec. 1, 1793. He was also proprietor of a mineral-water establishment. He was tried at the Guildhall, July 6, 1752, for printing and publishing a libel on the Government, entitled *The Case of Alexander Murray, Esq.*, but was acquitted. *An Authentic Account of all the Fairs in*

England and Wales, issued by Owen in 1756, was re-issued in 1783 as *Owen's New Book of Fairs* and passed through several editions down to 1859. He also published the *General Magazine of Arts and Sciences* between 1755 and 1765 and became Master of the Stationers' Company in 1781.

Palmer, Richard. An engraver and stationer of Fulwood's Rents, Holborn, worked for Richard Blome and John Seller, from about 1670 to 1700. His maps of Cambridgeshire, Devon, Durham, Hants, Hereford, Lancashire and Wiltshire, engraved for R. Blome, were published in *England exactly described, or a Guide to Travellers*, 1671. The same maps also appeared in Speed's *Maps Epitomiz'd*, 1681. In conjunction with John Seller and John Oliver, Palmer engraved maps of *Kent*, *Hertford*, *Middlesex* and *Surrey*. With the exception of *Kent*, these appear in the British Museum copy of Seller's *A Collection of the County Mapps of the Kingdome of England*, [1680]. Palmer also engraved maps of *France*, *Greece* and *Hungary*.

Palmer, William. An engraver of Islington, London, assisted J. Ellis in engraving the maps for the latter's *English Atlas*, first published in 1766, and for Bernard Scalé's *Hibernian Atlas*, published in 1776. He also engraved maps for Pennant's *Arctic Zoology*, 1784, and Payne's *Universal Geography*, 1791 ; the title-page and some of the maps for Wilkinson's *Atlas Classica*, 1797, 1798 ; map of *Twenty-Five miles round London*, 1787, a new *Map of the World*, 1789, and a chart of the *Mouths of the Hoogly River*, 1794.

Pask, Joseph. Stationer at the Three Ink-bottles in Castle-Alley under the west end of the Royal Exchange. His name appears on the imprint of a small atlas, *A Pocket Book of all the Counties of England and Wales*, [1680]. Beyond this nothing appears to be known of him.

Payne, Thomas. One of the leading booksellers and publishers of his time, was born at Brackley, Northamptonshire, May 26, 1719. He began his career as assistant to his brother, Olive Payne, in Round Court in the Strand and afterwards succeeded to the business. On his marriage to Elizabeth Taylor, about 1745, he moved to Castle Street, Mew's Gate, St. Martin's Lane, and took over the business of his brother-in-law. From about 1770 until his retirement in 1790 he had the assistance of his eldest son, who afterwards succeeded him. He died on Feb. 2, 1799, and was buried at Finchley.

Thomas Payne was one of the first booksellers to issue regular catalogues of his stock. *A Catalogue of curious Books in Divinity, History, Classicks, etc.*, dated Feb. 29, 1740, was the first issue and from 1755 until his retirement an almost regular annual issue took place. He became the friend of nearly all the famous literary people of the time.

Payne, Thomas, the younger. Was born Oct. 10, 1752, and after assisting his father for a number of years, succeeded to the business in 1790. In 1806 he moved from Mew's Gate to larger premises in Pall Mall and maintained the high reputation built up by his father. He became Master of the Stationers' Company in 1817 and retired from business in 1825, being succeeded by his nephew, John Payne. He died March 15, 1831, and was buried in St. Martin's-in-the-Fields.

Petty, Sir William. Born at Romsey in Hampshire, May 26, 1623. From early days he was interested in mathematical and scientific studies and, on leaving the Jesuit College, Caen, at the age of 20, he had obtained, " the Latin, Greek, and French tongues ; the whole body of common arithmetic, the practical geometry and astronomy ; conducing to navigation, dialling, &c. ; with the knowledge of several mathematical trades." He spent a short time in the Navy and then continued his studies at Utrecht, Amsterdam, and Leyden, where he took up medicine. He returned to England in 1646,

studied medicine at Oxford, became a Doctor of Physic in 1649, and Professor of Anatomy in 1651. In 1652 Petty was appointed Physician-General to the army in Ireland and, because of his mathematical knowledge, was instructed, by the Commonwealth Government, to survey the country and measure and map out the estates of Irish landowners. Petty was, nominally, under the Surveyor-General, Benjamin Worsley, and his survey, known as the *Down Survey*, superseded one made by his chief. Partly, as a result of this, many difficulties and dissensions arose between the two, but, although Petty was generally successful in gaining the support of the Government, he never superseded Worsley in the position of Surveyor-General. Most of the original maps by Petty are now in the possession of the Lansdowne family; others are in the Public Record Office and the Quit Rent Office, Dublin, while a few are missing. A set copied from these originals is in the Bibliothèque Nationale, Paris. In 1683 he published a set of maps with the title, *Hiberniæ delineatio quoad hactenus licuit perfectissima, studio Guilielmi Petty*. Petty was afterwards appointed to superintend the redistribution of the estates in Ireland and himself received some lands near Limerick. At the fall of the Commonwealth Party, Petty acquiesced in the restoration of Charles II.

He was one of the founders of the Royal Society and was knighted at the incorporation of the Society in 1662. He contributed many scientific papers to the *Philosophical Transactions* and wrote many books and articles on political economy. Petty's *History of the Down Survey* was issued by the Irish Archæological Society in 1851 and the present Earl of Kerry read a paper at the Royal Irish Academy in 1920 on the *Lansdowne Maps of the Down Survey*. A biography of Sir William Petty was published in 1895, by Lord Edmond Fitzmaurice. Petty died Dec. 16, 1687, in London, and was buried in Romsey Abbey.

Phelps, Joseph. Stationer and bookseller in London, at 27, Paternoster Row, from 1809 to 1823; 37, Paternoster Row, from 1824 to 1833; 44, Paternoster Row, from 1834 to 1839. After 1839 the firm appears as Joseph Phelps and Son. He published a set of county maps of England in 1820, originally issued by Langley and Belch.

Philip, George. The founder of the firm of George Philip & Son, map and geographical publishers, was born in 1799 at Huntly in Aberdeenshire. He commenced business as a bookseller in Liverpool in 1834, and in 1848 was joined by his son George Philip, Jnr., and from that date the operations of the house rapidly extended and developed as publishers of works of geographical, travel and educational nature.

In 1856 the firm found it necessary to open a London house, and purchased the lease of 32 Fleet Street where the grandfather of the present Mr. John Murray commenced business.

They published here in 1858 the *Tourist's Companion to the Counties of Scotland and Pocket Atlas for The Angler, Sportsman, and Traveller*.

Pont, Timothy. Minister of the Church of Scotland. The date of Pont's birth was, probably, about 1560. The first topographical survey of Scotland was made by him. He traversed the country methodically making drawings (or sketches) of the different valleys on separate sheets of paper, and then drafting these into district maps as well as he could. After all his labour he was unable to find a publisher to issue the maps. When the MS. had remained in the Scottish Court of Chancery for about twenty years it was (according to Mr. Harry Inglis in his *Early Maps of Scotland and their Authors*) rescued by Robert Gordon of Stralock, a geographer of some skill who redrew the maps in a form that made them ready for use. Gordon also made new maps of a small part of the country that Pont did not include in his survey.

Sir John Scott of Scotstarvet undertook to edit these maps for John Blaeu, who was looking for material for volume V of his great atlas. The manuscript maps were completed by the beginning of 1648 and, after considerable correspondence with Blaeu,

Scott went to Amsterdam to superintend the literary part of the work. The maps were issued, together with text taken from Camden's *Britannia*, as volume V of Blaeu's atlas, in 1654. Pont's original manuscripts are now preserved in the Scottish National Library, Edinburgh.

A full account of Pont's work by Mr. C. G. Cash is given in the *Scottish Geographical Magazine*, vol. XVIII. 1901.

Prockter, J. An engraver, flourished in the second half of the eighteenth century. He engraved the maps for *The History of Inland Navigation*, 1766; *A new Globe of the Earth, by N. Lane*, 1776; some of the plates in Armstrong's *An actual Survey of the great post-roads between London and Edinburgh* and in Taylor and Skinner's *Survey . . . of the Roads of North Britain*, both published in 1776.

Pyle, Stephen. Engraver, flourished about 1770–80, in Angel Court, Snow Hill, London. His principal works appear to be Armstrong's maps of *Ayrshire* and *Peebles*, published in 1775; a number of plates in Taylor and Skinner's *Roads of Scotland*, 1776; several plates in Armstrong's *Survey of the Great Post Roads between London and Edinburgh*, also *London and Dover*, both issued in 1777; Leicestershire, in *The Description of Leicestershire*, by William Burton, 1777; *A Map of the Great Level of the Fens*, 1779; Armstrong's *Lincolnshire*, 1779, and a number of miscellaneous engravings for various works.

Rea, Roger, the elder and younger. Booksellers *c.* 1650, at (1) Golden Cross, Cornhill; (2) Gilded Cross, Westminster Street [near Gresham College]. Published Speed's *Theatre of the Empire of Great Britaine*, 1650, and *Prospect of the most famous parts of the World*, 1662.

Reynolds, Nicholas. Engraver. Engraved the map of *Hertfordshire* in Saxton's *Atlas of England*, 1579, which he signed: "Nicholaus Reynoldus Londinensis sculpsit." Nothing more appears to be known of him.

Rivington, Charles. Founder of the oldest London publishing house still in existence, was born at Chesterfield in 1688 and served his apprenticeship in London with a theological bookseller named Matthews. He succeeded to the business of Richard Chiswell, at the Rose and Crown, on the south side of St. Paul's Church Yard, on the latter's death in 1711. In 1714 he removed to No. 62, on the north side, and adopted the sign of the Bible and Crown. His chief publications consisted of theological works. He died Feb. 25, 1742, and was succeeded by two sons, John and James.

Robertson, George. Author of works on agriculture and topography, was born in Midlothian about 1750. According to his own account in *Rural Recollections* he moved to Kincardineshire in 1800 and to Ayrshire in June, 1811. He compiled the following works: *General View of the Agriculture of . . . Midlothian*, 1793; *General View of the Agriculture of . . . Kincardineshire*, 1813; *Topographical Description of Ayrshire*, 1820; *Rural Recollections*, 1829; and a continuation to Crawford's *The History of the Shire of Renfrew*, 1818. He also wrote on Genealogy and articles for the Highland Society and Young's *Annals of Agriculture*. He died near Irvine, in Ayrshire, in 1832.

Robins, James. Bookseller, publisher, and author, at the Albion Press, 11 Ivy Lane, Paternoster Row, London, from about 1818 to 1836. He published *The New British Traveller* by James Dugdale, in four volumes, [1819], and *Robins's Atlas of England and Wales*, 1819. A list of new works published by J. Robins and Co. appears at the end of the fourth volume of Dugdale's work. He also compiled, under the assumed name of Robert Scott, *The Cabinet of Portraits*, in nine parts, [1823–27], and *The History of England during the reign of George III*, four volumes, 1824. He died at Lewisham, Nov. 5, 1836.

Rocque, John. A famous land-surveyor, engraver, and publisher, was a native of France, but settled in England and, during a period of over twenty-five years from about 1734 to 1762 produced a large number of maps and plans. He was appointed topographer to the Prince of Wales and continued in the appointment on the latter's succession to the throne. His addresses are given as follows : in 1734, ' at y^e^ Canister and Sugar Loaf in Great Windmill Street, St. James', London ' ; from 1743 to 1748, ' next y^e^ Duke of Grafton's Head, near Hide Park Corner ' ; 1749 to 1750, ' next the Rummer, Charing Cross ' ; and afterwards ' near Old Round Court in the Strand.' While at work on his Irish maps Rocque also had a house in Dublin. His most famous work was probably the large *Survey of London*, engraved by Pine, which was begun in 1737 and published in 1746, in twenty-four sheets, and is considered a most accurate piece of work. A further map of *London and the Country near ten miles round*, in sixteen sheets, was also published in 1746. Other important surveys made by Rocque include, *City and Suburbs of Bristol*, 1750 ; *County of Salop*, 1752 ; *Middlesex*, 1754 ; *City of Dublin*, 1756 ; *County of Dublin*, [1760] ; *County of Armagh*, 1760 ; *Berkshire*, 1761. *A Topographical Map of the County of Surrey*, surveyed by Rocque, was completed by Peter Andrews and published by Rocque's widow, Mary Anne Rocque, about 1765.

Rollos, G. Engraver, map-seller and geographer during the middle years of the eighteenth century. On a map of *Great Britain, France and Ireland*, dated 1766, his address is given as at the Golden Head in Old Belten Street, Long Acre, ' where all Sorts of Prints, Paintings and Drawings are bought, sold or exchanged.' He engraved a number of maps to accompany Rider's *A New History of England*, 1761–64 ; eleven maps in *The Royal Magazine*, between the years 1759 and 1764 ; and a few in *England Displayed*, 1769 ; and Carver's *The New Universal Traveller*, 1779.

Roper, John. A map engraver in the early part of the nineteenth century. He engraved five maps dated from 1801 to 1803, for Wilkinson's *Atlas Classica*, and the maps and town plans for *The British Atlas*, published in 1810. These were variously dated 1804 to 1810 and drawn to accompany Brayley and Britton's *Beauties of England and Wales*.

Rowe, Robert. Engraver, geographer, and map publisher, was born about 1775. He was in business at 5, Gough Street, Fleet Street, London, from 1803 to 1808 ; 11, Crane Court, Fleet Street, 1809 ; and 19, Bedford Street, Bedford Row, Holborn, from 1811 to 1836. He produced and published a large number of maps, including, *A new Map of Europe*, 1803 ; *Rowe's Plan of London, Westminster, etc.*, 1804 ; *Rowe's Map of the Country Twenty-one Miles round London*, 1806 and 1807 ; *The Island of Walcheren*, 1809 ; *A new Map of . . . Great Britain and Ireland*, 1809 ; and *The English Atlas*, 1816. He died in John Street, Bedford Row, March 16, 1843, aged 68 years.

Ryther, Augustine. Engraver, flourished 1576—1590. A native of Leeds, Yorkshire. One of the earliest English engravers on copper. He engraved the following maps for Saxton's atlas of 1579 : Durham and Westmoreland (1576), Gloucester and York (1577), and that of the whole of England, 1579. In 1588 he appears to have been working on the large nine-sheet map of Oxford, drawn ten years earlier by Ralph Agas, and now preserved, in a damaged condition in the Bodleian Library. In the same year he engraved three charts : Biscay, Andalusia and Galicia for Ashley's English translation of Wagenaer's *Mariner's Mirrour* ; also eleven double folio plates illustrating the defeat of the Spanish Armada from drawings by Robert Adams, published in 1589 with the title : *Expeditionis Hispanorum in Angliam vera descriptio.* In 1590 he engraved a pair of celestial hemispheres by Thomas Hood. These are now extremely rare. The copy in the British Museum may possibly be unique. Two years later (1592) Ryther appears to have been employed engraving a large plan of the University and town of Cambridge, drawn by John Hammond, now in the Bodleian Library. Apparently Ryther died soon after the completion of the above plan.

Saxton, Christopher. Surveyor and topographical draughtsman, born *circa* 1542. Accounts vary regarding the birthplace of Saxton, one of the greatest of early English cartographers. According to the *Dictionary of National Biography* he was born of an old Yorkshire family at Tinglow (Tingley), near Leeds, and educated at Cambridge, presumably at the University although the name of the college is not recorded. He afterwards came to London and was attached to the household of Thomas Seckford at whose instigation and expense, and with the authority of Queen Elizabeth, he surveyed and drew maps of every county in England and Wales.

Samuel Lewis, in his *Topographical Dictionary of England*, 1831, under the heading Woodbridge, Suffolk, says: "Christopher Saxton, the publisher of the first county maps, was a native of this place and a servant to Thomas Seckford, Esq., a great benefactor to the town, who resided in a mansion house at Great Bealings, about a mile and a half distant. They were published under his patronage, in 1579, and dedicated to Queen Elizabeth."

John Gorton, in his *Topographical Dictionary*, 1833, under the heading Woodbridge, Suffolk, appears to have copied Lewis, as he states—"This place gave birth to Christopher Saxton publisher of the first county maps in 1579, dedicated to Queen Elizabeth."

It will be seen by the foregoing statements that there is some uncertainty as to both the birthplace of Saxton and the position which he occupied in the employ of Thomas Seckford. Probably the statement in the *Dictionary of National Biography* is the more correct, as, in view of Saxton's proficiency as a cartographer, one can hardly imagine that he was employed, as suggested by Lewis, in the capacity of an ordinary servant. It is more easily supposed that, having been born of "an old Yorkshire family," probably of some note, Saxton would have been sent to Cambridge to finish his education and may have there become acquainted with Seckford. Moreover, that account is supported by the fact of Saxton having returned, in later life, to the neighbourhood of Leeds. He must have begun the survey of the English counties sometime about 1572 as the maps are dated from 1574 to 1579. As seen in the list of maps, those of the English counties were engraved by various well-known engravers, and it is thought that Saxton himself engraved those of the Welsh counties.

Thomas Seckford obtained from the Privy Council special facilities for Saxton: "To be assisted in all places where he shall come for the view of such places to describe certain counties in carte, being thereunto appointed by Her Majestie's bill under her signet." In 1576 special injunctions were sent to all Justices of Peace, Mayors and others in Wales: "to see him conducted unto any towre, castle, high place or hill, to view that country, and that he may be accompanied with ij or iij honest men, such as do best know the country, for the better accomplishment of that service and that at his departure from any town or place that he hath taken the view of, the said towne do set forth a horseman that can speak both Welsh and English to safe-conduct him to the market-towne."

Saxton made a fine map of England bearing the scale: "Scala Miliarium (Magna) 50" [$=8\frac{3}{4}$ inches]. It was issued in twenty sheets and in its completed state measured 67 × 54 inches. This map is extremely rare and no perfect copy is known by the writer to be extant. There is, however, in the British Museum an impression with the title blotted out. It was re-issued in 1687 by Philip Lea as *The Travellers Guide being the best Mapp of the Kingdom of England & Principality of Wales.* Saxton surveyed the town of Manchester in 1576.

The following documents in the Public Record Office, London, prove that Saxton was alive in 1606.

The Duchy of Lancaster Depositions (Bundle 44, No. 47) contains "A plat of the course of Ludingdē broke wth the milne gaites taken furth of the same from Luddingden Chappell to Luddingden foote, wherein the confines of Midgeley is colored with yelowe, and the confines of Wareley is colored wth red, made by Christofer Saxton, Anno Dñi 1599. This scale containeth 64 perches" [$=3\frac{15}{16}$ inches]. In bundle 51, No. 59 is:

" A perfect plat of the millnes and water courses in question betwixte John Towneley, Esquire and John Parker, Gentleman and others Defendantes, made by Christofer Saxton, the 23 of Aprill. An°. Dm^i. 1606. This Scale Conteyneth one furlong. 40 perches " [=2½ inches]. Accompanying this map is a deposition wherein Saxton describes himself as Christopher Saxton of Dunningley, in the county of York, gent., aged sixty-four or thereabouts, and states that he had seen the water of Swinden running between complainant's mill and the new mill called Mr. Parker's mill, and had measured the same.

Sayer, Robert. Publisher, map and print-seller, from 1751—1794. Succeeded Philip Overton at the Golden Buck, opposite Fetter Lane, Fleet Street, afterwards No. 53, Fleet Street. One of the leading publishers of his day, his publications of maps and charts were very numerous, among them being : *A General View of the City of London*, 1751 ; *A View of the Monument*, 1752 ; *The Small British Atlas*, 1753 ; three editions of the *Large English Atlas*, [1760], [1763], and 1767 ; *The Royal English Atlas*, [1764] ; and three editions of *Ellis's English Atlas*, 1766, 1768, and 1773 ; *A General Atlas, or, description at large of the whole Universe* . . . By T. Kitchin and others, 1773 ; and *An Atlas of the Mundane System* in 1774.

John Bennett entered into partnership with Sayer in 1775, and together they published in that year several of Jefferys' later works, *The American Atlas* ; *The North American Pilot* ; *The West Indian Atlas* ; and the large map of Yorkshire. Bennett remained in partnership until 1784 ; from that date to 1794 Sayer continued to publish various maps and charts, and was finally succeeded by Laurie and Whittle.

Scalé, Bernard. Land-surveyor, topographer, and valuer of estates, in Lower Abbey Street, Dublin, from about 1760 to 1787. In conjunction with William Richards, he produced plans of the *City and suburbs of Waterford* and the *City and environs of Waterford*, both dated 1764, a chart of the *Bay of Dublin* in 1765, and a plan of the *Lying-in Hospital and New Gardens, Dublin*, 1764. His other works include *Tables for the Easy Valuing of Estates*, 1771 ; *An Hibernian Atlas*, 1776 ; an edition of Rocque's plan of *Dublin*, with additions and improvements, 1787 ; and various plans of buildings in Dublin.

Scatter, Francis. Engraver. Engraved two maps in Saxton's atlas of England, 1579 : " Chestershire " and Staffordshire, signed " Franciscus Scatterus sculpsit." Nothing more appears to be known of him.

Scott, Robert. A famous Scottish engraver, was born at Lanark, Nov. 13, 1777. He served his apprenticeship with Alexander Robertson, himself a pupil of the famous Andrew Bell, and also studied at the Trustees Academy, Edinburgh. Scott carried on business at Parliament Stairs, Edinburgh, 10 Parliament Square, and later at 65 Princes Street. His output of work was very great and included portraits, landscapes, topographical views and maps. His early work comprised illustrations for *The Bee*, 1793 and 1794 ; the *Scot's Magazine ;* and a set of views, *Seats and Scenery in Edinburgh and its vicinity*, 1795, 1796. He also engraved the illustrations for Barry's *History of the Orkney Islands*, 1805, and twenty views entitled *Scenery of Edinburgh and Midlothian*, 1838. Maps and plans engraved by Scott included Lanarkshire for *General View of the Agriculture of* . . . *Clydesdale*, 1798 ; Berwick for Fuller's *History of Berwick-on-Tweed*, 1799 ; Glasgow for *The Glasgow Directory*, 1801 ; Environs of Berwick for *A Directory* . . . *of Berwick-upon-Tweed*, [1806] ; Glasgow, by Peter Fleming, in six sheets, 1807, re-issued in 1821 ; The Stranger's Guide, being a plan of Edinburgh, 1809, re-issued in Arnot's *History*, 1816 ; Ross and Cromarty for *General View of the Agriculture of* . . . *Ross and Cromarty*, 1813 ; Glasgow, by David Smith, 1828 ; and the same city by David Smith and James Collie, 1839.

Two sons, David and William Bell, both became distinguished painters ; the latter also assisted in the business towards the end of his father's life, which occurred in Jan., 1841.

Seale, Richard William. Map engraver, flourished in London, from about 1732 to 1775. His earliest production seems to have been a map of Dorsetshire, which he engraved to accompany *A Survey of Dorsetshire*, published by J. Wilcox in 1732. Both the book and the maps were considered by Gough to be most inaccurate.

Seale assisted W. H. Toms to engrave Popple's *Map of the British Empire in America*, published in 1733, and the maps in *Geographia Antiqua*, first published in 1742. He engraved plans of Aldgate and Aldersgate Wards, 1739 ; maps for Tindal's *Continuation of Rapin's History of England*, 1744—1747 ; plans for Stow's *Survey of the Cities of London and Westminster*, 1754, 1755 ; maps of the rivers Calder, Wear and Wey ; a large map of England and Ireland, in nine sheets, *c.* 1770 ; maps for the *London* and *Universal Magazines*, and many others.

Seckford, Thomas. Although neither a publisher nor an engraver, Seckford is deserving of a place in these bibliographical notes by reason of his services to English topography and cartography. He was the second son of Thomas Seckford, of Seckford Hall, near Woodbridge, Suffolk, and was born about 1515. He is believed to have been educated at Cambridge, became a student at Gray's Inn in 1540 and, later, a distinguished lawyer. He was appointed to serve on various commissions and became one of the Masters of the Court of Requests and Surveyor of the Court of Wards and Liveries. In 1572 he entered Parliament as member for Ipswich. On the death of his father in 1575 he succeeded to the family estates. His interest in the topography of his country was evidenced by the assistance he rendered to William Harrison, author of *The Description of England*, and to Christopher Saxton. He supplied a description of the rivers and streams of Britain for Harrison's work and the author acknowledged the help received by dedicating to Thomas Seckford, *The Description of Scotland*. Both of these works were published in Holinshed's *Chronicles*.

Christopher Saxton, a topographical draughtsman, was attached to the household of Thomas Seckford and, at the latter's instigation and expense, undertook the survey of the counties of England and Wales. This survey culminated in the production of the first atlas of the English counties. Seckford obtained from the Privy Council special facilities for Saxton " to be assisted in all places where he shall come for the view of such places to describe certain counties in cartes being thereunto appointed by her Majesties bill under her signet."

Seckford built a Sessions House and founded and endowed almshouses at Woodbridge. After his death, which occurred on Jan. 15, 1587–8, the family estate in Clerkenwell was given for the support and upkeep of the almshouses.

Seller, John. Hydrographer to Charles II, James II, and Queen Anne, compiled and published a large number of maps, charts, and geographical works. He also made and sold mathematical instruments. Very little of his work as a hydrographer was original ; his maritime atlases were mainly compiled from Dutch charts with the original titles imperfectly erased and the English titles with Seller's name substituted. He lived for many years at the sign of the Mariner's Compass, at the Hermitage Stairs, Wapping, and also sold his publications from the following addresses in the City : (1) Exchange Alley in Cornhill ; (2) Pope's Head Alley in Cornhill ; (3) at the West Side of the Royal Exchange. On March 16, 1671, Seller was granted by the King, privilege for the protection of his atlases and charts for thirty years. In the preface of Camden's *Britannia Abridg'd*, 1701, it says " The plates are taken from the plates of the late Ingenious Mr. Seller . . . King Charles and King James II chose him to Survey the several Counties, being perfectly assured of his Fitness for such a province, and his Integrity to perform it : after which Survey these Plates were done

by him with the greatest Care and Exactness." The following were the chief works compiled or published by him: *Practical Navigation*, 1669; *A Description of the Sands, Shoals . . . on the Coasts of England*, 1671; *The Description and Use of the Quadrant*, 1671; *The English Pilot*, 1671; *The Coasting Pilot*, 1672; *Grammatical Cards*, 1676; *Atlas Minimus*, 1679; *Planisphœrium Cœleste*, 1679; *Atlas Cœlestis*, 1680; *Atlas Terrestris*, 1680; *A New System of Geography*, 1685; *The Sea-Gunner*, 1691; *Anglia Contracta*, 1695; *The History of England*, 1697. With regard to *The English Pilot*, it was thought by bibliographers that Book III was issued for the first time by John Thornton in 1703. In 1921, however, the British Museum acquired a copy of the 1671 edition of the *Pilot* with Book III, dated 1675, included.

The reference, quoted above, from Camden's *Britannia Abridg'd*, indicates that Seller died before 1701.

Senex, John. Cartographer, engraver and publisher, next door to the Fleece Tavern in Cornhill, *c.* 1700, and later at The Globe in Salisbury Court, Fleet Street. He was admitted a fellow of the Royal Society July 4, 1728. Senex appears to have commenced business as a bookseller, but later devoted himself to engraving and map making. He engraved maps of *France* and *Italy* in 1708; the *Seven United Provinces* in 1709; *Germany* and *North America* in 1710; these were probably published separately as each one was ready. They were issued collectively in 1714, under the joint names of Senex and Maxwell, as *The English Atlas*. In 1712 a map of the River Amazon by Samuel Fritz was engraved by Senex for *A Voyage to the South Sea . . . By Captain Edward Cooke*. In 1719 appeared: *An Actual Survey of all the Principal Roads of England and Wales . . . first perform'd and published by John Ogilby, Esq.; and now improved . . . by John Senex*. In 1721 he issued a *New General Atlas of the World*. Senex died on Dec. 30, 1740.

His widow, Mary Senex, carried on the business and issued "A Catalogue of Globes Maps, &c., made by the late John Senex, F.R.S., and continues to be sold, etc."

Simons, Matthew. Bookseller and printer in London. (1) At the Golden Lion, in Ducke Lane; (2) Goldsmith's Alley, and (3) Next door to the Golden Lion, Aldersgate Street. He issued *A Direction for the English Traviller*, 1635, and printed a large number of John Milton's writings. A news-sheet entitled *A Briefe Relation of some affairs and transactions, Civill and Military* begun Oct. 1, 1649, was published by him. Simons died May 19, 1654.

Skinner, Andrew. A surveyor, worked in partnership with George Taylor. Together they produced a number of road maps, chiefly of Scotland and Ireland, between the years 1775 and 1777. They afterwards served, in their capacity as surveyors, with the army in America.

Smith, Charles. Stationer, map-and globe-seller, at 172, Strand, London, from about 1800. Between 1827 and 1852 the business was carried on by Charles Smith and Son, and from 1853, by William Smith. A large number of well engraved maps and several fine atlases were published, including, *Actual Survey of the Roads from London to Brighthelmstone*, 1800; *New English Atlas*, of which several editions were issued from 1804 to about 1846; *New Map of the United Kingdom of Great Britain and Ireland*, in six sheets, 1806–11; *New General Atlas*, 1808 and 1826; *Classical Atlas*, 1809; *New Map of the Navigable Canals and Rivers of England and Wales*, 1818; *New and Accurate Map of the Lakes of Cumberland*, etc., 1814 and 1821; *New Pocket Companion of the Roads of England and Wales*, 1826, and a fine plan of the city of *Bristol*, 1829.

Smith, Joseph. A printer and publisher during the early part of the eighteenth century. His address is given in several forms, of which the following are specimens: (*a*) at y^{e} Picture Shop in Exeter Exchange in the Strand; (*b*) at the Sign of Exeter Change,

near the Fountain Tavern in the Strand ; (*c*) at the West End of Exeter Exchange ; (*d*) at the Sign of Inigo Jones's Head, near Exeter Exchange. His publications included prints, maps, globes, and books on architecture. The most important were, *Nouveau Théâtre de la Grande Bretagne*, in four or five volumes, a splendid collection of topographical views, by various engravers, including a view of Ludlow Town and Castle by Smith himself, published between the years 1724 and 1729 ; *Westmonasterium : or the History and Antiquities . . . of St. Peter's, Westminster*, [1723], *The History and Antiquities of the Cathedral Church of Canterbury*, 1726, both by J. Dart ; and *Atlas Anglois*, 1724. According to a list in the *Nouveau Théâtre*, Smith also published *Britannia Illustrata ; Vitruvius Britannicus* ; Dugdale's *Monasticon Anglicanum* ; and *Theatrum Scotiæ*.

Snodham, Thomas. Printer in London, 1603–25, at St. Botolph's without Aldersgate. Apprenticed to Thomas East, printer of London, Snodham appears to have taken the name of East for trade purposes. In 1609, East's widow transferred the copyrights of her husband's general works to Thomas Snodham, during the next year or two, he also obtained most of East's musical copyrights with Matthew Lownes and John Browne. Snodham's name appears as printer in Books II, III and IV, of the English edition of Speed's *Theatre of the Empire of Great Britaine*, 1614–16, and the Latin edition of 1616. He died in the autumn of 1625.

Speed, John. Historian and cartographer, is said by Fuller to have been born at Farndon, Cheshire, in 1552. His father, who was a tailor, was admitted to the freedom of the Merchant Taylors Company April 5, 1556, and he himself, having followed his father's profession, was also admitted to that company in 1580. Speed married, in 1582, and resided, probably, in Moor Fields where he leased premises from the Merchant Taylors Company. He took a keen interest in the antiquities of his country, and Sir Fulke Greville discovering this made him an allowance in order that he might be free to devote his whole attention to study. Speed used his freedom in historical research and cartography. His maps of the English and Welsh counties were compiled chiefly from the surveys of John Norden and Christopher Saxton. They were beautifully engraved by the famous Dutch engraver Jodocus Hondius who later became a member of Mercator's establishment at Amsterdam and assisted in the preparation of the Mercator-Hondius atlas of the World. Speed's maps were the first to show the counties divided into hundreds. His *Theatre of the Empire of Great Britain* was issued as the chorographical part of the *History of Great Britain*, being Books I to IV of that work.

Speed's atlas, like that of Saxton, is becoming very rare owing to the fact that booksellers ruthlessly break up the books in order to sell the maps separately and thus obtain a higher price for the work.

Spofforth, Robert. Engraver in the early part of the eighteenth century. His address is given as near the Broad Place, Black Friars, [London]. He engraved three maps in *The New Description and State of England*, 1701 ; nine maps in *A New Sett of Maps . . . by* E. Wells, 1701 ; and several portraits, including Queen Anne and her Consort, George, Prince of Denmark.

Sprint, John. Bookseller, from about 1698—1727 at the Bell, Little Britain. Son of Samuel Sprint. He entered into partnership with his father in 1698, and together they published *Index Villaris*, 1700 ; and *The New Description of England and Wales*, 1704. After the death of his father John published *Fifty Six New and Acurate Maps of Great Britain, Ireland and Wales*, 1708. He took into partnership his brother Benjamin in 1709, but they do not appear to have published anything of topographical interest. John Sprint appears as a subscriber of three guineas to the Bowyer fund in 1713.

Sprint, Samuel. Bookseller, 1670—1707 : (1) At the Golden Ball, Duck Lane ; (2) Bell, Little Britain ; (3) Blue Bell, Little Britain. Appears to have started business at the Golden Ball, Duck Lane, in partnership with George Calvert in 1670. In 1672 he severed his partnership with Calvert and set up for himself at the Bell in Little Britain publishing chiefly works on divinity and history. His son John entered into partnership in 1698, their chief cartographical or topographical works appeared to be *Index Villaris*, published in 1700, and *The New Description and State of England*, 1704. In 1700–1, Sprint served as Under Warden, in 1704–5 as Upper Warden, of the Stationers' Company. He died in 1707 leaving half his books and copyrights to his son Benjamin.

Starling, Thomas. Engraver and publisher at : (1) 13 Norfolk Street, Lower Street, Islington, from about 1819 ; (2) 7 Clarke's Place, Islington, 1822 ; (3) successively 13, 19, and 1, Wilmington Square, Clerkenwell, 1826—1837. He engraved a plan of *Colchester* for *Excursions in the County of Essex*, 1819 ; *Norwich* for *Excursions in the County of Norfolk*, 1819 ; a map of the *Rape of Chichester*, 1819, for *A History of the Western Division . . . of Sussex . . . by J. Dallaway* ; maps for the *Family Cabinet Atlas*, 1830 ; a *Plan of the Parish of St. John, Hackney*, 1831 ; and some of the maps in *Lewis's Topographical Dictionary*, 1831.

Stockdale, John. Bookseller and publisher, was born in Cumberland about 1749. In his early days he found employment first as a blacksmith and afterwards as a valet. He was introduced to the book-selling business as a porter to John Almon, a famous bookseller in Piccadilly and, on the latter's temporary retirement in 1781, Stockdale started his career as a bookseller and publisher, with premises in Piccadilly. In 1787 he published the works of Dr. Johnson, two volumes of which he edited, and from 1784 to 1790, the *Debates in Parliament*. In 1788 he was prosecuted for libellous conduct against the House of Commons in publishing Logan's *Review of the Charges against Warren Hastings*, but was acquitted. Some years later he was involved in another libel action brought against him by Joseph Nightingale. In this case Stockdale had to pay £200 damages. The following topographical and cartographical works were included in his publications : Phillip's *Voyage . . . to Botany Bay*, 1789 ; Andrews' *Plans of the principal cities in the World*, [1792] ; *The American Geography*, 1794 ; Aikin's *Country round Manchester*, 1795 ; Weld's *Travels through the States of North America*, 1799 ; Chauchard's *A General Map of the Empire of Germany* with *A Geographical Description*, 1800 ; Edwards' *The History . . . of the British Colonies in the West Indies*, three volumes, 1793—1801 ; *New British Atlas*, 1805 ; the second edition of Camden's *Britannia*, translated by R. Gough, 1806 ; *Map of Scotland*, in twelve sheets, 1806, and *Map of England and Wales*, in twenty sheets, 1809, both engraved by Neele. Stockdale died June 21, 1814, aged 65 years.

Sturt, John. Engraver at Golden Lion Court in Aldersgate Street. Born in London, April 6, 1658. He appears to have been an apprentice of Robert White, and became famous as an engraver of writing, engraving all the important works of John Ayres the celebrated writing master. From about 1697, Sturt kept a drawing school in St. Paul's Churchyard in partnership with Bernard Lens, mezzotint engraver and drawing master.

Sturt's chief cartographical or topographical works include : *Londonderry Beseiged by General Hamilton, etc.*, 1689 ; *A Prospect of Chelsea Hospital*, 1690 ; *Ground Plot of the Royal Hospital, Chelsea*, 1690 ; *A Ground Plot of y^e^ Strong Fort of Charlemont in Ireland*, 1690 ; *A Ground Plot of Londonderry* ; Maps of *Britannia Saxonica* and *Norfolk* in Gibson's edition of *Camden's Britannia*, 1695 ; *A Prospect of Eddy-Stone Light House*, [1696] ; *A South East Prospect of the Charity School etc. Erected by . . . John Cass Esq^r^. Alderman of the Ward of Portsoken, etc* ; *All Souls Church, Oxford* ; *A South View of Sherborne Church* ; *S.E. View of All Saint's Church Wakefield.*

Sturt appears to have specialized in frontispieces for books, and biblical illustrations ; his most important production of this nature being the *Book of Common Prayer*, engraved on 188 silver plates. Other works include Samuel Wesley's *History of the Old and New Testament*, 1704 ; Two hundred plates for Chambers' translation of Sebastian Le Clerc's *Treatise of Architecture*, 1724 ; Bunyan's *Pilgrim's Progress*, 1728

Sturt died in poor circumstances in London in August, 1730.

Sudbury, John. Bookseller, 1610–15 : (1) The White Horse, Pope's Head Alley, 1611 ; (2) Pope's Head Palace, 1615. He, together with George Humble, published John Speed's *Theatre of the Empire of Great Britaine*, 1611–12, and 1614–16.

Sudlow, E. Engraver in the latter part of the eighteenth century, at 191 Strand. He engraved the maps relating to England in Rapin's *History of England*, 1784–89, and most of the maps in Harrison's *Maps of the English Counties*, 1787—1790.

Swale (or **Swalle**), **Abel.** Bookseller, from about 1665—1699, at the Unicorn at the west end of St. Paul's Churchyard. He appears to have been in conjunction with Timothy Childe from 1691–97, as publisher of classics and history. Some of the principal works issued by Swale include *The Voyages and Travels of Jan Struys through Italy, Greece, etc.*, 1684 ; Slezer's *Theatrum Scotiæ*, 1693 ; and, in conjunction with the Churchills, Gibson's edition of Camden's *Britannia*, 1695 ; *Travels through Germany, etc.*, 1697 ; Ogilby's *Britannia*, 1698 ; and *The Traveller's Guide*, 1699.

Taylor, George. A surveyor, worked in partnership with Andrew Skinner, and produced a number of road maps between the years 1775 and 1777. Taylor's name appears alone, however, on a plan of the city of Aberdeen, from a survey taken in 1773. The joint productions of Taylor and Skinner included *Survey and Maps of the Roads of North Britain or Scotland*, 1776 ; an abstract from this work entitled *The Traveller's Pocket Book . . . of the Roads of Scotland*, 1776 ; *Survey of the Great Post Roads between London, Bath and Bristol*, 1776 ; *A map of the County of Louth*, 1777 ; and *Maps of the Roads of Ireland, surveyed* 1777, published in 1778. Proposals were also issued for surveys to be taken and maps to be made of Perthshire and Clackmannan but, according to Gough in his *British Topography* (vol. II, p. 710), "these surveyors neglected the scheme, for a more lucrative employ of publishing the roads in Ireland : since that was finished they have gained some office in the army in America, and have quitted that project." There is, in the British Museum, a manuscript *Map of New York and Staten Islands, and part of Long Island ; surveyed by order of H. E. General Sir Henry Clinton, K.B. . . . 1781, drawn by George Taylor and Andrew Skinner.*

Taylor, Thomas. Bookseller, and map and print-seller in London from about 1670 to 1721. His addresses are given as follows : (1) next door to the Beehive on London Bridge ; (2) Hand and Bible in the New Buildings on London Bridge ; (3) Ye Golden Lyon, over against Serjeants Inn in Fleet Street. The first two cover the dates 1671—1676 and probably describe the same place. Taylor printed or sold Hodder's *Arithmetick*, various theological works, *England Exactly Described, or a Guide to Travellers, A new general Atlas . . . by Mr. Senex* and various single maps.

Taylor, William. A publisher and bookseller in London, from about 1700 to 1723. He joined his father, John Taylor, one of the leading publishers of the period, at the Ship in St. Paul's Churchyard and, in 1711, set up in business for himself at the Ship in Paternoster Row. His publications, which included Defoe's *Robinson Crusoe*, were chiefly of a theological nature, but the following cartographical or topographical works were issued : monthly parts of *Atlas Geographus*, by H. Moll, from 1708 ; *The English Atlas*, by Senex and Maxwell, 1714 ; *A New General Atlas*, by Senex, 1721 ;

and Gibson's edition of Camden's *Britannia*, 1722. He died in 1723 and the business in Paternoster Row was purchased by Thomas Longman, founder of the famous publishing house which is still flourishing on the same site to-day.

Teesdale, Henry, and Company. Map publishers in London from about 1828. Until 1838 the firm was at 302, High Holborn; from 1839 until 1841, at 10, Red Lion Square; from 1842 until about 1850, at 2, Brunswick Row, Queen Square, and afterwards at 1, Prujean Square, St. Paul's. In 1857, Thomas Deacon and Co. succeeded to the business. A large number of well engraved maps and atlases were published including the following: large scale county maps of Yorkshire, 1828; Cheshire, 1830; Lancashire, 1830; Stafford, 1832; *New British Atlas*, several editions of which were published from 1829; *A New Travelling Atlas . . . of County Maps*, 1830; *A New General Atlas of the World*, of which several editions were published from 1831; *A New Chart of the World on Mercator's Projection*, 1841 and 1845.

Terry, Garnet. Engraver and jeweller, at (1) 62, Paternoster Row, London, until 1777; (2) 54, Paternoster Row, from 1777 until 1796; (3) 20, City Road, until 1798, when his name disappears from the directory. He engraved a large number of the plates in Taylor and Skinner's road atlases, including the complete set for their *Maps of the Roads of Ireland . . .* 1777, published in 1778, and the map of the county of Louth, prepared by the same surveyors in 1777. He also engraved one plate for Armstrong's *Actual Survey of the Great Post Roads between London and Edinburgh*, 1776, and several maps for *Rapin's . . . History of England*, 1784–89.

Terwoort, Leonard. Engraver. Engraved four maps for Saxton's atlas of England, 1579: *Cornwall, Somerset, Southampton* and *Warwick*. Signed: "Leneart Terwoort," or "Leonardus Terwoordus Antverpiensis." Nothing more appears to be known of him.

Tinney, John. Engraver and publisher, in the first half of the eighteenth century. A trade card issued by him reads "John Tinney, Engraver and Print-Seller at the Carv'd Golden Lion, in Fleet Street, London. Sells very great Variety of English and Foreign Prints, Mezzotinto Prints, Maps, Paintings on Glass, &c. &c. Likewise frames Pictures & Prints in y^e^ best Manner & serves Merchants & other considerable Dealers, with good Allowance." He engraved some portraits and several views of mansions and seats. Included in the former were Catherine Clive, George II, Thomas Parker, Earl of Macclesfield, Sir Thomas Parker, Chief Baron of Exchequer, and John Wesley; among the latter, views of Kensington Palace, Hampton Court, Fontainebleau, Versailles, Blair Castle in Atholl and Carlton House in Pall Mall. He also engraved many of the plates in Ball's *Antiquities of Constantinople*, 1729; *A Compendious Treatise of Anatomy . . . on ten folio copper plates*; *Specimens of One Hundred and Fifty Handwritings on sixteen plates*; and *A New Map of the Ukrain*. In addition to his own works Tinney published Rocque's *Plan of London*, 1746, and some of the maps by Bowen and Kitchen in *The Large English Atlas*, 1753—1755. His work did not reach a very high standard and he is chiefly remembered as the teacher of three distinguished engravers, William Woollett, Anthony Walker and John Browne. He died in 1761.

Toms, William Henry. Engraver and print-seller, at Union Court, near Hatton Gardens, Holborn, and afterwards at y^e^ Golden Head over against Surgeons Hall near Ludgate Hill, flourished from about 1723 to 1758. He engraved a large number of architectural subjects, views, plates, maps, and a few portraits. These include a set of eight views of the islands of Jersey, Guernsey, etc.; thirty-six views of London Churches, 1736; plans and views in Drake's *Eboracum*, 1736; a collection of views of the Thames, 1738; Popple's *Map of North America*, 1733, in twenty-one sheets; Map of Bermuda, 1738; maps in *Chorographia Britanniæ*, 1741; plan of the *Harbour of Cartagena*, 1741; and a map of *The Fens*, 1751.

Web, William. Bookseller, 1645, at the Globe in Cornhill, London. Published in 1645 a newly revised edition of Christopher Saxton's County Maps. Nothing further seems to be known of him.

Whittle, James. Partner in the firm of Laurie and Whittle (successors to Robert Sayer), map, chart and printsellers, at 53, Fleet Street, London. On the retirement, in 1812, of Robert Laurie, he took into partnership the latter's son, Richard Holmes Laurie and the firm's name was changed to Whittle and Laurie. He died at Brighton, Dec. 18, 1818, aged 61 years.

Wild, Joseph. Bookseller at the Elephant at Charing Cross *c.* 1700. Little appears to be known of Wild; the first entry in the *Term Catalogues* being in 1697, when he published *Church Music Vindicated*, followed by two or three books of poems. In 1701, he published Camden's *Britannia Abridg'd*, illustrated with above sixty maps taken from the plates of John Seller; this would appear to be the only topographical work issued by Wild.
